

# Preeti Sonke

## DATA ANALYST

Location: Chicago, IL | Phone: (773) 842 3903 | Email: [sonke.p73@gmail.com](mailto:sonke.p73@gmail.com) | [LinkedIn](#)

### SUMMARY

Data Analyst with 3+ years of experience delivering insights and solutions across diverse industries. Proficient in Python, SQL, and Power BI for data preprocessing, feature engineering, and statistical modeling. Built ETL pipelines using Azure Data Factory and Data Lake to process multi-million record datasets. Applied machine learning in scikit-learn and Azure ML Studio for trend analysis and classification. Built KPI and metric dashboards in Power BI, Tableau, and Excel. Adept in HIPAA compliance, data governance, API integration, and Agile workflows.

### PROFESSIONAL EXPERIENCE

#### Data Scientist / Data Analyst | Blue Cross Blue Shield | Chicago, IL

Jun 2025 – Present

- Improved member retention by 12% by building churn prediction models using **Python (Pandas, NumPy, Scikit-learn)** on Medicare and Medicaid claims data, optimizing outreach for high-risk populations.
- Reduced reporting time by 40% by developing **Power BI** and **Tableau** dashboards with real-time **KPIs**, claims, and enrollment trends across 80+ provider networks.
- Streamlined **ETL workflows** with **Azure Data Factory**, **Data Lake**, and **SQL**, integrating multi-source Medicare/Medicaid datasets and applying **logical data modeling** to boost pipeline efficiency by 30%.
- Ensured **HIPAA compliance** by implementing **PHI masking**, RBAC controls, and secure data handling practices, supporting 5+ audits with zero violations, automated report generation via **Jupyter Notebooks** and **cron jobs**.

#### Data Analytics Engineer | Ernst and Young (EY) | Pune, India

Nov 2021 – Jul 2023

- Architected ETL workflows in **Azure Data Factory** and **Data Lake**, automating ingestion of over **2.5 million records weekly** to streamline access for analytics and reporting teams.
- Crafted 12+ interactive **Power BI dashboards** using **DAX**, slicers, and drilldowns, connecting **Azure SQL** and **Data Lake** to track KPIs, support **strategic reporting**, reduce costs by 20%, and improve resource planning by 30%.
- Built predictive churn models in **Azure ML Studio** using **Python, Pandas**, and **Scikit-learn** for 70K+ users, deploying **Random Forest, ARIMA**, and **logistic regression** with grid search and cross-validation to boost conversions by 15%.
- Refactored 40+ **Azure SQL** queries with better joins and indexing, cutting dashboard load time from 15 to under 5 minutes.
- Unified internal and third-party data sources via **API integration**, enabling self-service reporting and eliminating **40 hours/month** of manual data handling.
- Implemented **RBAC** and data masking in **Azure**, securing access for **120+ roles** and ensuring financial compliance.
- Deployed SQL validation with **Azure Monitor**, detecting **300+ anomalies** monthly and improving **data integrity** and uptime.
- Documented schema logic, transformation flows, and lineage in **Azure Purview**, expediting onboarding for **4+ analysts** and supporting audit prep across **6 major projects**.

#### Data Analyst | KPMG | India

Jun 2020 – Oct 2021

- Interpreted financial data from 10+ internal systems using **Python** and **SQL**, applying cleaning and transformation logic to standardize reporting across business units.
- Streamlined **ETL workflows** in **Excel Power Query** for 6 financial platforms by automating tasks and **integrating VBA scripts** with lookup logic to handle data mismatches, cutting manual processing by 12 hours weekly across audit teams.
- Formulated **Oracle SQL queries** by redesigning subqueries, joins, and indexing strategies, improving data retrieval from 8 to under 3 minutes and supporting large-scale multi-year audit analysis.
- Built **Power BI** and **QlikView** dashboards, delivering insights to 5 departments and accelerating monthly decision-making cycles.
- Conducted **risk modeling in R** across **20+ portfolios** using statistical techniques and audited KPIs with advanced **Excel macros**, producing 18 error-free reports that enhanced audit accuracy and regulatory compliance.
- Integrated data into **Azure Blob Storage** using secure pipelines and structured schemas, boosting audit readiness over 5 fiscal cycles.

### TECHNICAL SKILLS

|                                      |                                                                                    |
|--------------------------------------|------------------------------------------------------------------------------------|
| <b>Programming &amp; ML</b>          | Python (Pandas, NumPy, Scikit-learn), SQL, R, Azure ML Studio                      |
| <b>Data Wrangling &amp; Analysis</b> | Data Cleaning, EDA, Feature Engineering, Statistical Analysis                      |
| <b>Databases &amp; Warehousing</b>   | MySQL, PostgreSQL, Oracle, Snowflake, MongoDB, Azure Data Lake                     |
| <b>ETL &amp; Data Engineering</b>    | AWS Glue, Apache Airflow, Databricks, Data Modeling, ETL Pipelines                 |
| <b>Visualization &amp; Reporting</b> | Power BI (DAX, slicers), Tableau, QlikView, Excel (Pivot Tables, VLOOKUP, Macros)  |
| <b>Cloud Platforms</b>               | Microsoft Azure (ADF, Data Lake, Synapse), AWS (S3, Lambda, Redshift, RDS)         |
| <b>DevOps &amp; Utilities</b>        | Git, Docker, Jupyter Notebook, VS Code, Cron Jobs                                  |
| <b>Big Data &amp; APIs</b>           | Public/Private API Integration, Real-time Data Feeds, Azure Monitor, Azure Purview |
| <b>Methodologies</b>                 | Agile, Waterfall, Data Governance, RBAC, Data Security & Compliance                |

### EDUCATION

#### MS in Information Technology Management - Specialization in Data Analytics

Aug 2023 - May 2025

Illinois Institute of Technology

#### Bachelor of Engineering in Electronic and Telecommunication Engineering

Aug 2017 - July 2021

Savitribai Phule Pune University

### PROJECTS

**LinkedIn Data Mart – IIT:** Orchestrated an ETL workflow to load 15,000+ LinkedIn profiles into **SQL databases** and delivered insights via Power BI, driving decisions for 3 strategic initiatives.

**Uber and Lyft Fare Prediction – IIT:** Developed fare prediction models using **Random Forest** in **Python**, analysing 20,000+ rides to evaluate time and weather impact, achieving RMSEs of 2.10 (Uber) and 1.44 (Lyft).
