

PRANJAL DAS

USA | (945) 244-8720 | pranjaldasdata@gmail.com | [linkedin.com/in/pranjaldasjsom/](https://www.linkedin.com/in/pranjaldasjsom/)

CORE COMPETENCIES

Attention to Detail | Critical Thinking | Problem-Solving | Organizational Skills | Leadership | Decision-Making | Predictive Modeling | Time Series Forecasting | Data Warehousing | Data Visualization | Python (Pandas, NumPy, Matplotlib, Seaborn) | SQL (Oracle, PostgreSQL, MySQL, SQL Server) | R | Spark | Tableau | Power BI | Cloud Computing (AWS, GCP) | Snowflake | Redshift | Statistics | ETL | Alteryx | SAS | NLP | Automation (Excel Macros, Python Scripting) | Business Strategy | Process Optimization | Operational Efficiency

PROFESSIONAL EXPERIENCE

Business Intelligence Analyst– Fan’sGlobal SocialNGN LLC (4FANZ), Dallas, TX Sep 24 – present

Data-Driven Customer Segmentation & Targeting Optimization

- Leveraged **SQL** and **Python** to analyze customer behavior and identify high-value segments, increasing campaign engagement by **15%**
- Developed **data** models to improve ad targeting precision, resulting in a **12%** increase in overall campaign effectiveness

A/B Testing & Performance Analytics for Market Insights

- Conducted **A/B testing** to refine content strategies, increasing **ROI** on targeted campaigns by **10%** through data-backed adjustments
- Built interactive **Tableau dashboards** to track performance metrics, reducing insights delivery time for stakeholders by **30%**

Data Analyst– Orissa Stevedores Limited, India Aug 21 – Mar 22

Data Analysis and Maintenance Strategy

- Analyzed aircraft maintenance records using **MSSQL** enhancing **data accuracy** and compliance, improving operational insights by **10%**
- Developed a **Power BI** forecasting model to optimize aircraft maintenance schedules, boosting operational efficiency by **5%**

Inventory Optimization and Reporting Automation

- Optimized aircraft parts inventory documentation, cutting discrepancies by **12%** and ensuring compliance with regulatory standards
- Automated monthly maintenance reports using **Excel macros**, reducing preparation time by **40%** and boosting accuracy

Data Analyst– Kalinga Institute of Industrial Technology, India Aug 20 – Jul 21

Predictive Modeling for Nanoparticle Heat Transfer

- Analyzed fluid simulation datasets using **Excel pivot tables**, uncovering trends in nanoparticle heat transfer behavior
- Developed a **Random Forest Regressor model** to predict nanoparticle flow dynamics, achieving an **89% accuracy**

Data Visualization and Automated Reporting

- Built Matplotlib and Seaborn **visualizations** to track key trends, reducing analysis time by **30%** and improving reporting accuracy by **15%**
- Automated data collection and reporting processes using **Python**, standardizing workflows and reducing report preparation time by **40%**

ACADEMIC PROJECT EXPERIENCE

Customer Churn Analysis and Insights Dashboard: Streamlit-Powered XGBoost Insights Jun 24 – Aug 24

- Built a **predictive** churn analysis model using **XGBoost**, achieving a **92%** accuracy and contributing to a **15%** increase in customer retention
- Designed and deployed an **interactive dashboard** using **Streamlit** to visualize churn probabilities, enabling stakeholders to make **data-driven decisions**.

Bank Loan Insights Dashboard: MS SQL Server/Tableau Analytics May 24 – Jun 24

- Developed an **interactive Tableau dashboard** connected to **MS SQL Server**, integrating diverse data sources with **95% data accuracy**
- Conducted **risk assessment** and tracked **KPIs**, reducing "Bad Loans" by **20%** and improving portfolio performance

Automotive CLV Optimizer: R-Driven Regression Analysis Sep 23 – Dec 23

- Analyzed a dataset of **9,134 customer profiles** using **R Studio**, **Tableau**, and **SQL**, identifying key drivers of CLV with **linear regression modeling**
- Visualized key insights with **Tableau**, explaining **15.97%** of CLV variance, and provided actionable recommendations for **targeted marketing strategies**

Financial Operations Analysis Dashboard- BigQuery (GCP) & Looker Studio Jan 23 – May 23

- Modeled and analyzed large-scale credit and debit transaction datasets using **BigQuery**, identifying trends and key expense categories
- Designed an **interactive dashboard** in **Looker Studio** to deliver insights on cost optimization and business strategies, streamlining decision-making

Database Modernization & Optimization: SQL, NoSQL & Data Integration Aug 22 – Dec 22

- Enhanced database performance for a **3,000+ user base** by implementing a scalable **client-server architecture** using **Oracle SQL** and **MongoDB**
- Optimized **data retrieval speed** by **40%** through advanced query techniques, including **DQL queries** and efficient **JOIN operation**

EDUCATION

Master of Science in Business Analytics (Data Science), The University of Texas at Dallas May 24

Certificates: Machine Learning, Business Intelligence and Data Mining, Google Data Analytics, AWS Cloud & AI Practitioner

Bachelor of Technology in Aerospace Engineering, KIIT University Jun 22
