Dayton, OH | +1 (937)-542-0902 | preethireddvboosi@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 3+ years of experience in healthcare, insurance, and financial analytics, delivering insights through advanced SQL, Python and SAS. Skilled in building ETL pipelines (SSIS, Power Query, Python) and designing interactive dashboards in Power BI, Tableau, and SSRS to track claims, policy, and provider performance. Proven success in reducing claim turnaround times by 30%, improving data refresh reliability by 25%, and enabling executives to identify \$1M+ in cost leakages annually. Experienced across cloud platforms (Azure, AWS, GCP) with expertise in data modeling, regulatory compliance dashboards, and standardized reporting processes. Microsoft Certified: Power BI Data Analyst Associate (PL-300).

WORK EXPERIENCE

Novatore, Delaware, USA

April 2025 – Present

Data Analyst

- Assisted in writing SQL queries (SQL Server, MySQL, Oracle BI) to extract and validate data for reporting and analysis.
- Supported development of ETL pipelines using SSIS and Power Query, ensuring smooth data integration across systems.
- Assisted in building predictive models for trend forecasting under supervision, applying basic machine learning techniques.
- Conduct trend analysis, forecasting, and variance analysis using Excel's statistical and financial functions.
- Created and maintained Power BI and Tableau dashboards to visualize KPIs such as sales, claims, and operational performance.
- Developed basic Python scripts for data cleaning, preprocessing, and automating recurring reporting tasks.
- Designed and deployed Power BI and Tableau dashboards tracking claim status, policy enrolments, and resolution KPIs, cutting claim turnaround times by 30%.

IBM INDIA PVT LTD, Hyderabad, India

Dec 2022 – Feb 2024

Data Analyst

- Designed and deployed Power BI and Tableau dashboards tracking claim status, policy enrolments, and resolution KPIs, cutting claim turnaround times by 30%.
- Automated claims reporting pipelines with SQL Server, SSIS, and Python, improving data refresh reliability by 25%.
- Built regulatory compliance dashboards and SSRS reports, ensuring error-free submissions to healthcare auditors.
- Developed advanced DAX measures and SQL queries to identify anomalies in claim workflows, reducing fraud detection cycle time by 40%.
- Partnered with healthcare operations teams to align KPIs, authored data dictionaries, and standardized reporting logic across departments.
- Led UAT sessions, documenting issues and implementing fixes that boosted dashboard usability scores by 20%.
- Conducted root-cause analysis of data mismatches across claims, enrolment, and provider systems, cutting error tickets by 35%.
- Tracked report changes, issues, and fixes in Jira, ensuring 100% audit traceability for compliance.

TATA ELXSI PVT LTD, Bengaluru, India

Feb 2022 – Nov 2022

Data Analyst

- Built SAS and SQL Server queries to calculate patient utilization, claims cost, and provider performance KPIs, reducing Excel based reporting effort by 40%.
- Designed real-time Tableau dashboards integrated with SQL + SSIS pipelines, giving executives daily visibility into claims and care delivery metrics.
- Modelled 10M+ rows of claims data, implementing Python-based ETL processes that improved refresh accuracy by 15%.
- Designed drill-through views in dashboards to allow executives to track cost overruns and bottlenecks within minutes.
- Authored and maintained healthcare data dictionaries, streamlining new analyst onboarding by 30%.
- Conducted quarterly dashboard performance reviews, improving refresh speed and visualization consistency across 12+ reports.
- Documented ad-hoc reporting needs and system changes in Jira, ensuring traceable reporting processes.
- Collaborated with healthcare clients to gather requirements and translated them into reporting specs, reducing turnaround time for new dashboards by 25%.

CyberNest Solutions, Bengaluru, India

Jan 2021 – Dec 2021

Data Analyst

- Prepared ad-hoc reports and summaries in SSRS, reducing manual Excel-based effort.
- Collaborated with senior analysts to document business requirements and translated them into reporting specifications.
- Conducted data validation and reconciliation checks to improve reporting accuracy.
- Logged tasks, issues, and fixes in Jira for proper version control and traceability.
- Participated in team reviews and UAT sessions, providing feedback to improve dashboard usability and performance.

SKILLS

- Databases & Data Warehousing:** SQL Server, MySQL, Oracle BI, PostgreSQL, Snowflake, Google BigQuery, Amazon Redshift, Data Modeling, Query Optimization
- Programming & Analytics:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SAS, Data Cleaning, Data Wrangling, Predictive Analytics, API Integration, MS EXCEL
- Visualization & BI Tools:** Power BI (DAX, Power Query, Row-Level Security, PL-300 Certified), Tableau (LOD Expressions, Prep Builder, advanced calculations), SSRS, Looker, Google Data Studio, KPI Dashboards, Data Storytelling, Drill-through & Drill-down Reporting
- ETL & Data Integration:** SSIS, Power Query, Azure Data Factory, Python ETL Pipelines, Workflow Orchestration (Airflow, Prefect), Alteryx
- Cloud Platforms:** Microsoft Azure (Synapse, Data Factory, Power BI Service), AWS (S3, Redshift, RDS, QuickSight), Google Cloud Platform (BigQuery, Looker, Data Studio), Databricks, Snowflake Cloud Analytics
- Collaboration, Documentation & Compliance:** Jira (issue tracking, sprint planning, UAT support), Agile/Scrum Methodologies, Confluence
- Certification:** Microsoft Certified – Power BI Data Analyst Associate (PL-300)

EDUCATION

Master of Science in Computer Science, Wright State University | Dayton, Ohio

2025

Coursework: Machine Learning, Algorithm Design & Analysis & Distributed Computing

Bachelor of Technology in Electrical & Electronics Engineering, JNTU, Hyderabad, India

2021

Coursework: C, Java, Database Management System, Statistics, Mathematics
