PROFESSIONAL SUMMARY

Experienced IT professional with over **5 years** in software development, adept at **Agile Methodology** for analyzing, defining, and documenting applications to meet business needs. Proficient in **Core Java, object-oriented programming (OOP) concepts**, and **web technologies** such as **HTML5, CSS3, JavaScript, AngularJS, NodeJS, ReactJS and Vue.js**. Extensive experience with the **Spring Framework, Java 8 features**, various **open-source frameworks**, and **testing frameworks** including **JUnit, Mockito, TestNG and Cucumber**. Skilled in designing and implementing **MongoDB clusters**, managing **NoSQL databases**, and deploying fault-tolerant systems on **AWS and Azure**. Well-versed in **CI/CD pipelines**, using **Jenkins, GitHub Actions and Azure DevOps**; experienced in containerizing applications with **Docker**. Strong project management skills using **Jira** and other **Agile tools**, showcasing a commitment to delivering high-quality software solutions. Additionally, proficient in **RESTful API design, microservices architecture, frontend frameworks** such as **Bootstrap**, and implementing security best practices in software development. Expertise in version control systems, including **GitHub Actions and SVN**, further enhances my ability to contribute effectively to Software development project.

TECHNICAL SKILLS:

Programming Languages: C, Java, Python, C#

Databases: MySQL, SQL Server, Oracle, Mongo dB, Dynamo Db

Operating System: Windows, Linux, Android, MacOS X

Web Technologies: Html5, Css3, JavaScript, Ajax Angular JS, React JS, jQuery, Xml, JSON, Microservices.

Application Server: Apache Tomcat, WebLogic

Cloud Services: Amazon Web Services, Azure

IDE: Eclipse, IntelliJ, Visual Studio Code

DevOps tools: Docker, Kubernetes, CI/CD, Lambda Functions

Frameworks: Spring, Spring MVC, Spring Boot, Hibernate, JPA

Build Tool: Maven, Gradle

Version Control: SVN, Git, GitHub, Bit Bucket
Web Services: Restful, SOAP

Methodologies: Agile (Scrum), Waterfall, SD

WORK HISTORY:

Full Stack Java Developer

Pfizer, Philadelphia, Pennsylvania

11/2023 – Current

- Developed using new features of **Java 11 Annotations, Generics, Lambda Expressions** enhanced for **loop and Enums**.
- Involved in developing web applications using **Java 11** and making sure the coding is done according to the developer coding practices.
- Designed the Web Application Using **Spring MVC (Model View Controller)** pattern to make it extensible and flexible.
- Developed the Application using **Spring Features** like **Spring MVC, Spring DAO, Spring Boot, Spring Batch, and Spring Security** for application access and authorization, **Spring Integration, Spring AOP** for crosscutting concerns.
- Used **Micro services** architecture with **Spring Boot** based services interacting through a combination of **REST** and **Apache Kafka** message brokers.
- Developed **Spring Boot** to fasten the application for removing boiler plate configurations.
- Used loosely coupled architecture **Spring Boot**. Developed Micro Services in the application by using **Spring Boot**.
- Responsible for creating and maintaining architecture for **Restful API** using **SpringBoot**.
- Used **Hibernate framework** in persistence layer for mapping an object-oriented domain model to a relational database.
- Involved in designing and developing the front end of the application using **Angular.JS, Java script, AJAX, HTML5, CSS3**.

- Developed **Single Page applications (SPA)** using **Angular 10** using components, directives using **Typescript**.
- Created custom directives in **Angular 10** for reusable components (multi-field form elements, background file uploads) and used filters while coding in **Angular 10**.
- Developed **Angular.JS** components that could be reused in various parts of the application and form field validation.
- Involved in developing **restful APIs** using **Node.JS** frameworks.
- Used **Eclipse** as the **IDE** and **Web Logic** as the application server.
- Worked on **Java Message Services (JMS)** for developing messaging services and used **spring framework** to implement the **JAX-RS (Java API for XML and RESTful Service)**.
- Used **XML parser APIs** such as **JAXP** and **JAXB** in the web service's request response data.
- Used **Jenkins** continuous integration tool to make the build passes before deploying the code to other environments (DEV, SIT, iTest, Prod).
- Developed web-based applications using Web Services, both **SOAP/WSDL** and **REST**.
- Used **NoSQL MongoDB** database to provide recommendations on Performance tuning for applications.
- Used **agile** methodology that included iterative application development, weekly Sprints, and daily stand-up meetings.
- Involved in Unit integration, bug fixing, acceptance testing with test cases, Code reviews.
- Designed and implemented robust **CI/CD pipelines**, automating the software delivery process to reduce manual errors and deployment time. Additionally, Integrated **Kafka** and **Spring JMS API**, facilitating efficient message exchange within the **RESTful API**.
- Designed applications using **Microservice Architecture**, incorporating various **design patterns** for scalability and maintainability.
- Developed **JUnit test** cases for all the developed modules and **GIT** repository for software configuration management and version control and **JIRA** for bug tracking.

