EXPERIENCE

Data Scientist | Atkins Realis | Denver, CO, USA

July 2025 – Present

- Developing an AI chatbot using a vector store to streamline knowledge access and enhance staff support at Florida DOT
- Building dashboard using Power BI to maintain and govern grants and their usage, automated with power automate

Data Engineer | Lincoln Electric | Cleveland, OH, USA

May 2024 – May 2025

- Building 25+ data pipelines in **Azure Data Factory** using spark, azure data bricks, and medallion architecture to transform and migrate data for **Power BI**, facilitating business intelligence and creating **SQL scripts** for ad-hoc requests.
- Extracting tables from **SAP** tables using OData connectors and SAP table connectors to the Azure Synapse environment building the **Data warehouse** environment and scheduling update pipelines in Azure Synapse Analytics.
- Improving major bottlenecks using spark distributed processing and incremental updates to decreasing run time by 75%.
- Transcribed Oracle **stored procedures** and scripts into SQL Server and migrated data flows from **Alteryx** to Azure.
- Developed a comprehensive dashboard for tracking log metrics in real-time; this initiative empowered teams with actionable insights by reducing troubleshooting time by 60% during critical operational periods.

Statistics Teaching Assistant | University of Colorado Boulder

April 2024 – May 2025

- Facilitated six graduate-level courses in data science, ensuring effective comprehension through guidance and support.
- Assisted students in mastering R programming and statistical methods through office hours, grading assignments

Machine Learning Engineer | Gil's Lab | Boulder, CO, USA

September 2023 – May 2024

- Leveraged advanced **computer vision** techniques to tune hyperparameters of **YOLOv8** for small **object detection**.
- Implemented a **bot-sort algorithm** for fish tracking, and established a streamlined pipeline with **93.87%** accuracy, showcasing proficiency in efficient optimization and enhanced insights within the domain of computer vision.

Software Engineer | Zee Entertainment Ltd | Bangalore, IND

January 2022 – July 2023

- Engineered **Java Spring Boot** framework to develop the new Juspay Payment page integration. Ensured seamless compatibility with the existing infrastructure and successfully transitioned **95%** of total payment traffic to the platform.
- Revamped **Apple payment** token verification process to in-house verification and reduced the API time by **90%**.
- Led integration efforts for Juspay Express Checkout, designing the API contracts, and optimizing the back-end **payment service**. Implemented strategic improvements that significantly increased transaction success rates, contributing to an annual revenue increase of **2.5 million dollars**.
- Architected a generic asynchronous **server-to-server notification** handling system, which can be easily adapted to any payment provider. This reduced the **cloud cost** and helped in tracking the 5 payment providers at ease.

Junior Developer Intern | Riskcovry | Bangalore, India

June 2021 – July 2021

- Built a discharge summary validator utilizing OCR with 93% accuracy to speed up the claims and reduce manual efforts.
- Integrated multiple third-party insurance provider APIs via JavaScript and created swagger documentation.

EDUCATION

Master of Science in Data Science

August 2023 – May 2025

University of Colorado Boulder, United States

CGPA: 4.0/4.0

Bachelor of Technology in Computer Science

August 2018 – June 2022

PES University, India

CGPA: 8.4/10

PROJECTS

Social Pulse – Social Media Analysis System | API, MongoDB, Airflow, NLP

- Designed and implemented a system for API information extraction with the help of airflow jobs, MongoDB storage, and advanced social presence analysis across YouTube, Reddit, Twitter(X), and Tumblr. Utilized Natural Language Processing and Topic Modeling for insightful company profile assessments.

Stream Forge - Real-time Data Streaming | Python, Airflow, Spark, Kafka, Databases, AWS

- Implemented a real-time data streaming pipeline using Apache Airflow to fetch the information from an API, pass it to Kafka stream, and store it in PostgreSQL, which is further transformed by spark and stored in Apache Cassandra.
- Developed a pipeline to extract data from an AWS S3 bucket into AWS Glue Data catalog using Glue Crawlers and created an ETL job to transform the data using Spark, Lambda, and stored in the Parquet format and analyzed using Athena.

TECHNICAL SKILLS

Programming/Scripting Languages: Python, Java, SQL, JavaScript, C++, React, Kotlin

Tools: MongoDB, NOSQL, MySQL, AWS, Google Cloud, Machine Learning, Docker, Kubernetes, GitHub, Apache Kafka, Snowflake, Redshift, Airflow, Databricks, Hadoop, Hive, Rest API, Big Query, GRPC, Redshift, Power BI

Coursework: Operating System, Database management, Data Structures and Algorithms, Computer Networks
