SKILLS

Cloud & Databases: Microsoft Azure (Azure SQL, Azure Data Studio)

Data Analysis: pandas, numpy, Tableau, Power BI, matplotlib, Excel, Jupyter Notebook

Languages: Python, SQL, Javascript

Other Tools / Programming: Django, React.js, Tailwind CSS, Bootstrap, Node.js, Vite

EDUCATION

Master of Science in Computer Science

University of Utah, **CGPA: 3.58/4**

(May 2026)

Bachelor of Engineering in Information Technology (Honours in AI & ML)

University of Mumbai, **CGPA: 3.34/4.0**

(Jul 2024)

PROJECTS

Stock Market Dashboard – Power BI, Yahoo Finance API & Azure SQL

- Designed and launched an interactive **Power BI** dashboard to visualize **real-time** stock data for 50+ tickers, including price, volume, dividends, and stock splits.
- Integrated **Azure SQL Database** via ODBC, **accelerating** data load time by **40%** and supporting queries on 500,000+ rows.
- Automated data ingestion, transformation, and validation using **Python** (**pandas**, **pyodbc**), boosting reporting **accuracy** by **30%**.
- Engineered **custom filters**, KPIs, and visualizations to drive user insights across symbols and time periods.

Netflix EDA Dashboard – Tableau, pandas, numpy

- Developed an interactive and filterable **Tableau** dashboard to explore Netflix trends by genre, rating, country, and content type (2000–2022).
- Cleaned and processed data using **pandas** and **numpy**, **reducing** nulls and inconsistencies by **85%**.
- Improved** dashboard usability by integrating filters and user-driven navigation to highlight trends over time.

Real-Time Patient Revisit Analytics – Power BI, Random Forest, Logistic Regression, Flask REST API

- Implemented an end-to-end **ML** solution predicting 30-day hospital readmissions (**82% accuracy**) using **Random Forest** and **Logistic Regression**.
- Performed **data preprocessing**, **feature engineering**, and model evaluation (**Accuracy**, **ROC–AUC**) via **Flask REST API**.
- Integrated with **Power BI** to create **real-time** dashboards showing readmission risk by **age**, **diagnosis**, and **length of stay**.

CERTIFICATIONS

Data Analyst Bootcamp – Udemy

Industry-focused training program covering the full **data analysis lifecycle** using **Python**, **pandas**, and **NumPy**.

Focused on practical skills such as:

- Data collection**, **cleaning**, **preprocessing**, and **exploratory data analysis (EDA)**
- Statistical analysis**, **feature engineering**, and working with **large datasets**
- Data visualization** using **pie**, **bar**, **histogram**, **scatter**, **regression**, and combo charts
- Real-world projects**, including a **capstone case study** on business data

EXPERIENCE

Full-Stack Development Intern, CodeClause

(May 2024)

- Developed and deployed a **task management app** using Django with full **CRUD** features, improving task efficiency by **30%**.
- Engineered a responsive calculator with **React.js**, enhancing load and interaction time by **25%**.

Machine Learning Intern, Corizo

(Mar 2024)

- Applied ML techniques such as classification and NLP to build functional prototypes and evaluate model performance.
- Delivered a summarization tool achieving **90% accuracy** for long-form text compression.

Web Development Intern, MSME & AICTE

(Nov 2023)

- Implemented a full-stack **E-commerce website** using Django (backend) and React.js (frontend).
- Designed responsive web pages using **HTML**, **CSS**, and **JavaScript** to enhance cross-device compatibility.