Environment: Java 11, spring, MVC, Spring Boot, Micro Services, Hibernate, RESTful, HTML5, CSS3, JavaScript, Angular 10, Angular.JS, Eclipse, Node.JS, JMS, XML, AWS, Docker, EJB, Log4j, JUnit, Jenkins, SOAP, MongoDB, SQL, Agile and Windows.

Software Engineer

Vitosia – Hyderabad, India

10/2020 - 12/2021

- Extensively used core java concepts like **Multithreading**, **Collections Framework**, **File I/O**, and concurrency and followed **Agile Software Development Methodology**, ensuring adaptability and collaboration.
- Additionally, used **React.js** screens, leveraging predefined components from **NPM** and applied Design Patterns like **DAO** and **Singleton** for efficient system design and development.
- Utilized **Java8** features like **Lambda expressions** and **Stream API** for Bulk data operations on **Collections** which would increase the performance of the Application.
- Integrated **Amazon Web Services (AWS)** with **Docker** for scalable and cloud-hosted web applications using **Spring Boot** and developed **REST APIs** with **Spring Boot** for backend functionality, ensuring optimal performance and responsiveness.
- Moreover, utilized an embedded **Tomcat server** for deployment, optimizing resource utilization in a **microservices architecture**.
- Deployed **Spring Boot-based Microservices** in **Docker containers** and **Amazon EC2** instances with **Jenkins** and developed **Microservices** using **Spring MVC**, **Spring Boot**, and **Spring Cloud** to ensure robust functionality, modularity, and optimized scalability.
- Employed **GIT** as a Version Control System for effective **code management**, implementing branching strategies and ensuring version control best practices and collaborated with cross-functional teams, facilitating seamless code integration and project collaboration.
- Developed **ETL** processes to efficiently transfer data from various sources to Hadoop ecosystem using technologies like **Apache Spark**, and **Apache Hive**.
- Utilized **JSP** for developing dynamic web pages to interact with users and present data-driven insights from Hadoop-based data processing.
- Proficient in **PL/SQL** programming for **Oracle** database management, including writing stored procedures, triggers, and functions to automate data manipulation and ensure data consistency.
- Involved in implementing the **JMS (Java messaging service)** for asynchronous communication with other applications.

- Worked on **XML** parsers (JAXB) for data retrieval and JAXB parser for marshalling and unmarshaling.
- Implemented AWS solutions using **EC2, S3, RDS, Elastic Load Balancer and Auto scaling groups**, Optimized volumes and EC2 instances.
- Configured **JUnit test** cases comprehensively, ensuring rigorous **unit test** coverage to enhance software robustness.
- Implemented **test-driven development (TDD)** practices, contributing to the creation of reliable and maintainable code. Additionally, integrated automated **testing tools** to streamline the testing process and improve overall software quality.

Environment: Java 8, spring, MVC, Spring Boot, Micro Services, Hibernate, HTML5, CSS3, JavaScript, Eclipse, JMS, XML, AWS, Docker, EJB, Log4j, JUnit, Jenkins, RESTful, SOAP, MongoDB, SQL, Agile and Windows.

Software Engineer

Webdizer Software Solutions, Hyderabad, India

02/2019 – 09/2020

- Worked on **Software Development Life Cycle (SDLC)** process in the areas of **Analysis, Design, Implementation** and Testing of application using **Java/J2EE technologies** which also includes Code enhancements, perform code reviews, follow processes and coding standards.
- Designed and implemented **core Java APIs**, incorporating key concepts such as **Interface, Abstraction**, and **JDBC** for seamless data interactions. Utilized **Java Data Structures** for improving performance, ensuring efficient handling of data within the application.
- Developed the **UI** component architecture for developer framework using **Angular, TypeScript, HTML5, CSS3** and **Bootstrap**.
- Invoked Stored Procedures and Implemented database connectivity to **Oracle** using **JDBC** and used **Hibernate** to streamline **database interactions**, optimizing **transactions** for improved overall application efficiency.
- Additionally, integrated **Web Services** for responsive handling of **HTTP requests**, enhancing the application's capabilities.
- Created complex calculated fields, sets, parameters, and filters in **Tableau** to manipulate and analyze data effectively, providing actionable insights to business users.
- Configured **JUnit test cases** with **data mocking** using **Mockito**, ensuring comprehensive unit test coverage and worked with **Docker** to enhance the **Continuous Delivery (CD)** framework, contributing to streamed releases.
- Involved in the Requirements collection and Analysis from the business team, preparing functional specifications and technical specifications as per requirements includes a detailed plan to develop, alter, and maintain software system.
- Worked on **Java 8** features such as **Lambda expressions** for making anonymous inline function calls by using Functional Interfaces which makes code readable and concise.

Environment: Java 8, spring, MVC, Spring Boot, Hibernate, HTML5, CSS3, JavaScript, Angular, Typescript, Eclipse, XML, EJB, Log4j, JUnit, Jenkins, RESTful, SOAP, MongoDB, SQL, Agile and Windows.

EDUCATION

Institute

Governors State University, USA

Study

Master's in computer science (2022 -2024)

CERTIFICATIONS

Python, Nptel

April-2019
