PROFESSIONAL SUMMARY: Java Full Stack Developer | Microservices & Cloud

Results-driven **Java Full Stack & UI Developer** with 4+ years of experience in building intuitive, responsive, and accessible web applications. Adept in modern front-end technologies including **React, Angular, JavaScript, TypeScript, HTML5, and CSS3**, with a strong focus on user experience (UX) and **accessibility (WCAG 2.1)**. Skilled in designing reusable components, optimizing performance, and integrating responsive designs for cross-platform compatibility.

Proficient in UI testing frameworks (Selenium, Jasmine, Karma) and accessibility testing. Solid experience in developing secure RESTful APIs using **Spring Boot** and in integrating front-end with backend systems in a **microservices architecture**. Strong collaboration with designers and product teams to deliver seamless, scalable, and pixel-perfect UIs. Experienced in Agile environments and passionate about creating inclusive and performant web applications.

TECHNICAL SKILLS:

Java/J2EE Technologies	Servlets, JSP, JSTL, JDBC, JMS, JNDI, RMI, EJB, JFC, Swing, AWT, Applets, Multi-threading, Java Networking.
Programming Languages	Java 21/17/11/8, Unix Shell Scripting, PL/SQL, Python, C, C++, C#
Application/Web Servers	WebLogic 12c/10.3/9.1/8.1, IBM WebSphere 9.0/8.5/7.0, JBoss, Tomcat.
Frameworks	Struts 2.x/1.x, Spring 6.x/5.x/4.x, Spring Boot
IDEs	Eclipse, IntelliJ, STS, IBM WSAD, Dream viewer
ORM Frameworks	Hibernate 6.x/5.x/4.2, JSF 4.x/2.3/2.0, IBATIS
Web technologies	JavaScript, jQuery, AJAX, XML, XSLT, DHTML, CSS, HTML5, Bootstrap, Angular 14/16, React JS, Node JS
Web Services	JAX-WS, JAX-RPC, JAX-RS, REST, SOAP, WSDL
Methodologies	Agile, Scrum, TDD, Waterfall, RUP
Modeling Tools	UML, Rational Rose, Visio
Testing Tools/Technologies	JUnit, JMeter, Unit, Jasmine, Selenium, Karma, Jenkins, JIRA, Mockito, SCADA/CIP, Postman, Hoppscotch, Accessibility Testing, Selenium, Karma, Jasmine, JUnit, Postman
Database Servers	Oracle 12C,11g/10g, DB2, SQL Server, MySQL, MongoDB
Version Control	GIT, CVS, SVN
Build Tools	ANT, Maven, Gradle
Containerization Tools	Docker, Docker Swarm, Kubernetes, Jenkins
UI Technologies:	React.js, Angular 14/16, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Material UI, jQuery, Responsive Design (Mobile First), WCAG 2.1 (Accessibility Standards)

PROFESSIONAL EXPERIENCE:

Client: Cigna Health Care, New York.

March 2024 – Present

Role: Java Full Stack Developer

- Designed and developed responsive user interfaces using **Angular and React**, ensuring a seamless cross-platform user experience in highly secure financial and healthcare-related applications.
- Applied **modern front-end practices** (PWAs, accessibility standards like WCAG 2.1), enhancing usability for clients including those with disabilities.
- Built and maintained secure, scalable **RESTful APIs** and **microservices architecture** using **Java, Spring Boot, Spring MVC, and Spring Security**, aligned with enterprise and regulatory compliance standards (PCI-DSS, GDPR).
- Collaborated closely with product and UI/UX teams to convert business requirements into scalable backend solutions, supporting **BDD-based development workflows**.
- Implemented **secure authentication mechanisms** using OAuth2 and JWT for robust user identity and access control.
- Developed **back-end systems** for processing sensitive financial data, focusing on **low-latency and high-availability** through effective microservices and database optimization.
- **Experienced in Python for backend scripting, automation, microservices, and data processing workflows in enterprise applications.**
Skilled in SQL and NoSQL databases (MySQL, PostgreSQL, MongoDB, Oracle) and implementing CI/CD pipelines using Jenkins, Docker, and Kubernetes for automated deployments. Experienced in cloud platforms, including AWS (EC2, S3, Lambda, RDS), Azure, and Google Cloud.
Well-versed in Agile (Scrum & Kanban), Test-Driven Development (TDD), and Behavior-Driven Development (BDD). Strong knowledge of OAuth2, JWT, and SAML authentication for securing applications. Experienced in writing unit and integration tests using JUnit, Mockito, and Selenium to ensure software quality. Designed and maintained **real-time monitoring and alerting** systems using **Grafana, Prometheus, ELK Stack, and AWS/GCP CloudWatch**, enhancing incident response and uptime.
- Modeled system interactions and services using **UML diagrams** to support design documentation and peer reviews.

