

DAMARAJU PRASANNA

DATA ANALYST

Location: IN, USA | Phone: + 1 (978) 848 7793 | Email: prasannadamaraju523@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 3 years of experience in Healthcare and Financial industries, specializing in data modeling, data warehousing, and predictive analytics. Expert in leveraging data to drive business decisions, with proficiency in Python, SQL, and advanced data visualization tools like Tableau and Power BI. Adept at managing data pipelines, performing statistical analyses, and creating actionable insights through dashboards and reports. Experienced in Agile and Waterfall methodologies with a solid understanding of the Software Development Life Cycle (SDLC). Strong communicator capable of translating complex data findings into clear and actionable recommendations for stakeholders.

SKILLS

- **Methodologies:** Agile (Scrum), Waterfall, SDLC
- **Programming Languages:** Python (Pandas, NumPy, SciPy, Scikit-learn), R (caret, ggplot2)
- **Libraries and Frameworks:** TensorFlow, Pandas, NumPy, Matplotlib, Scikit-learn, Seaborn, Plotly, dplyr
- **ETL Tools:** Talend, Informatica, SSIS, Alteryx
- **Data Visualization:** Tableau (Desktop, Server), Power BI (DAX), Advanced Excel (Pivot Tables, Charts)
- **Databases:** SQL (MySQL, PostgreSQL, SQL Server), Snowflake, MongoDB, Teradata
- **Cloud Technologies:** AWS (S3, Redshift, Quick Sight), Microsoft Azure
- **IDEs & Tools:** Visual Studio Code, Jupyter Notebook, GitHub
- **Other Skills:** Machine Learning Algorithms, Data Mining, Data Wrangling, Forecasting & Modelling, Apache Kafka, Airflow, Jira, Confluence
- **Operating Systems:** Windows, Linux

EDUCATION

Master of Science in Business Analytics

Trine University | July 2024

Bachelor of Information Technology

GVP College of Engineering | July 2021

EXPERIENCE

Data Analyst

JULY 2024 - Present

Syneos Health

- **Leveraged Python's Pandas** to extract, preprocess, and analyze data from Electronic Health Records (EHR) and Clinical Trial Databases, enhancing predictive accuracy by 25%. Pandas was chosen for its robust data manipulation capabilities, enabling efficient cleaning and transformation of large, complex datasets.
- **Employed advanced analytics** techniques, including statistical and machine learning models, to meticulously analyze clinical trial data. This resulted in a 25% improvement in the accuracy of insights related to patient demographics, treatment outcomes, and adverse events. These insights facilitated more informed clinical decision-making.
- **Developed and implemented data pipelines using Azure Data Factory (ADF)** to streamline data ingestion and transformation workflows, achieving a 50% reduction in processing time. Azure Data Factory was selected for its scalability and seamless integration with multiple data sources, enabling efficient and secure data movement across systems.
- **Reduced operational costs by \$250K** by optimizing resource allocation and using predictive forecasting models, ensuring efficient utilization of clinical resources.
- **Created interactive visualizations using Tableau**, leveraging advanced features like geo maps, Gantt charts, Pareto charts, and scatter plots. These visualizations provided multidimensional views, increasing informed decision-making by 15%. Tableau's versatility and user-friendly interface were instrumental in achieving these outcomes.
- **Developed 85% custom Microsoft Power BI dashboards and visualizations**, integrated with Microsoft SQL Server Reporting Services (SSRS), to deliver actionable insights tailored to stakeholder requirements. Power BI was chosen for its ability to integrate seamlessly with existing data environments and provide real-time analytics.
- **Worked on SQL Server Integration Services (SSIS) and Data Transformation Services (DTS) Packages**, managing data migration tasks. This involved transferring data from heterogeneous formats (e.g., text files) to SQL Server databases, ensuring data consistency and accessibility.
- **Optimized data transfer workflows using SSIS and DTS Packages**, reducing transfer time by 20%. Integrated heterogeneous databases into a centralized PostgreSQL repository, enabling faster data retrieval and improved reporting efficiency.
- **Reduced operational costs by 19%** by conducting comprehensive root cause analyses of production and performance issues, identifying inefficiencies, and implementing corrective actions.
- **Automated over 100 hours of recurring workflows** across departments using Python and scripting tools,

significantly enhancing operational efficiency and freeing up resources for higher-value tasks. **Improved data accuracy in clinical trials** by implementing rigorous data validation rules and checks, reducing errors in patient data by 18%. These measures ensured compliance with regulatory standards and enhanced the reliability of trial outcomes.

Data Analyst Mphasis, India

Jan 2020 – Jun 2022

- **Implemented Agile and Scrum methodologies** to streamline workflows in the Churn Prediction Financial Solution project. Used **Confluence** alongside **Jira** for enhanced documentation and collaboration, ensuring alignment across stakeholders.
- **Developed dashboards in SAS Visual Analytics**, focusing on interactive storytelling and actionable insights, which improved executive decision-making by 30%.
- **Enhanced data integration workflows** using **Alteryx**, reducing reporting latency by 25% while ensuring data integrity and auditability throughout the ETL process.
- **Applied machine learning techniques** such as decision trees and clustering to model customer churn patterns, enabling proactive customer retention strategies with a 20% increase in prediction accuracy.
- **Designed and deployed a centralized data catalog** using tools like **Collibra**, improving data discoverability and governance across departments by 40%.
- **Monitored web traffic and campaign performance** using **Mixpanel** and **Google Tag Manager**, resulting in a 15% improvement in conversion rates through targeted optimizations.
- **Created custom ETL solutions in Informatica**, ensuring seamless integration of data from APIs, flat files, and relational databases into cloud data warehouses, improving data availability for business analytics.
- **Enhanced BI capabilities by integrating Power BI and Python** through custom scripts, enabling advanced visualizations and predictive analytics not possible with native BI tools.
- **Conducted competitive financial analysis**, leveraging external market data and proprietary sources, leading to actionable recommendations that increased market share by 8%.
- **Implemented time-series forecasting models** using **R**, providing accurate sales and revenue projections that improved planning accuracy by 15%.
- **Established automated alerts and reporting systems** via **Zapier**, significantly reducing response times to critical operational issues.
- **Provided training sessions to cross-functional teams** on BI and analytics tools, improving self-service analytics adoption rates by 30%.

ACHIEVEMENTS

- **Streamlined cross-functional communication**, facilitating a 20% reduction in project delivery times.
- **Enhanced data accuracy**, leading to a 15% improvement in decision-making efficiency for key stakeholders.
- **Led a system migration initiative**, reducing downtime by 40% and improving overall system reliability.

PROJECTS

- **Churn Prediction Financial Solution:** Developed predictive models using Python, reducing churn rates by 12%.
- **Patient Flow Forecasting:** Built R models to optimize resource allocation, reducing scheduling conflicts by 20%.
- **KPI Dashboards:** Designed Power BI dashboards, improving decision-making efficiency by 25%.

CERTIFICATIONS

Business Analytics

- Business Analytics Certification (Excel)
- Covered Predictive, Prescriptive, Experimental, Descriptive, Exploratory, and Explanatory Analytics
- Capstone Project in Business Analytics

Data Visualization & Data Analysis

- Certification in Tableau
- Data Visualization and Data Analysis
- SQL for Databases
- Data Science with R

Software Development & Cybersecurity

- Certified in Software Development and Installation
- Certified in Forensics Cyber Security Tracking
