EXPERIENCE

Data Analyst & Market Research Specialist

Jan 2025 – Present

Savvy-Marketers LLC

Princeton, NJ

- Performed quantitative analysis on market and sales data to uncover trends, correlations, and pricing insights for strategic recommendations across multiple client categories.
- Conducted pricing and volumetric analysis to evaluate product performance across regions, identify revenue opportunities, and support competitive benchmarking efforts.
- Created client-facing reports with clear visual narratives and collaborated with teammates to develop data visualizations derived from market research.

Data Analyst Extern

Jan 2024 – May 2024

Rutgers MBS Externship Exchange / Collaborative Solutions LLC

Remote

- Analyzed risk factors at railroad grade crossings using Python and statistical methods to support the development of a predictive safety model for hazard mitigation.
- Applied data cleaning, exploratory analysis, and visualization techniques to process and interpret large transportation datasets from multiple sources and formats.
- Collaborated on weekly research update decks and presented project findings and model outputs to mentors and advisors during team review sessions.

Data Analytics Team Lead

Jan 2023 – May 2023

Rutgers MBS Externship Exchange / Collaborative Solutions LLC

Remote

- Led a 3-member team to analyze visual distractions at railroad crossings using exploratory data techniques.
- Developed data visualizations and research slides to communicate findings to project mentors.
- Managed meeting notes, coordinated timelines, and ensured project alignment with mentor and advisor expectations.

Data Analyst Intern

Jul 2019 – Aug 2019

Pharmcare USA

Edison, NJ

- Sorted and digitized paper medical records for accuracy and ease of access across various departments.
- Organized weekly prescription records in Excel to improve workflow for pharmacy staff.
- Assisted a 10-person team with office operations and identified areas to streamline documentation.

PROJECTS

Database Management & Analysis | *Excel, SQL*

- Analyzed changes in bee colony populations over 10 years by constructing a relational database using USDA data.
- Cleaned raw data, created tables, and queried the database using MySQL and Excel for insights.
- Discovered a 12% decrease in honeybee population from 2012–2017, correlating with a 35% rise in honey prices.

NBA Data Analysis | *Python, Excel, pandas, matplotlib, seaborn*

- Developed a Python program to analyze and visualize basketball statistics using custom classes and raw data.
- Applied data cleaning, transformation, and trend analysis using pandas and Excel for player and season insights.
- Built visualizations and generated text-based summaries to report individual player performance and league-wide trends.

TECHNICAL SKILLS

Languages: Python, SQL, R, Java, C++, HTML

Tools & Platforms: Excel, Tableau, Microsoft Office, MySQL

Skills: Data Analysis, Data Visualization, Statistical Modeling, Data Cleaning

EDUCATION

Rutgers University – School of Graduate Studies

May 2025

Master of Business and Science in Analytics: Discovery Informatics & Data Sciences

New Brunswick, NJ

Rutgers Business School

May 2023

Bachelor of Science in Business Analytics and Information Technology

New Brunswick, NJ