Client: Dell, Hyderabad

Feb 2022 – April 2023

Role: Java/J2EE Developer

- Involved in the full SDLC (analysis, design, development) using Java 8, Agile (SCRUM), and TDD, providing regular updates to business teams and managers.
- Developed dynamic, responsive UI pages using ReactJS and Angular with HTML5, CSS3, and Bootstrap.
- Built reusable components in ReactJS (JSX) and Angular modules to ensure consistency and maintainability.
- Applied Redux for state management and implemented client-side validation and form handling to enhance UX.
- Utilized advanced Java 8 features (Lambdas, Streams, Method references) for efficient and readable backend code.
- Developed multithreaded logic using Executor Service for improved application performance.

- Used core design patterns (MVC, Singleton, Business Delegate) to enhance modularity and scalability.
- Built RESTful APIs and microservices using Spring Boot, integrated with Hibernate ORM and secured with Spring Security & OAuth 2.0.
- Implemented real-time event streaming with Apache Kafka and used Docker & AWS (EC2, Lambda, CloudWatch) for deployment, monitoring, and scalability.
- Configured CI/CD pipelines using Jenkins and automated testing with Selenium and JUnit for high-quality releases.
- Integrated Swagger for API documentation and APIGEE Gateway for API management.
- Optimized database interactions using Hibernate HQL, Named Queries, and ensured efficient data retrieval.

Client: Advent Health, New Delhi

May 2020 – Feb 2022

Role: Java Developer

- Expertise in Spring Boot, Spring MVC, Hibernate, and RESTful APIs for building secure and scalable healthcare applications.
- Designed and implemented microservices-based solutions to enhance scalability in healthcare applications.
- Hands-on experience with AWS, Azure, Docker, Kubernetes, Jenkins, and CI/CD pipelines for deploying healthcare applications.
- Developed applications adhering to HIPAA, GDPR, and HITECH Act regulations for secure patient data management.
- Experience in integrating EHR APIs, third-party healthcare services, and telemedicine platforms.
- Proficient in Angular/React, JavaScript, TypeScript, HTML5, and CSS3 for building intuitive healthcare dashboards.
- Worked in Agile (Scrum/Kanban) teams, following TDD/BDD for high-quality software delivery in healthcare settings.
- Expertise in Java, Spring Boot, Hibernate, and RESTful APIs for backend and Angular/React, JavaScript, TypeScript, HTML5, and CSS3 for frontend development.
- Implemented AI-driven decision support systems and integrated telehealth solutions for remote patient monitoring.
- Experienced in Agile (Scrum/Kanban), TDD/BDD, and best coding practices for high-quality software delivery.
- Integrated OAuth 2.0, JWT, multi-factor authentication (MFA), and encryption mechanisms to protect patient data.
- Worked with PostgreSQL, MySQL, MongoDB, and Oracle, ensuring secure and efficient patient data storage.
- Spring Boot, JPA, RESTful APIs for secure data handling and complex healthcare data processing.
- Expertise in relational databases (MySQL, PostgreSQL) for storing and managing sensitive patient information.

Education:

Master's in **management information systems** from **Auburn University at Montgomery**

May 2023 - December 2024 GPA - 3.38/4.00
