EDUCATION

UNIVERSITY AT BUFFALO, THE STATE UNIVERSITY OF NEW YORK

Master of Science, Business Analytics Domain Focused in Operations and Supply Chain

Jun 2023

UNIVERSITY OF PUNE, INDIA

Bachelor of Engineering, Computer Engineering

Jun 2020

SKILLS

Languages: Python | C++ | R | SAS | Matlab, **ML:** TensorFlow | scikit-learn, **Data Science:** Pandas | NumPy | Jupyter Notebook | Hadoop | Alteryx, **Cloud:** GCP, AWS : EC2, S3, Athena, Redshift, Glue, IAM, **Database:** MySQL | SQL | PL/SQL | MongoDB, **ETL:** Talend | Informatica, **Data Visualization:** Power BI | Tableau | Looker | MS Visio, **Data Warehouse Tool:** Oracle | Snowflake, **Excel:** VBA (Macros) | VLOOKUP | Sensitivity Analysis | Solver | Pivot Tables | Power Query, **Project Management :** Agile | Jira

EXPERIENCE

Data Analyst, PACER GROUP, PA, United States

Sep 2023-Present

- Collaborated with cross functional teams & applied data analytics to identify root causes of production delays, resulting in a **12% reduction in lead time variations** & a **9% improvement in production efficiency** contributing **\$96K in cost savings yearly**.
- Leveraged complex TSQL server queries, stored procedures and views to performance tune 100 GB of data; **resulting in a 40% less in query execution time** and faster loading dashboards.
- Devised ETL SSIS packages with data team to investigate 1+ million customers using SQL server, and created regression algorithms with Python for making better predictions, leading to a **8% growth in customers**.
- Led efforts with engineers for fixing data issues, mapping and integration, ensuring seamless data flow, **decreased response time by 3 days to 1 day**.
- Tested reports for requirements and reliability using SQL and Tableau/SSRS, resulting in **20% reduction of report errors**.
- Utilized best practices of visualization to create "always-on" 10 ad-hoc reporting systems using Tableau and Excel.
- Provided C-level stakeholders with business KPIs, metrics, insights and assisted in decision-making.

Data Analyst, MY CARE PHARMA LLP, India

Jun 2020-Aug 2022

- Spearheaded development of Predictive models, resulting in a **15% increase in forecast accuracy** by detecting seasonality and trend in patterns for product demand, **saving company an estimated \$30,000 in inventory costs**.
- Performed A/B testing and statistical modelling to check the impact of 10+ features and marketing campaigns, **acquired 4% new customers** resulting in **rising revenue by \$300k**.
- Performed root cause analysis, investigated data errors & implemented effective solutions to **correct data problems by 15%**.
- Executed Master data management (MDM) for uniform, accurate, & consistent master data, **reducing errors by 33%, achieving 99.5% data accuracy, minimizing redundancy by 24%**, enhancing faster decision-making.
- Worked closely with Product Delivery and Development Team to ensure data mappings and business requirements were interpreted correctly from detailed design specifications throughout SDLC & **developed an Agile project plan**.
- Authored and maintained 5+ Tableau dashboards, enabling stakeholders real-time visibility into core KPIs and business metrics, **saving 10 hours/week in manual reporting**.

ACADEMIC PROJECT EXPERIENCE

Airbnb Data Analysis and Visualization

Apr 2023 - May 2023

- **Transformed 50 unique features** of Airbnb data into visually compelling bar charts, geographical maps, and scatter plots, ensuring clear understanding for both technical and non-technical audiences.
- Leveraged Tableau's data blending, calculated fields, and filtering tools to **integrate 5 diverse Airbnb datasets**, resulting in interactive dashboards that reveal hidden market dynamics and empower informed decision-making.

NYC Taxi Data Analysis using Google Cloud Platform

Jan 2023-Mar 2023

- Implemented ETL process on GCP, Mage ETL tool, utilizing STAR Schema for data models.
- **Processed and transformed 1 million+ records** of NYC Yellow Taxi and Limousine Commission data on Google Cloud Storage and Compute Engine, loading it into Google BigQuery for data storage and retrieval using STAR Schema design.
- Utilized SQL queries and Looker to perform in-depth analytics, extract valuable insights, & formulated user-friendly dashboards.

YouTube Trend Prediction

Oct 2023-Dec 2023

- Devised a tool enabling content creators to increase viewership and visibility by model selection using cross validation on Linear, Decision Tree, and Random Forest Regressors on a YouTube dataset of 1.2 million observations spanning 10 countries.
- Trained and optimized a Multi-layer Perceptron by facilitating co-occurrence analysis on keywords extracted from video description, associated hashtags and channel metadata through API, **improved accuracy from 66.6% to 72.3%**.
