

Preethi Chanda

Quality Assurance Engineer

Detroit, MI, Email: preethireddy2217@gmail.com, Contact: 734-733-4797

Professional Summary:

Quality Assurance Engineer with 4 years and 8 months of experience in manual and automation testing across Web, Mobile, POS, API, and backend applications. Proficient in Selenium, Cypress, Playwright, Appium, and API testing using Postman and REST Assured. Strong background in Agile testing, CI/CD pipelines, and cloud-based quality validation on AWS. Recognized for improving release quality, optimizing test cycles, and ensuring system reliability and compliance. Eager to transition into manufacturing and product-quality domains, applying my expertise in root cause analysis (RCA), CAPA, documentation control, and audit readiness. Skilled in process improvement and quality metrics, with a growing knowledge of ISO9001 standards, FMEA, and risk-based quality management systems. Committed to continuous learning and operational excellence in both software and manufacturing environments.

Technical Skills:

Languages/Automation:

Java,

C#, Python, JavaScript,

TypeScript, SQL, Selenium WebDriver, Cypress, Appium,

Playwright, Cucumber/Gherkin, TestNG, JUnit,

Robot Framework

API/Performance:

Postman, RESTful APIs,

REST Assured, SoapUI, SOAP, JMeter

CI/CD & DevOps:

Jenkins, Azure DevOps, Git, GitHub Actions

Cloud/Web:

AWS (Lambda, Glue, CloudFormation)

Event Bridge, SQS/SNS

), HTML5, CSS3, XPath, XML

Test Management:

JIRA, TestRail, Rally, Confluence,

Zephyr

Testing Types:

Manual, Regression, Functional, Integration, UAT, Mobile (iOS/Android), POS

Security, Compatibility

Greenfield automation buildou

t.

Methodologies:

Agile (Scrum, SAFe, Kanban), SDLC, STLC

PROFESSIONAL EXPERIENCE:

Software Test Engineer

Charles Schwab, Troy, MI Feb 2025 – Present

Performed end-to-end manual and automation testing across POS, Online, Mobile, and Web Service applications.

Designed test plans, strategies, and traceability matrices ensuring complete requirement coverage.

Automated regression and functional tests using Selenium (Java/C#), Cypress, Playwright, and Appium (TypeScript).

Implemented BDD automation with Cucumber/Gherkin to align QA and business teams.

Integrated automation with Azure DevOps pipelines for continuous testing and release validation.

Conducted API testing (SOAP & REST) using Postman and SOAP UI, validating schemas and integrations.

Executed performance/load testing using JMeter to identify bottlenecks and ensure scalability.

Used AWS services (Lambda, Glue

,

EventBridge, SQS/SNS

) for test data validation and workflow automation.

Extended automation frameworks and contributed to greenfield automation buildout, embedding scalable quality gates across microservices.

Coordinated UAT cycles, managed Zephyr test execution, and supported sprint planning/release sign-offs

.

Applied AI-assisted test case design and defect triage, reducing cycle time and improving coverage.

Produced release readiness reports, coordinated deployments, and validated payment transaction workflows.

Mentored junior testers in automation best practices, defect analysis, and CI/CD integration.

Explored Kafka-like pub/sub queues for event-driven testing and message broker validation.

€

Performed multi-platform testing covering iOS, Android, Windows, and Mac applications to ensure end-to-end compatibility across environments.

Logged all test execution results with screenshot and video evidence in JIRA and Zephyr for traceability and compliance.

€

Participated in customer-lens validation sessions, focusing on the “customer before the customer” testing approach to improve usability.

Prepared cycle-exit summary reports outlining test coverage, pass/fail percentage, and PDCA improvement recommendations.

Collaborated on root cause analysis (RCA) for test execution variances and supported recovery planning to meet sprint timelines.

Environment: Selenium, Cypress, Playwright, Appium, Postman, SOAP UI, JIRA, Zephyr, Azure DevOps, JMeter, AWS (Lambda, Glue, EventBridge, SQS/SNS), Git, SQL, Figma, Miro

Quality Assurance Tester

Visa Inc, Austin, TX Sep 2024 – Dec 2024

Executed manual functional, regression, and load testing for in-house Mobile and Web applications.

Designed and executed test cases and traceability matrices, ensuring compliance with Visa standards.

Enhanced automation suites with Selenium, Cypress, and supported BDD adoption using Cucumber/Gherkin.

Performed REST API and Web Service testing with Postman and SOAP UI, validating request/response integrity.

Used SQL queries for backend data validation, ETL checks, and business logic verification.

Conducted load/performance testing with Gatling to validate transaction processing at scale.

Managed the defect lifecycle in MTM and TFS, collaborating with developers for quick resolutions.

Supported UAT execution and production sign-offs, ensuring eQRM/eQA compliance.

Automated regression suites for CI/CD pipelines, improving delivery speed.

Applied AI-assisted regression analysis to identify coverage gaps and generate exploratory test ideas.

Participated in Agile ceremonies, contributing to sprint planning, backlog grooming, and release readiness.

Environment: Selenium, Cypress, Postman, SOAP UI, SQL, Gatling, Cucumber/Gherkin, MTM, TFS, Rally, JIRA

Quality Assurance Engineer

Grasp Technologies Pvt Ltd, Pune, India Feb 2020 – July 2023

Designed and executed test strategies and plans for multiple Web and Mobile applications.

Performed manual testing (functional, regression, GUI, integration, and browser/device compatibility).

Automated regression suites using Selenium WebDriver (Java), Cypress, and Appium.

Maintained automation builds and scheduling through Jenkins and Maven for continuous execution.

Conducted API/Web Service testing using Postman, SOAP UI, and C3 for PEGA app data mocking.

Validated backend data with SQL queries, ETL checks, and SLA monitoring.

Performed performance/load testing using JMeter for high-volume scenarios.

Collaborated in Agile teams, participated in sprint ceremonies, and contributed to backlog grooming.

Conducted UAT cycles and prepared test summary reports for stakeholders.

Executed cross-browser and cross-device testing to ensure compatibility across platforms.

Supported onboarding of new QA team members, guiding them on test environment setup and best practices.

Environment: Selenium, Cypress, Appium, Postman, SOAP UI, JMeter, Jenkins, Maven, Rally, Confluence, SQL

EDUCATION:

M.S. in Computer Science, Southern Arkansas University, Magnolia, AR — 2024

B. Tech in Computer Science, Narsimha Reddy Engineering College, Hyderabad, India — 2021
