

Data Engineer

Name: Pranay Kaira

Ph.no: 7319030324

Email id: pranaykgr99@gmail.com

LinkedIn: www.linkedin.com/in/pranay-k99

PROFESSIONAL SUMMARY:

- 4 years of IT industry knowledge with hands-on working experience in Data Engineering & Data Analysis.
- Skilled in **ETL/ELT development** using **Apache Spark, PySpark, Airflow, and dbt**, with strong proficiency in **SQL, Python**, and big data ecosystems (Hadoop, Hive).
- 4 years of IT industry experience with hands-on expertise in **Data Engineering** and **Data Analysis**.
- Skilled in **ETL/ELT development** using **Apache Spark, PySpark, Airflow, dbt**, and **SQL/Python** within modern big data ecosystems (**Hadoop, Hive**).
- Experienced in **real-time data streaming and ingestion** with **Kafka, Kinesis**, and **Flink**, enabling low-latency and high-availability processing.
- Strong knowledge of **data warehousing** (**Snowflake, BigQuery, Redshift**) and **data modeling** (**Star, Snowflake, Data Vault, OLTP/OLAP**) to support analytics and **BI reporting**.
- Proficient in **data ingestion, integration, and transformation** using **Airflow, NiFi, Kafka, dbt**, and **AWS Glue** with a focus on reliability and governance.
- Adept in **data governance** and **data quality frameworks** (**Great Expectations, Collibra, Alation**), ensuring compliance with **GDPR** and **HIPAA** standards.
- Advanced skills in **SQL, Python**, and **Excel** for **data wrangling, statistical analysis**, and development of **KPI-driven dashboards**.
- Developed **ad-hoc and scheduled reports** using **Excel, SSRS**, and **Power BI** to support marketing, operations, and executive decision-making.
- Built **data pipelines** with **Azure Data Factory**, integrating sources such as **Azure SQL, Excel**, and **APIs** into unified **data models** and dashboards.
- Strong background in **statistical analysis, hypothesis testing, forecasting**, and **predictive modeling** to uncover business insights and opportunities.
- Implemented **CI/CD pipelines** using **Git, GitHub, GitLab**, and **Azure DevOps**, streamlining deployment and automation of **data solutions**.
- Experienced in **data infrastructure automation** using **Docker, Kubernetes**, and **Terraform** to support scalable **data engineering** practices.

TECHNICAL SKILLS:

- **Programming & Scripting:** Python (Pandas, NumPy, PySpark, Scikit-learn), SQL (T-SQL, PL/SQL), R, Scala
- **Data Engineering:** Apache Spark, Hadoop, Kafka, Flink, Airflow, dbt
- **Databases & Warehousing:** Snowflake, Azure Synapse, Google BigQuery, Amazon Redshift, Oracle, PostgreSQL, MySQL, MongoDB
- **Cloud Platforms:** AWS (S3, Glue, Lambda, EMR, Redshift), Azure Data Factory, GCP Dataflow
- **ETL/ELT Tools:** Apache Spark, PySpark, Airflow, dbt, Azure Data Factory (ADF), Informatica, Talend, SSIS, AWS Glue, Databricks
- **Data Visualization & BI:** Power BI, Tableau, Looker, Excel (Advanced), SSRS
- **Data Modeling & Governance:** Star Schema, Snowflake Schema, Data Vault, OLTP/OLAP, Great Expectations, Collibra, Alation, MDM
- **Cloud Platforms:** Microsoft Azure (ADF, Synapse, Databricks, Logic Apps, Functions, Event-based Services), AWS (S3, Glue, Lambda, EMR, Redshift), GCP (Dataflow, BigQuery, Pub/Sub)
- **Machine Learning (basic):** Hypothesis Testing, Forecasting, Predictive Modeling, Scikit-learn, TensorFlow (Intro)
- **Version Control & DevOps:** Git, GitHub, GitLab, Azure DevOps, CI/CD pipelines, Docker, Kubernetes, Terraform, Jenkins

PROFESSIONAL EXPERIENCE:

Client: Truist Bank, Charlotte, NC

June 2024 - Present

Role: Data Engineer

Responsibilities:

- Designed and deployed enterprise-grade data solutions using **Azure Data Factory, Synapse Analytics, Databricks, Logic Apps**, and **Functions**.
- Designed and implemented **ETL/ELT pipelines** to integrate data from multiple sources (internal systems, external vendors, APIs) into enterprise data lakes and warehouses.

- Strong expertise in **SQL, Python, and PySpark** for data modeling, transformation, and automation of large-scale data workflows.
- Developed **interactive dashboards and regulatory reports** using **Power BI and Tableau**, delivering actionable insights for compliance, risk management, and business strategy.
- Implemented **data quality, data governance, and master data management (MDM)** frameworks to ensure accuracy, consistency, and compliance with banking regulations (SOX, BCBS 239, GDPR).
- Automated **CI/CD pipelines in Azure DevOps** to streamline deployment of data engineering solutions and enforce version control.
- Experienced in **real-time and batch data processing** using **Azure Databricks** and Azure Event-based services.
- Partnered with business and compliance teams to design data solutions that support **risk, fraud detection, and regulatory reporting**.
- Utilized **GitHub** for organizing project code and documentation, and **Jira** for managing sprint tasks and tracking deliverables.

Client: Infinx Healthcare, India

Oct 2022 – April 2023

Role: Data Engineer

Responsibilities:

- Designed and implemented cloud-based data solutions on **Azure** and **Snowflake** to support healthcare data processing and reporting.
- Developed **ETL/ELT pipelines** using **Talend, Azure Data Factory (ADF), and Databricks** to integrate claims, billing, and patient data from multiple sources.
- Built and optimized **data warehouses and data models (Star/Snowflake schemas)** to enable regulatory, operational, and financial reporting.
- Created interactive dashboards and compliance reports in **Power BI, Tableau, and Looker** to support executives, operations, and clinical teams.
- Implemented **data governance** and validation frameworks to ensure data integrity, **HIPAA compliance**, and audit readiness.
- Optimized **SQL queries, stored procedures, and indexing strategies** for efficient processing of high-volume healthcare data.
- Automated data pipelines and workflows using **Airflow, ADF, and AWS Glue**, reducing manual effort and improving reliability.
- Conducted **predictive analytics and statistical modeling** using **Python (Pandas, NumPy, Scikit-learn)** to support fraud detection, patient outcome analysis, and revenue forecasting.
- Partnered with business stakeholders to deliver **KPI dashboards, anomaly detection systems, and ad-hoc reporting** that improved decision-making across claims, operations, and finance.

Client: Suryoday Small Finance Bank Ltd, India.

Aug 2020 – Sep 2022

Role: Data analyst

Responsibilities:

- Assisted in developing and maintaining **ETL workflows** to load **customer, loan, and transaction data** into the bank's **data warehouse**.
- Wrote **SQL queries** to **extract, clean, and validate data** from multiple **source systems**.
- Supported senior developers in creating **ETL mappings and transformations** using **Informatica, Talend, or SSIS**.
- Helped prepare **daily and monthly reports** for **business teams**, including **deposit trends, loan performance, and branch operations**.
- Performed **data quality checks** to ensure **accuracy and completeness** of **customer and financial records**.
- Monitored **scheduled ETL jobs** and assisted in **troubleshooting data load issues**.
- Documented **ETL processes, job runs, and data dictionaries** for internal reference.
- Collaborated with **business analysts** to understand **requirements** and deliver accurate **data for reporting and dashboards**.

EDUCATION:

University of Memphis

May 2023 – Dec 2024

Masters in Data Science(3.89/4.0)
