

Pranav Suresh Babu

Cleveland, OH | (216) 315-5103 | pranavsuresh450@gmail.com | [LinkedIn](#) | [Github](#) |

TECHNICAL SKILLS

Data : Data Extraction, LLM, Machine Learning, Feature Engineering, Statistical Analysis, NLP
Programming Languages : Python, SQL, R
Python Libraries : Pandas, NumPy, Matplotlib, Lang chain, Pytorch, Keras, Tensorflow, NLTK, Spacy
Tools & Technologies : Jupyter Notebook, Git, Google Colab, Kaggle, Tableau, Dialogflow

WORK EXPERIENCE

Infinite Computer Solutions - Software Engineer

Dec 2021 – Jun 2023

- Conducted thorough oversight relating to SQL script development linked to ongoing database operations paired with adept handling of over ten complex command lines during seamless job tracking via Autosys execution logs monthly.
- Analyzed existing workflow configurations within Autosys and developed targeted solutions via SQL scripting that resolved common failure points directly tied to project success metrics tracked monthly.
- Achieved 93% improvement in job execution success rate by optimizing Autosys workflows, reducing job failures, and ensuring reliable weekend deployment support.

PROJECTS

Creating AI Assistants with GPT-4o and Lang chain

Sep - 2024

- Developed an OpenAI-powered assistant leveraging GPT-4o to enhance comprehension of Artificial General Intelligence (AGI) research.
- Designed a robust prompt and intuitive interface using Python, LangChain and OpenAI API to process, summarize, and simplify complex AGI Arxiv papers into clear insights for data scientists.
- Significantly accelerated the research review process, reducing the time to extract key insights by 60%, and enhancing knowledge sharing and collaboration among data science professionals

Cyberbullying classification using BERT

Aug - 2024

- Constructed a machine learning model using BERT to classify social media comments into categories such as race, religion, gender, sexual orientation, and miscellaneous attributes for the detection of cyberbullying.
- Executed data preprocessing on annotated social media comments, implemented fine-tuning of BERT, and conducted model evaluation using accuracy, precision, and recall metrics to ensure reliable classification.
- Secured a remarkable 93% accuracy rate in classifying instances of cyberbullying, which directly contributed to the data labeling accuracy and reliability throughout the dataset analysis process.

Medical Cost Estimation

Jul - 2024

- Streamlined feature selection process resulting in a reduction of processing time by 30% when preparing datasets for training models predicting medical expenses while maintaining high levels of accuracy throughout analysis stages.
- Generated detailed insights from data preprocessing by identifying key trends across four demographic variables impacting medical charges; established a framework for future analyses leading to streamlined feature engineering processes.
- Achieved a significant increase in predictive accuracy to 89% for medical expense predictions through careful optimization and tuning processes specifically tailored for utilizing Cat Boost's strengths.

EDUCATION

Cleveland State University, Cleveland, Ohio, USA

May - 2025

Master of Science in Electrical Engineering (Concentration : Computer Systems)

Cranes Software International, Bangalore, India

Dec - 2021

PG Diploma in Data Science using Python

Sri Venkateswara College of Engineering, Chennai, India

Jun - 2021

Bachelor of Engineering in Electrical and Electronics Engineering
