

PRANIDEEP KARNATI

DATA ANALYST | DATA ENGINEER

USA +1 (972)-768-9213 | pranideepkarnati365@gmail.com | [LinkedIn](#)

SUMMARY

Results-driven Data Analyst with 3+ years of proven experience in extracting, cleaning, analyzing, and interpreting complex datasets to uncover actionable insights. Expert in leveraging SQL, Python, and leading visualization tools like Tableau and Power BI to transform raw data into clear, compelling reports and dashboards. Adept at identifying trends, performing statistical analysis, and communicating findings effectively to diverse stakeholders to drive strategic decision-making. **Consistently delivered data-driven recommendations that improved operational efficiency by up to 25% and accelerated data-driven decision-making by 40%.**

SKILLS

Methodologies: SDLC, Agile, Waterfall, Exploratory Data Analysis (EDA), Statistical Analysis, Data Modeling, A/B Testing, Hypothesis Testing, Root Cause Analysis, Data Storytelling

Languages: Python, R, SQL, SAS, MDX (familiarity)

Packages: NumPy, Pandas, Matplotlib, SciPy, Seaborn, Ggplot2, StatsModels, Plotly, Bokeh

Visualization Tools: Tableau, Power BI, Microsoft Excel, QlikView, Google Analytics, Google Data Studio, Looker, SSRS

Cloud Platforms: AWS, Google Cloud Platform (GCP), Azure (familiarity with data services for analysis)

Big Data Technologies: Hadoop, Hive, Apache Spark, Databricks (familiarity for data extraction)

ETL Tools: Informatica, Talend, Alteryx (familiarity for data sourcing)

Reporting Tools: SAS BI, Business Objects, Crystal Reports

Database: MySQL, SQL Server, MongoDB, Snowflake, PostgreSQL, Oracle, Data Warehouses, Data Marts

Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Problem-Solving, Communication, Presentation, Requirements Gathering, Business Acumen, Data Validation, Ad-hoc Reporting, Dashboard Design

Operating Systems: Windows, Linux.

WORK EXPERIENCE

Goldman Sachs, USA | Data Engineer

Dec 2024- Current

- Designed and implemented scalable ETL/ELT pipelines using Azure Data Factory, Apache Spark, and Databricks to process structured and semi-structured data (REST APIs, JSON, Parquet), enabling high-throughput data ingestion with ACID compliance via Delta Lake.
- Built analytical data models and dashboards by collaborating with stakeholders and leveraging Power BI and SQL, translating business questions into KPIs and reports that improved operational decision-making and reduced ad-hoc analysis time by 40%.
- Engineered real-time data streaming architectures using Apache Kafka and Spark Structured Streaming to process high-velocity clickstream and IoT data, reducing time-to-insight from hours to under 3 minutes for critical user engagement metrics.
- Optimized large-scale data pipelines in Snowflake, implementing clustering keys, query pruning, and materialized views to support batch and near real-time analytics, cutting average query latency by over 60%.
- Developed advanced SQL scripts and data profiling routines to detect anomalies, nulls, and schema drifts, enabling proactive data quality management and increasing reporting accuracy by 25%.
- Automated ingestion and transformation pipelines from sources like MySQL, S3, and Azure Blob Storage using Snowpipe, Streams & Tasks, improving data freshness and supporting low-latency reporting pipelines for over 100 million daily records.
- Implemented metadata-driven orchestration and lineage tracking using Azure Purview and dbt, enhancing data governance, compliance, and root cause analysis during incident investigations.
- **Conducted in-depth data analysis on complex financial datasets, identifying critical trends and anomalies that informed strategic investment decisions, leading to a 15% improvement in portfolio performance.**
- **Developed and maintained interactive dashboards using Power BI and Tableau, providing real-time insights into key business metrics and reducing manual reporting efforts by 30%.**
- **Translated complex data insights into clear, actionable recommendations for senior management, directly contributing to a 10% increase in operational efficiency.**
- **Performed rigorous data validation and quality assurance on large**

datasets, ensuring data accuracy and reliability for critical business reports.

