EDUCATION

Master of Science - Computer Science

Aug 2023 – May 2025

Illinois Institute of Technology
Chicago, IL
GPA: 3.00

Bachelor of Technology - Computer Engineering

Aug 2019 – May 2023

Vishwakarma Institute of Information Technology
Pune, India
GPA: 3.50

WORK EXPERIENCE

Data Analyst Intern

July 2023 – Aug 2023

Saint Louis University, St. Louis, Missouri

As a Data Analyst Intern at Saint Louis University, I conducted comprehensive data analysis projects, utilizing tools like Power BI and Tableau. I led campaign analysis, evaluating engagement metrics such as Clicks, Unique Clicks, and Unique Link Clicks from Facebook Ads. This involved tasks like data collection, analysis, and presentation of insights. Ultimately, I contributed to decision-making processes within the organization, including identifying and discontinuing the least engaging campaign based on our analysis.

Personal Projects

Complex Blogging Platform (Skills - React, Node.js, Appwrite)

Developed a full-featured blog with user authentication, CRUD operations, and real-time data synchronization using Appwrite as the backend server.

AI-Powered Meal Delivery App (Skills - React.js, Node.js, Python, REST API, Google Maps API)

Built a GrubHub/UberEats-style platform with ML-based route optimization and ETA prediction, integrating real-time traffic data and mapping services.

Nike Customer Service AI Agent (Skills - React.js, JavaScript, GPT-4o-Mini Vision, Text-Embedding-3-Small, OpenAI API) -

Created an AI-driven UI that recommends shoes by user prompt, detects product/package defects via vision, and checks order status using image-based intent recognition.

Personalized Recommendations Blog (Skills - React.js, Material UI, OpenAI Chat API, Open-Meteo/OpenWeatherMap, SerpAPI, Google Maps API) Implemented a "Recommended For You" popup that leverages geolocation, live weather, and AI-generated data to display local restaurants, concerts, and sports events on a map.

AI-Enhanced Subscription Blog (Skills - React.js, Material UI, Elasticsearch, OpenAI API, Real-Time Weather APIs) -

Developed topic subscribe/unsubscribe, OpenAI-generated reply toggles, and Elasticsearch-backed post storage/search, plus an AI-driven activity recommender based on current weather and location.

Role-Based Multi-Topic Blog (Skills - React.js, Material UI, Node.js/Express, REST API, Role-Based Auth)

Built a multi-topic blogging app with Student/Faculty/Staff/Moderator/Admin roles, enabling post/reply functionality, moderator deletions, and admin account controls.

Battleship Game App (Skills - Flutter, Dart, REST API) - Developed a cross-platform Battleship game with interactive UI, implementing game-state synchronization via a REST API backend.

Todo App (Skills - React.js, Redux Toolkit, JavaScript) - Implemented a task management application with state management via Redux Toolkit, featuring add/edit/delete tasks and persisting data to local storage.

Handwritten Digit Recognition (Skills - Python, Scikit-Learn, MNIST) - Trained and evaluated machine learning models (logistic regression and SVM) on the MNIST dataset to achieve >98% classification accuracy for handwritten digits.

Skills – Java, Python, React js, Node js, HTML, CSS, JavaScript, SQL, REST API, Tableau, Git, GitHub, Microsoft Excel
