

Preetam Varma Full Stack Developer

preetam@myworkmails.com | (940) - 977-4010 | USA | [LinkedIn](#)

Summary

Results-driven Full Stack Developer with 3 years of extensive experience in designing, developing, and maintaining scalable web applications using React.js and Java Spring Boot. Proficient in building secure, high-performance backend services, optimizing database systems, and implementing modern authentication protocols like OAuth2 and JWT. Skilled in cloud platforms including AWS and Azure, with strong expertise in CI/CD automation, unit testing, and Agile methodologies. Adept at collaborating with cross-functional teams to deliver efficient, user-centric solutions that enhance system reliability and performance.

Technical Skills

- **Frontend:** React.js, Redux, React Router, Hooks, Dynamic Form Validation, A/B Testing
- **Backend:** Java Spring Boot, Spring Batch, RESTful APIs, GraphQL, Spring Security (OAuth2), JWT Authentication
- **Databases:** AWS RDS PostgreSQL, Azure SQL, Indexing, Partitioning, Query Optimization, Encryption, IAM Policies
- **Cloud & DevOps:** AWS Elastic Beanstalk, EC2, CloudWatch, AWS CodePipeline, CodeBuild, Azure Kubernetes Service (AKS), Azure DevOps Pipelines
- **Testing:** JUnit, Mockito, Unit Testing (85-90% Code Coverage)
- **Methodologies:** Agile Scrum, Requirement Gathering, Cross-functional Collaboration

Professional Experience

- Full Stack Developer, Mizuho Financial Group**

05/2024 – Present | Remote, USA

 - Worked on the Loan Origination and Processing System, collaborating with product, QA, and business teams in Agile sprints. Gathered requirements to develop a full-stack loan application system automating eligibility checks, document uploads, credit scoring, and approval workflows, improving processing speed by 40%.
 - Directed frontend using React.js with features like dynamic form validation, file uploads, Redux state management, React Router, and A/B testing. Team up with UX and backend teams to enhance usability, resulting in a 30% increase in user satisfaction scores.
 - Designed and optimized AWS RDS PostgreSQL database with encryption and IAM-based security policies. Implemented indexing and query optimization techniques, improving data retrieval speed by 35% while ensuring compliance with data security standards.
 - Developed backend services using Spring Boot, applying RESTful APIs, asynchronous processing with Spring Batch, and integration with credit bureau APIs. Leveraged Spring Security for OAuth2-based authentication, achieving 50% faster loan approval processing.
 - Executed comprehensive unit testing using JUnit and Mockito, achieving 90% code coverage. Automated CI/CD pipelines with AWS CodePipeline and CodeBuild, reducing deployment time by 60% and enabling multiple daily releases.
 - Collaborated with DevOps engineers to deploy the application on AWS Elastic Beanstalk and EC2 instances. Enabled auto-scaling, monitoring with CloudWatch, and fault tolerance, resulting in 99.9% uptime and enhanced system reliability.
- Full Stack Developer, State Street**

01/2021 – 12/2022 | Hyderabad, India

 - Developed the Global Asset Management Platform Modernization by collaborating with cross-functional teams in Agile ceremonies and requirement gathering. Enabled State Street to provide real-time portfolio insights, risk analytics, and reporting for global asset management, improving data access by 40%.
 - Crafted frontend using React.js, rebuilding legacy UI for better responsiveness and UX. Implemented features like reusable components, state management with Redux, React Router, hooks, and A/B testing, enhancing user engagement by 30% and reducing load times by 25%.
 - Designed and optimized Azure SQL database schemas for efficient large-scale financial data handling. Implemented indexing, partitioning, and caching strategies that improved query performance by 35% and reduced data retrieval latency by 20%.
 - Developed backend microservices using Java Spring Boot, aggregating data from multiple financial sources. Created RESTful APIs and GraphQL endpoints for seamless data manipulation, boosting system throughput by 45% and API response times by 40%.
 - Implemented inclusive security measures including OAuth2, JWT-based authentication, and role-based access controls. Collaborated closely with security and compliance teams to ensure data privacy and regulatory adherence, reducing vulnerabilities by 50%.
 - Conducted rigorous unit testing using JUnit and Mockito, achieving 85% code coverage. Integrated Azure DevOps pipelines for CI/CD automation, reducing deployment time by 60% and increasing release frequency by 35%.
 - Collaborated with DevOps to deploy the platform on Azure Kubernetes Service (AKS), ensuring high availability and scalability. Automated monitoring and alerting improved system uptime by 99.9%, enhancing operational reliability and client satisfaction.

Education

- University of North Texas, Denton, Texas, USA**

Master of Science in Information Systems and Technologies

01/2023 – 12/2024
- Gandhi Institute of Technology and Management (GITAM), Hyderabad, India**

Bachelor of Technology in Computer Science

06/2018 – 04/2022
