SUMMARY

Insight-driven Data Analyst/Business Analyst with 5 years of hands-on experience analyzing enterprise data from SAP systems and external sources to support decision-making and process optimization. Proficient in SQL, Python, Power BI, Tableau, and SAP Analytics Cloud (SAC) with a solid foundation in business operations (Sales, Finance, and Supply Chain). Holds a master's degree in information technology and management from the University of Texas at Dallas (May 2025). Combines data storytelling, visualization, and technical expertise to transform complex datasets into actionable insights.

EDUCATION

Master of Science (MS) in Information Technology and Management, The University of Texas at Dallas Relevant Coursework: Data Visualization, Big Data Analytics, Statistical Methods, Agile Project Management	Aug 2023-June 2025 GPA - 3.7/4
Bachelor of Engineering in Computer Engineering, Mumbai University Relevant Coursework: OOPS Java, Web Development, SDLC, Database Management Systems	July 2014-June 2018 GPA - 7.28/10

CERTIFICATIONS

SAP Certified Development Associate – SAP Fiori Cloud Application Developer https://www.credly.com/badges/0d963d75-d06e-4d07-9786-d43e5aa27a66/public_url	April 2025-April 2026
SAP Certified Associate - Back-End-ABAP – SAP Cloud Analytics https://www.credly.com/badges/8d84ab0a-7936-494a-af3c-94292742fcfb/public_url	May 2025-May 2026

WORK EXPERIENCE

Data Analyst , ASE Consulting Pvt. Ltd.	Oct 2019-June 2023
- Extracted and analyzed enterprise data from SAP S/4HANA and external databases using SQL and Python, identifying key performance indicators for executive dashboards. - Configured Fiori launchpad, catalogs, tiles and PFCG roles for client Newaco Grupo which solved device availability issue by providing ready to use cloud-based solution resulting in improved efficiency by ~10%. - Conducted data-driven root cause analysis of process bottlenecks, identifying revenue leakages and accelerating order cycle time by ~18%. - Created Power BI dashboards visualizing sales performance, profitability trends, and operational efficiency, improving decision-making speed by 30%. - Developed and optimized ETL workflows to automate data loading and cleansing from SAP transactional tables (VBAK/VBAP, MARA/MARC, BSEG/BKPF). - Used Tableau to create interactive dashboards combining financial and inventory data, enabling predictive insights for supply chain performance by ~10%. - Automated data validation and transformation with Python (Pandas) and scheduled job, reducing manual reporting time by 40%. - Partnered with cross functional teams to translate business challenges into analytical use cases and actionable insights. - Implemented Row-Level Security (RLS) and parameterized What-If scenarios for pricing and demand, improving stakeholder self-service adoption by 3x. - Authored optimized SQL views with window functions (ROW_NUMBER, LAG/LEAD) for SLA tracking and backlog aging; improved query performance by 30%. - Created Tableau storyboards using Level-of-Detail expressions for regional profitability and cohort retention views used in quarterly reviews. - Established incremental refresh and dataflows; cut dataset refresh time from 90 min -> 25 min and stabilized refresh failures. - Built anomaly detection checks (z-score, IQR) to flag outliers in sales and inventory feeds; reduced data quality issues surfaced in reports by >50%. - Produced a living data dictionary and dashboard usage metrics; prioritized enhancements based on adoption and impact.	
Data and Business Reporting analyst , Shunam Consulting Pvt. Ltd.	Oct 2018-Sep 2019
- Designed and maintained analytical dashboards using SAP Analytics Cloud (SAC) to track purchasing patterns, inventory levels, and supplier performance. - Extracted and processed large datasets from SAP MM/SD modules using SQL queries; performed variance and trend analysis for cost optimization. - Developed Excel Power Query workflows to consolidate SAP and non-SAP data into unified reporting models. - Presented findings to leadership with actionable recommendations that improved procurement efficiency by 15%.	

PROJECTS

Big Data – Miles and Mileage Trend (Top 5 Risky Drivers)	Aug 2024-Dec 2024
- Processed and analyzed telematics datasets (10M+ rows) using PySpark to identify high-risk driving behaviors and mileage patterns. - Applied aggregation and filtering logic to uncover anomalies; used data visualization to communicate insights effectively. - Enhanced computation time by 35% via Spark optimizations (partitioning, caching).	
COVID-19 Data Analysis with SAP Cloud Analytics	Aug 2023-Dec 2023
- Utilized SAP Cloud Analytics to analyze COVID-19 data, applying predictive modeling to identify trends and forecast future outcomes. - Implemented data visualization techniques to present actionable insights for improved healthcare decision-making. - Enabled real time tracking and analysis of COVID-19 trends, assisting healthcare providers in resource allocation and planning. - Enhanced the understanding of pandemic data, contributing to more informed decision making and better public health responses.	

SKILLS

SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), Power BI, Tableau, SAP Analytics Cloud (SAC), Excel (PivotTables, Power Query), Git
