EDUCATION

Cornell University, SC Johnson College of Business

Master of Science in Business Analytics, Finance Concentration | GPA: 3.80

Ithaca, NY

August 2026

University of California, Santa Cruz

Bachelor of Science in Computer Science | GPA: 3.60

Santa Cruz, CA

June 2025

SKILLS

Technical: Python, Pandas, NumPy, SQL, Tableau, C, C++, Assembly Language, Shell script, RISC V assembly, Latex, Excel (XLOOKUP, Regression Analysis, Database Analysis), Java, Google Sheets

AI/Analytics Tools: Machine Learning (scikit-learn), Large Language Models (LLMs), Prompt Engineering, Model evaluation, Monte Carlo simulation, Statistical analysis, A/B testing, Data cleaning, Data profiling & validation, Jupyter Notebook

Languages: Marathi (intermediate), Hindi (intermediate) and Spanish (intermediate)

WORK HISTORY

Describe (Startup developing AI tools for mental health clinicians)

Miami, FL

AI Business Analyst (Remote)

December 2024 - Present

Intern (Remote)

June 2024 - August 2024

- Developed and refined large language model (LLM) prompts in a production AI system to optimize accuracy and efficiency for mental health professionals; analyzed 150+ clinician frameworks to translate business requirements into prompt architectures and data-driven workflows.
- Designed, standardized, and implemented testing frameworks to evaluate prompt effectiveness, improving AI-generated notes and insights for psychiatrists; reduced customer complaints and decreased negative feedback by over 30%.
- Conducted customer interviews with clinicians and cross-functional stakeholders to identify feature gaps in the AI product; led a one-month initiative that increased ARR by 3% (\$40,000+) by implementing pause and dictation functionalities to drive monetization and adoption.
- Built a post-implementation automated internal LLM testing platform and created comprehensive documentation to support the end-to-end model lifecycle; developed Python scripts to compare actual vs. expected outputs and established standardized evaluation workflows for continuous improvement.

PROJECTS

AI Gladiator Game / Godot, AI development, team collaboration (UC, Santa Cruz)

August 2024

- Structured AI decision pathways using behavior trees to create adaptive, dynamic gameplay; collaborated with teammates to align mechanics and system components, ensuring consistent logic and smooth integration across features.
- Led AI testing and debugging to validate stable performance; refined behavior patterns and resolved edge cases for a smoother player experience.

Subway Reviews Performance Analysis / Restaurant Ratings Benchmarking (Cornell University)

November 2025

- Analyzed Yelp review and restaurant data (~400K reviews across ~2,000 locations) in Python using pandas; merged datasets, engineered time-based features, and built line, bar, and distribution charts to understand Subway rating trends by year, state, and chain size.
- Benchmarked Subway performance against national competitors and local restaurants; quantified rating gaps, evaluated leadership claims about a 4.5/5 target, and translated insights into recommendations on realistic KPIs, operational consistency, and customer-experience improvements.

Interactive Sales Insights Dashboard / Superstore Revenue and Profit (Cornell University)

November 2025

- Built an interactive Tableau dashboard on the Superstore dataset using geographic and product hierarchies (region → category → sub-category); applied filters, parameters, and drill-downs to analyze sales, profit, and customer segments across markets.
- Applied advanced visualization techniques (dot plots, slope graphs, bullet charts, stream graphs, Sankey flows) to surface performance trends, product mix shifts, and high-value segments, enabling data-driven sales, pricing, and regional targeting decisions for non-technical stakeholders.

LEADERSHIP & COMMUNITY

Men's Tennis Captain, University of California, Santa Cruz

2023 - 2025

Surf and Turf / Tennis Instructor

June 2022 - August 2022

- Coached players while handling scheduling and collaborating with staff to keep the program running smoothly.
