

EDUCATION

University of North Carolina at Charlotte Master of Science Computer Science Data Science 3.9 CGPA	Charlotte, NC 12/2024
V.R. Siddhartha Engineering College B.Tech Information Technology 8.08 CGPA	Vijayawada, India 05/2022

PROFESSIONAL EXPERIENCE

Data Analyst – VEN Solutions - Collected, cleaned, and analyzed large multi-source datasets using SQL and Python, ensuring 98% accuracy in reporting and analytics. - Built and maintained Power BI dashboards, improving data visibility and enabling faster decision-making across business units. - Applied statistical modeling and machine learning techniques in R and Python, uncovering trends that improved forecasting accuracy by 20%. - Collaborated with stakeholders to translate requirements into data models, delivering actionable insights that supported strategic initiatives. - Automated data pipelines and reporting workflows with SQL and Python scripts, reducing manual processing time by 30%. - Validated and standardized data quality practices, improving integrity and consistency of enterprise datasets across multiple departments. - Presented ad-hoc analysis and findings to senior leadership, driving cost optimization strategies and identifying new growth opportunities.	Irving, TX 02/2025 - Present
Teaching assistant - UNCC - Assisted 100+ students in Python programming, debugging code and strengthening foundations in Pandas, PySpark, and SQL queries. - Guided students in developing ETL workflows using Python, improving data preparation efficiency and ensuring accurate pipeline execution. - Delivered tutorials on data visualization with Power BI and Python libraries, enhancing analytical and reporting skills of 100+ students. - Mentored student projects involving data cleaning, transformation, and modeling, ensuring 95% accuracy in analysis and reporting outcomes. - Designed practice problems on algorithms, SQL queries, & data processing, strengthening problem-solving skills across diverse student groups. - Supported collaborative learning through coding sessions, helping students build Python-based solutions for real-world data challenges.	Charlotte, NC 01/2024 - 12/2024
Advanced Associate Software Engineer/ Analyst - Accenture - Developed SQL queries with joins & aggregations, optimizing data extraction and improving reporting accuracy for business-critical analysis. - Designed & maintained Power BI dashboards, enabling real-time KPI monitoring & supporting data-driven decision-making across departments. - Automated ETL workflows using Python and SQL, reducing manual processes by 25% and accelerating delivery of actionable insights. - Performed analysis on enterprise datasets, uncovering trends and anomalies that informed risk assessments and process improvements. - Cleaned, transformed, and validated structured datasets, achieving 98% data integrity and ensuring reliability of statistical reporting outputs. - Collaborated with cross-functional teams to refine reporting models and metrics, aligning analytical outputs with strategic business objectives.	Hyderabad, India 01/2021 - 07/2023

SKILLS

Programming & Scripting: Python, R, SQL, Pandas, PySpark, Bash (Data Processing, Debugging, Automation, and Backend Scripting)
Data Analysis & Processing: Data Cleaning, Transformation, Feature Engineering, Large Dataset Handling, ETL Workflows, Data Pipeline Development
Business Intelligence & Reporting: Power BI, SSRS, Excel (Pivot Tables, Macros), Interactive Dashboards, Self-Service Reporting, KPI Tracking
Big Data & Cloud Platforms: Databricks, Spark, Hadoop, AWS (S3, Glue, Athena), Azure, GCP (Foundational Data Engineering & Integration)
AI/ML Foundations: Scikit-Learn, Predictive Modeling, Data Preprocessing, Introductory Machine Learning Techniques, Model Evaluation & Validation
Visualization & Analytics: Power BI, Tableau, Jupyter Notebook, Matplotlib, Seaborn (Trend Analysis, Performance Metrics, Data-Driven Insights)
Collaboration & Workflow Tools: Git/GitHub, Jira, Agile Scrum, SDLC, Cross-Functional Collaboration, Requirement Gathering, Stakeholder Communication

CERTIFICATIONS

Python 3 Programming, MongoDB for Professionals, Microsoft Power BI, AWS Academy Data Engineering, Google GO, Google Data Analytics Professional, AI for everyone , Pega Certified System Architect (PCSA) , Pega Certified Senior System Architect (PCSSA)

PROJECTS

Title: University Sentiment Analysis using Twitter Data - Performed sentiment analysis on UIC tweets using Python (NLTK, NLP), extracting insights into public opinion and engagement patterns. - Built neural network with LSTM, CNN, GRU layers, achieving balanced performance across datasets and improving classification accuracy. - Fine-tuned sentiment model using Precision, Recall, F1 metrics, optimizing performance and boosting classification accuracy by 20%. - Used Oracle databases for storing and retrieving processed tweet data, enabling seamless integration with sentiment analysis pipeline. - Integrated machine learning with scalable databases, improving execution speed and enabling real-time analytics for decision-making. - Designed high-performance data workflows using Oracle, supporting efficient storage and fast access for large-scale sentiment classification.
Title: Automated Data Quality Validation Framework for Machine Learning Pipelines. - Developed automated data quality checks to identify duplicates, class imbalance, and labeling errors in ML training datasets. - Designed custom validation scripts using Python, NumPy, and Pandas, improving dataset consistency and readiness for model training. - Integrated data profiling workflows using AWS Glue and SQL, enabling real-time quality monitoring across large-scale data pipelines. - Boosted overall model performance and reliability by enhancing data quality, reducing training noise and errors by 30%. - Collaborated with ML teams to implement governance standards, standardizing dataset validation across multiple model development projects.

PUBLICATIONS

- Published paper titled "Software Defect Prediction based on Machine Learning and Deep Learning" at the 2022 International Conference on Inventive Computation Technologies (ICICT) in Nepal, organized by IEEE.
