

PRATHIBHA K
FULL STACK DEVELOPER

Phone: +1 (929)-955-6271 | **Email:** prathibhatech01@gmail.com | **Location:** Austin, TX | [LinkedIn](#)

Summary

- Versatile Full Stack Developer with 3+ years of experience building scalable, cloud-native web applications using modern frameworks including React, Angular, Node.js, Spring Boot, and MongoDB.
- Proven expertise in developing microservices-based architectures and engineering robust RESTful APIs, contributing to 30–40% gains in application performance, reliability, and maintainability.
- Adept at implementing CI/CD pipelines using Jenkins, GitHub Actions, and Docker to accelerate release cycles and reduce deployment overhead by up to 3x.
- Skilled in AWS-based deployment (EC2, Lambda, RDS, S3), with hands-on experience in full SDLC, Agile delivery, and collaborating with cross-functional teams to meet 100% of product goals.
- Strong foundation in both frontend and backend development, combining business logic, clean UI/UX, and real-time data integration to deliver end-to-end enterprise solutions.

Experience

Netflix, USA

Dec 2024 – Present

Full Stack Developer

- Developed and deployed scalable full-stack web applications using React, Node.js, and MongoDB, reducing page load times by 35% and enhancing user engagement.
- Collaborated with cross-functional Agile teams to design cloud-native microservices on AWS and Kubernetes, increasing deployment efficiency by 40% through automated CI/CD pipelines.
- Built reusable front-end components using React and TypeScript, streamlining UI development and cutting front-end bug resolution time by 25%.
- Engineered RESTful APIs and integrated with PostgreSQL and MongoDB databases to support complex business logic and real-time data retrieval for enterprise applications.
- Spearheaded end-to-end migration of legacy monolithic systems to a microservices architecture, improving maintainability and reducing system downtime by 30%.
- Partnered with global clients to translate business requirements into technical specifications, delivering high-impact solutions that met 100% of functional and performance benchmarks.
- Implemented robust CI/CD pipelines using Jenkins, Docker, and GitHub Actions, achieving 3x faster release cycles and enhancing deployment reliability.

HCL Tech, India

Sep 2022 – Jan 2024

Full Stack Developer

- Developed and maintained enterprise-grade web applications using Java, Spring Boot, and Angular, delivering 20% faster load times and enhanced user responsiveness.
- Participated in the full SDLC, from requirements gathering to deployment, across Agile sprints, ensuring on-time delivery of features with 98% defect-free releases.
- Designed and implemented RESTful APIs and backend services using Java and Hibernate, improving data processing efficiency by 35% for high-traffic modules.
- Integrated CI/CD pipelines using Jenkins, Git, and Docker, reducing deployment effort by 40% and enabling weekly production rollouts.
- Collaborated with cross-functional teams including QA, DevOps, and Product Owners to align development with business goals, resulting in a 25% improvement in team velocity.
- Conducted thorough code reviews and enforced coding standards, which led to a 30% drop in post-release bugs and improved maintainability across modules.
- Leveraged AWS cloud services for scalable application deployment, enhancing system uptime to 99.9% and supporting seamless performance during peak usage.

Wipro, India

Jan 2021 – Aug 2022

Software Developer Intern

- Participated in the end-to-end development of internal web applications using Java, Spring Boot, and MySQL, streamlining internal workflows and reducing manual processing time by 30%.
 - Built responsive UI components with HTML, CSS, and Angular, improving user experience and interface consistency across platforms.
 - Worked together with senior developers in Agile teams to deliver sprint-based features, achieving 95% sprint completion rate and meeting all functional requirements on time.
 - Contributed to the development and maintenance of RESTful APIs to support data-driven features in enterprise applications, ensuring seamless system integrations.
 - Wrote and executed unit and integration test cases using JUnit and Mockito, increasing code reliability and reducing post-deployment defects by 25%.
 - Contributed in structured training program, gaining hands-on experience in DevOps, Git, Jenkins, and CI/CD pipelines, enhancing development-to-deployment workflow.
 - Provided post-deployment support and bug fixes for client-facing modules, achieving a 98% resolution rate within SLA and improving customer satisfaction scores.
-

Skills

Languages & Scripting: JavaScript, TypeScript, Java, Python, HTML5, CSS3, SQL, C
Frameworks & Libraries: React.js, Angular, Node.js, Express.js, Spring Boot, Spring Security, Hibernate, JavaFX, JSP, Mongoose
Databases: MySQL, PostgreSQL, Oracle, MongoDB
ORM/ODM: Hibernate, Mongoose
Cloud Platforms: AWS (EC2, S3, Lambda, RDS), Azure, GCP
DevOps & CI/CD Tools: Docker, Jenkins, GitHub Actions, Maven, NPM
Version Control & IDEs: Git, GitHub, Eclipse, Visual Studio Code
Application Servers & Runtime Environments: Apache Tomcat, Docker
Design & Architecture: RESTful API Design, MVC Architecture, Microservices Architecture, Scalable Full Stack Web Applications
Testing & QA: JUnit, Mockito
Data Science & ML Tools: TensorFlow, PyTorch, Scikit-learn, QlikView
Visualization & Documentation: MS Visio, PowerPoint

Education

Master of Science, Computer Science New York Institute of Technology, New York, NY	<i>May 2025</i>
Bachelor of Technology, Computer Science and Engineering Rajiv Gandhi University of Knowledge Technologies Srikakulam, India	<i>Jun 2022</i>

Projects

Fake News Detection using Machine Learning | Python, NLP

- Developed a fake news detection model with 92% accuracy using NLP techniques and libraries like Scikit-learn, NLTK.
- Built a Flask web interface for real-time detection and performed model evaluation using cross-validation and confusion matrix analysis.

Task Manager App | React, Node.js, MongoDB

- Developed a task management app using React, Node.js, and MongoDB for real-time task tracking.
- Applied JWT-based user authentication for secure login and data management.

E-commerce Platform | Java, Spring Boot, MySQL

- Built a peer-to-peer file sharing platform using Java and TCP/IP on Unix, ensuring reliable and secure transfers.
- Applied an integrated payment gateway for secure transactions and smooth checkout.