Miraicoders Technology, India | Jr. Data Engineer
Dec 2022-Jan 2024

- Built scalable ETL pipelines using Azure Data Factory and Apache Spark to ingest, clean, and transform customer demographic and transactional data from MySQL and SQL Server into Azure Blob Storage and Delta Lake, reducing reporting latency by 40%.
- Engineered event-driven data workflows using Azure Functions and Logic Apps to automate the processing of real-time sentiment analysis data from customer feedback streams, enhancing responsiveness and operational efficiency.
- Designed advanced Power BI dashboards and DAX models to visualize multi-source sales, performance, and behavior data, enabling senior leadership to identify revenue trends and make data-driven strategic decisions.
- Developed Python- and PySpark-based data transformation scripts to handle semi-structured and unstructured data at scale, leveraging NumPy, Pandas, and Seaborn for exploratory data analysis and visual storytelling.
- Utilized Azure Cosmos DB and MongoDB to store and query NoSQL datasets, enabling sub-second retrieval of customer insights used in personalized marketing campaigns and customer retention analysis.
- Orchestrated secure data pipelines using Kafka, Azure Event Hub ensuring real-time data flow compliance and granular access control across multi-cloud and hybrid environments.
- Implemented statistical models in R and SAS to forecast customer churn and product demand, integrating predictive insights into downstream analytics and visualization platforms to improve operational decision-making.
- Compliance, and root cause analysis during incident investigations.
- **Conducted comprehensive exploratory data analysis (EDA) on customer behavioral and sales data, uncovering hidden patterns that led to a 7% increase in targeted marketing campaign effectiveness.**
- **Developed and optimized SQL queries to extract, transform, and load data from various sources, supporting ad-hoc analysis requests and reducing data retrieval time by 20%.**

- **Created compelling data visualizations and presentations for business stakeholders, effectively communicating complex analytical findings and influencing strategic decisions.**
- **Implemented statistical models in R and SAS to forecast customer churn and product demand, providing predictive insights that improved business planning accuracy by 15%.**

KPMG by InsideSherpa, India | Data Analyst/Jr. Data Engineer

Nov 2021-Dec 2022

- Facilitate Agile training sessions for new team members, achieving a 100% understanding rate of Agile principles, roles, and ceremonies and improving team productivity by 20%.
- Conduct extensive data analysis using Python and R, employing libraries such as NumPy, Pandas, Matplotlib, SciPy, Seaborn, and ggplot2 to derive actionable insights.
- Utilize RStudio for advanced statistical analysis and reporting, improving the accuracy and reliability of analysis by 30%.
- Create interactive dashboards and reports using Google Data Studio, Tableau, Power BI, and Plotly, leading to a 40% increase in data-driven decision-making across departments.
- Perform data cleaning and wrangling to ensure high data quality and integrity, dropping data-related errors by 25%.
- Implement Amazon SageMaker for scalable machine learning workflows, falling model training time by 20%.
- Deploy data solutions on AWS, Google Cloud Platform (GCP), and Azure, optimizing cloud resources and reducing operational costs by 25%.
- Managed databases using MongoDB, Cassandra, and PostgreSQL, ensuring secure and efficient data storage and retrieval.
- **Executed extensive data cleaning and wrangling processes on raw datasets, improving data quality and integrity by 25% for subsequent analysis.**
- **Developed interactive dashboards and reports using Google Data Studio, Tableau, and Power BI, increasing data-driven decision-making by 40% across various departments.**
- **Utilized Python and R to perform advanced statistical analysis, delivering actionable insights that improved the accuracy and reliability of analysis by**

30%.

EDUCATION

Master in Computer and Information Science

Southern Arkansas University, USA

Bachelor of Technology in Computer Science and Engineering

Sathyabama University, India

CERTIFICATIONS

- Microsoft Certified: Azure Data Engineer Associate
- AWS Certified Data Analytics - Specialty
- Google Cloud - Professional Data Engineer
- Databricks Certified Data Engineer Associate/Professional
