

Preethi Reddy Maram

Data Analyst

Email: preethireddymaram99@gmail.com | Phone: +1 (603) 512-5504 | Location: Irving, TX | [LinkedIn](#)

SUMMARY

- **Data Analyst** with over **4 years** of experience delivering actionable insights using **Python** and **SQL** across finance, healthcare, technology services, and infrastructure domains.
- Proficient in orchestrating end-to-end **ETL processes**, **automating data ETL pipelines**, and **monitoring KPIs** to optimize **operational workflows** and **supply chain performance**.
- Knowledgeable in **data mining**, **reporting**, **A/B testing**, and **data warehousing**, with hands-on expertise in cloud platforms such as **AWS (S3, EC2, Redshift, IAM, Glue)** and **Azure (Data Factory, Databricks)**.
- Strong command in libraries and frameworks, including **NumPy**, **Pandas**, **PySpark**, **Django**, and **TensorFlow**, enabling **data analysis** and expertise with databases like **MySQL**, **Oracle**, **MongoDB**, **NoSQL**, and **PostgreSQL**, along with **ETL processes**, integrating **CRM tools** and **data governance** frameworks to support procurement.

TECHNICAL SKILLS

- **Programming & Data Analysis:** Python, SQL, Pandas, NumPy, SciPy, PySpark
- **ETL & Data Engineering:** Apache NiFi, Informatica, SSIS, SQLAlchemy, Airflow
- **Data Visualization & BI:** Tableau, Power BI, Microsoft Excel, Dashboard development, KPI Tracking
- **Databases & Data Management:** MySQL, PostgreSQL, Oracle, MongoDB, NoSQL; data governance best practices
- **Cloud Platforms & DevOps:** AWS (S3, EC2, Redshift, IAM, Glue), Azure (Data Factory, Databricks), Docker, Git, GitHub
- **Project Methodologies & Communication:** Agile/Scrum & Waterfall, Cross-functional Collaboration, CRM Integration, A/B Testing, Procurement Analytics and supply chain analytics

PROFESSIONAL EXPERIENCE

McKinsey & Company | Dec 2024 - Current

Data Analyst | NH, USA

- Engineered **35+ Python scripts** and **SQL queries** to automate financial reporting and claims validation, and reconciliation workflows, improving processing speed and accuracy.
- Constructed data ingestion pipelines via Apache NiFi and SQLAlchemy, consolidating disparate transactional and healthcare claims data across 5+ multi-platform systems; reduced data silos by 40%.
- Built and sustained **interactive dashboards** using **Tableau** and **Excel** to visualize **\$1.2M+** in regional spend, treatment costs, and risk metrics.
- Engineered data workflows within **Azure Data Factory**, consolidating disparate financial datasets into **Databricks**, accelerating monthly reporting cycles by 4 days and improving regulatory compliance.
- Devised and deployed **Power BI** reports for leadership to monitor loan approval cycles, operational cost trends, and **KPI** anomalies.
- Mapped unstructured financial notes from **MongoDB** into **Databricks** using **Apache Spark**, enabling advanced analytics, identifying vendor inefficiencies, and reducing cost leakage by 11%, according to leadership.
- Centralized **MySQL** reporting tables into a streamlined data warehouse, improving data accessibility for analysts by 40% and accelerating report generation by 33%.
- Piloted **data governance** structure that included schema validations, field definitions, and user access controls, ensuring compliance with regulatory requirements and zero audit findings.
- Standardized CI/CD workflows through containerization of ETL solutions with Docker, coupled with Git version control, ensuring consistent deployments and drastically reducing rollbacks by 20%.
- Configured Apache Airflow retry and failure-handling workflows, reducing pipeline failure rate by 22% through scripted **alerting and recovery mechanisms**.
- Co-ordinated compliance and security teams in AWS infrastructure (S3, Redshift, IAM) for **secure storage**, **data pipelines**, and **access control** compliance.

WIPRO TECHNOLOGIES | Nov 2020 - Dec 2022

Project Engineer / Data Analyst | India

- Accelerated recurring healthcare claims and utilization reports using **Python**, **Pandas**, and **NumPy**, reducing manual reporting time by **60%**.
- Formulated ETL pipelines utilizing Informatica and SSIS to automate the ingestion of 500,000+ patient records, cutting data loading time by 40% across EMR systems.
- Planned and maintained 12+ Power BI and Excel dashboards to monitor patient admissions, discharge metrics, clinical

performance, clinical KPIs, and cost trends for hospital leadership.

- Optimized complex SQL queries within PostgreSQL and Oracle, consolidating patient diagnosis codes, treatment timelines, and procedure costs, which improved reporting speeds by 65% and reduced query run time.
- Launched a personalized patient outreach program by integrating Twilio with existing CRM infrastructure, resulting in a 30% increase in patient engagement with preventative care services.
- Conducted A/B testing on patient reminder strategies to reduce no-shows and improve care plan adherence by 15%.
- Implemented conceptualized **SQLAlchemy** to connect **Python** applications with **MySQL** databases for storing insurance claims and referral data.
- Queried **MongoDB** to extract unstructured physician notes and timestamped EHR logs for care outcome analysis.
- Managed **Git workflows** and **CI pipelines** in **GitHub** to version-control ETL code and automate release workflows for healthcare data projects.

Trigent Software | Oct 2019 – Nov 2020

Data Analyst | India

- Performed data cleaning, data transformation and validation using **Python**, **Pandas**, and **NumPy** on asset management and infrastructure cost data, reducing processing time by **40%**.
- Analyzed procurement metrics and visualized outcomes using **Excel**, **Power BI**, and automated **VBA scripts**.
- Monitored **KPIs** in **Tableau** dashboards, covering asset utilization, downtime trends, and operational cost overviews.
- Conducted exploratory **data analysis (EDA)** and created summary reports to identify trends in equipment downtime, cargo throughput, and fuel consumption.
- Queried **MySQL** and **PostgreSQL** databases to merge logistics and project datasets for reporting, supporting over **20+** monthly reports.
- Wrote reusable **SQL scripts** for extracting budget-related metrics, billing accuracy, and delivery cost benchmarks, saving **\$10K+/year** in audit hours.
- Coordinated with internal users through **Agile sprints** to define procurement KPIs and deploy custom reports.
- Managed source control and versioning with **Git**, ensuring stable delivery of dashboards and back-end scripts.

EDUCATION

SOUTHERN NEW HAMPSHIRE UNIVERSITY

Master of Science in Information Technology

Jan 2023 – Aug 2024

Hooksett, NH

SRI VENKATESHWARA COLLEGE OF ENGINEERING

Bachelor of Technology Electronics and Communication Engineering

Jul 2016 – Mar 2020

Tirupati, India

PROJECTS

Product Recommendation System – E-Commerce Platform

- Built a Python-based collaborative filtering system analyzing 100K+ user records, boosting recommendation accuracy and increasing CTR by 18%.

Point-of-Sale Data Pipeline Automation – Retail Chain

- Automated FTP-based data ingestion and ETL pipelines (Python, SQL) across 30+ stores, reducing manual effort by 70% and enabling weekly executive insights.

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera
