Summary

I recently graduated with a master's in information systems and a Graduate certificate in business project management. With prior experience as a Software Engineer, I have developed a solid foundation in software development and problem-solving skills. My academic journey has further equipped me with knowledge in data analytics and project management principles. I am now seeking opportunities where I can apply my skills in software development, data analysis and project management. Passionate about leveraging technology to drive innovation, I am eager to contribute and collaborate with dynamic teams in solving real world challenges.

Education

2023 – 2024	Master Of Science
Memphis, Tn	The University Of Memphis Information Systems

2023 – 2024	Graduate Certificate
Memphis, Tn	The University Of Memphis Business Project Management

Skills

- Data Analysis
- Python Programming
- Project Management
- MS Office
- Wireless Communication

Experience

ASSOCIATE SOFTWARE ENGINEER | 06/2022 – 12/2022

DXC Technology – Noida, India

- Performed debugging and troubleshooting of existing software programs.
- Implemented code changes according to user requirements.
- Worked successfully with diverse groups of coworkers to accomplish goals and address issues related to our products and services.

MACHINE LEARNING INTERN | 2021

Institute of Electronics & Tele-Communication Engineers(IETC), India

- Built and tested machine learning models using Python.
- Cleaned and prepared data for analysis (feature engineering, normalization).
- Visualized results and shared insights with team members.

Certifications

- Microsoft Certification (MTA) in Python Programming
- Certified By NPTEL India in Internet Of Things(IOT)
- Machine Learning with Python by Coursera
- Programming Essentials in Python through Cisco Networking Academy

Projects

Sales Performance Analysis and Prediction System

- Developed a data analytics system that analyzes historical sales data to identify trends, generate insights, and predict future sales performance.
- The system provides detailed visualizations and reports for managers to make data-driven decisions about inventory, marketing, and sales strategies.
- This project helped me gain hands-on experience in data cleaning, exploration data analysis (EDA), and the application of machine learning algorithms for predictive analytics.

Real Time Wireless LED notice board using Arduino and GSM

- Designed and Developed a wireless LED notice board using Arduino and GSM technology that displays dynamic messages along with real-time date, time, and temperature.
- Designed for low power consumption and real-time updates for continuous communication.
- The system allows messages to be sent remotely via SMS, and it automatically updates the displayed information on LED board with the help of GSM module.
- Displays real-time date, time, and temperature using an RTC (Real-Time Clock) and DHT11 sensor.
- This project enhanced my knowledge of embedded systems, real-time data integration, and wireless communication.
