Professional Summary

Data Scientist with solid experience in SQL, data visualization, and dashboard development using Tableau and Power BI. Demonstrated ability to optimize ETL pipelines, ensuring data accuracy and integrity. Focused on applying analytical skills and meticulous data cleaning techniques to support accurate, HIPAA-compliant healthcare reporting and decision-making.

Education

University of California, San Diego

Sep 2023 - Mar 2025

M.S., Data Science

- **GPA:** 4.0
- **Achievements:** Academic Excellence Award

University of California, Santa Barbara

Sep 2021 - Sep 2023

B.S., Statistics and Data Science

- **GPA:** 3.4
- **Achievements:** Dean's Honors List

Experience

Lawrence Livermore National Laboratory

Sep 2024 - Present

Data Scientist

Livermore, CA

- Migrated SQL workloads from PostgreSQL to DuckDB, enhancing query efficiency by 40% and ensuring the integrity of large-scale datasets for anomaly detection.
- Automated data workflows using SQL and Python, streamlining data extraction and contributing to the generation of actionable insights.
- Delivered analytical findings to engineers and product stakeholders, utilizing statistical analysis to guide anomaly mitigation strategies and inform data-driven decisions.

Lawrence Livermore National Laboratory

Jun 2024 - Sep 2024

Data Science Intern

Livermore, CA

- Designed an interactive dashboard with Bokeh and Panel, enabling real-time investigation of data irregularities and supporting timely decision-making.
- Developed anomaly detection algorithms that identified 50+ irregularities in 3TB of sensor data, highlighting proficiency in quantitative analysis and data validation.

Ascend Leadership

Jan 2024 - Apr 2024

Data Management Intern

Remote

- Automated ETL pipelines using SQL and Python, reducing manual data entry time by 20% and ensuring more consistent reporting
- Analyzed 500+ database entries and generated reports that improved categorization accuracy for leadership tracking
- Created Tableau dashboards to uncover demographic insights in corporate leadership, informing data-driven DEI strategies

AIByte

Oct 2023 - Dec 2023

Data Science Intern

Remote

- Developed a real-time sign language recognition system using TensorFlow, MediaPipe, and OpenCV, achieving 87% gesture classification accuracy
- Designed a Python-based interface for live inference, enabling accessible real-time demos for 500+ users

Amazon

Jun 2022 - Aug 2022

Area Manager Intern

Indianapolis, IN

- Analyzed performance and retention data for 150+ employees, uncovering trends that informed staffing decisions and improved workforce efficiency
- Developed AWS dashboards to track 5 KPIs, improving shift scheduling efficiency by 15% and reducing coverage gaps

Projects

AI Bedtime Storyteller | <https://ai-bedtime-storyteller-demo.vercel.app/>

Aug 2025

- Built an AI-powered bedtime story app using Next.js, React, and Tailwind CSS, generating personalized stories based on a child's name, age, and interests.
- Optimized user experience by designing intuitive data collection workflows, implementing real-time content generation, and ensuring safe, age-appropriate content through automated text evaluation.
- Applied NLP techniques and prompt engineering to deliver consistent, high-quality narrative outputs, while integrating scalable backend architecture for rapid content delivery.

DataSage – Interactive Data Visualization Platform | <https://datasageviz.netlify.app/>

Jul 2025

- Built a browser-based data visualization platform using HTML, CSS, JavaScript, and Chart.js to transform CSV files into interactive charts and correlation matrices
- Implemented smart data type detection, missing value analysis, and statistical summaries to streamline exploratory data analysis
- Designed a responsive, accessibility-friendly UI with dark mode, professional styling, and export capabilities for charts and datasets

Cold Email Generator | <https://github.com/PraveenManimaran/Cold-Email-Generator>

Jan 2025

- Built an AI-powered cold email generator for consultancy firms, leveraging Llama 3.1, ChromaDB, and LangChain to automate personalized outreach and enhance client engagement
- Applied advanced prompt engineering strategies, including few-shot examples and role-based framing, to generate highly targeted, natural-sounding emails based on client profiles

Skills

- **Data Analysis & Visualization:** Tableau, Microsoft PowerBI, Seaborn, Matplotlib, Panel, Bokeh, Statistical Analysis, Data Analysis
- **Machine Learning & AI:** TensorFlow, PyTorch, LangChain, Scikit-learn
- **Data Engineering & Cloud:** AWS (Bedrock, SageMaker, Lambda, S3), Docker, Git, Azure (Synapse Analytics, Data Factory)
- **Big Data & Databases:** SQL, PySpark, ChromaDB, Snowflake, PostgreSQL, MongoDB, DuckDB, Hadoop, Hive
- **Programming:** Python, R, C++, Java, SAS

Awards and Certifications

- AWS Certified AI Practitioner
- Microsoft Certified: Azure Data Fundamentals
