SUMMARY

Data-driven professional with 3+ years of experience in analytics and cloud platforms. Proven track record of delivering insights and automating data workflows using Python, SQL, and visualization tools like Power BI and Tableau. Strong foundation in machine learning, data engineering, and cross-functional collaboration.

EDUCATION

Illinois Institute of Technology, Chicago IL	January 2024 - Present
Master of Science in Information Technology and Management- Data Analytics GPA: 4.0/ 4.0	
Sri Krishna College of Engineering and Technology, Coimbatore India	August 2017 - May 2021
BE Computer Science Engineering GPA :3.8/ 4.0	

Technical SKILLS

- **Programming Languages:** Python, SQL, Java, R, C, JS
- **Data Analytics & Visualization:** Power BI, Tableau, Excel, Pandas, NumPy
- **Big Data & Distributed Computing:** Apache Spark, Hadoop, PySpark
- **Machine Learning:** TensorFlow, Scikit-learn, KNN, Naive Bayes, Logistic Regression, Random Forest, Neural Networks
- **Cloud & ETL Tools:** AWS, Azure, Snowflake, Databricks, Pentaho, Dremio
- **Web Development:** PHP, MySQL, JavaScript, HTML, CSS
- **DevOps Tools:** Docker, Git, GitHub

PROJECTS

Diabetes Prediction Using Machine Learning

- Developed a machine learning model to predict diabetes using BRFSS data, achieving 95% accuracy with Neural Networks.
- Preprocessed data through feature selection, outlier detection, and normalization, improving model performance by 15%.
- Evaluated models using KNN, Naive Bayes, Logistic Regression, and Random Forest, presenting performance metrics (accuracy, recall, F1-score) to stakeholders.

LinkedIn Proxy curl Data Lakehouse Project

- Designed and implemented a data Lakehouse architecture using Azure Data Lake Gen 2 and Dremio, enabling efficient storage and querying of LinkedIn profile data.
- Automated ETL pipelines, reducing data processing time by 25% and enabling real-time insights.
- Optimized advanced reporting using Power BI, creating interactive dashboards for stakeholders.

Calorie Deficiency Detection – Health Tracking Web App

- Built a Python Flask application that helps users monitor their daily calorie intake and output using Nutritionix and Exercise APIs.
- Integrated external APIs to fetch food and exercise data dynamically based on user input, ensuring accurate calorie tracking.
- Enabled personalized health insights by analyzing intake vs. burn metrics and visualizing results for better dietary decisions.

EXPERIENCE

Senior Analyst

HCL Technologies, Chennai India	August 2021- January 2024
• Managed SAP Basis and SAP Hana, including Oracle Database administration, system health checks, and kernel patch upgrades. • Implemented Transport Management System configurations and handled system refresh activities, reducing downtime by 15%. • Managed user access and certificate renewals, improving audit compliance by 100% and supporting secure SAP operations.	

Associate Software Engineer

Tech Mahindra, Chennai, India	June 2021- August 2021
• Developed and maintained backend services using Spring Boot, Java, and Hibernate, delivering scalable and efficient solutions for client projects. • Built clean and optimized code using Eclipse IDE, reducing debugging time by 25%. • Collaborated with cross-functional teams to deliver high-performing applications, meeting 100% of project deadlines	

CERTIFICATES

- Microsoft Azure Data Fundamentals (DP-900)
- Microsoft Azure Fundamentals (AZ-900)
- Python for Data Science (Coursera)

HONORS AND ACHIEVEMENTS

- Awarded **3 Silver Club Awards** for exceptional performance at HCL Technologies.
- Published "**Machine Learning Based Classification Models for Heart Disease Prediction**" at ICCCEBS 2021.

VOLUNTEER EXPERIENCE

- Analyzed large datasets to uncover trends and actionable insights, improving project outcomes.
- Created dashboards and visualizations using Tableau and Power BI for better decision-making.
- Assisted in cleaning and preprocessing data to ensure accuracy and consistency.
