EXPERIENCE

01/2023 to 05/2023 **Technical Software Support Engineer**

Echo It Solutions — Dallas, TX

- Respond to 25–30 calls per day in a busy setting without sacrificing outstanding customer service.
- Address any software, networking, synchronization, and update problems.
- Identified and eliminated software bugs in collaboration with the development team.
- Resolved escalating customer service issues received from several departments.
- Calls and complaints that are meticulously documented and stored in the CRM database.
- Working knowledge of Windows, MacOS, spreadsheets, and the Microsoft Office suite.
- I am in charge of opening and closing tickets in Zendesk for software support inquiries received through phone calls, chats, and emails.

06/2019 to 12/2021 **Network Support Engineer**

IBM India Private Limited — Bangalore, Karnataka

- Provided technical support to end-users, resolving network-related issues promptly.
- Ensuring minimal downtime for critical business operations.
- Conducted network performance analyses, identifying and rectifying connectivity problems, and optimizing bandwidth utilization.
- Assisted in the planning and execution of disaster recovery.
- Business continuity strategies, ensuring network resilience during

unexpected events.

- Configured and managed network monitoring tools, generating regular reports for network performance and presenting recommendations for improvements.
- Secured network access by installing firewalls, establishing login credentials and maintaining documentation.
