EDUCATION

University of South Florida, Tampa, Aug 2023 - May 2025
Master of Science in Computer Science, GPA: 3.59

New Horizon College of Engineering, India, Aug 2017 - Aug 2021
Bachelor of Engineering, CGPA: 9.23

TECHNICAL SKILLS

Languages:	Java, JavaScript, TypeScript, HTML, Python, C, C++.
Web Framework:	React.JS, Node.JS, Redux, HTML, CSS, Material UI, Bootstrap, Spring Boot, REST API, FASTAPI and understanding of Kubernetes, CI/CD.
Database:	MongoDB, MySQL, Firebase, AWS.
Tools & Practices:	Agile, NPM, VS code, Git, GitHub, Jira, Jenkins, Docker, Postman, Confluence, Figma.

EXPERIENCE

Lowe's Companies, Inc. Aug 2021 - Jun 2023
Associate Software Engineer

- Designed and built a **performance testing platform** with interactive and responsive user interfaces using **React.JS, CSS,** improving customer engagement and reducing load times by 40%.
- Developed and integrated **RESTful APIs** using **Spring Boot (Java)** and **MongoDB**, efficiently processing 1M+ daily transactions; maintained unit tests for UI and endpoints using Postman.
- **Containerized** Java applications using **Docker** and deployed them on Kubernetes (GCP), while streamlining builds, tests, and deployments through **Jenkins-based CI/CD** pipelines for scalable, automated delivery.
- Created technical documentation using **Confluence** for internal use and feature onboarding.
- **Spearheaded** root cause analysis of **100+ issues** and **collaborated in Agile sprints** to deliver high-impact features, improving system reliability by 25% and accelerating release cycles by 20%.

Amahop Technologies Pvt Ltd Jan 2021 - Jul 2021
Developer Intern

- Successfully implemented a **robust data exchange system**, optimizing **client-side data processing** efficiency by 30% through the integration of multiple **API** calling techniques using **Java**, improving response times by 25% and enhancing scalability.

Hindustan Aeronautics Limited Jul 2020 - Dec 2020
Student Internship

- Built a lightweight internal application for HAL's fighter jet interface to **display part-level schematics** and specifications.
- Developed a dynamic frontend for selecting aircraft components and **integrated it with a Java-based backend** that served detailed part metadata via **RESTful APIs.**

PROJECTS

Emotion Analytics [GitHub **]**

- **Built** a full-stack web application using **Python and React** to perform real-time sentiment analysis with **VADER**, accurately classifying user input into **Positive, Negative, or Neutral**, handling **100+ inputs/sec** with **95% classification accuracy**.
- **Constructed** a modular backend for sentiment classification and integrated it with a responsive **React frontend** via **RESTful APIs**, improving user interaction speed by **40%** through dynamic routing and robust error handling.

Image Steganography [GitHub **]**

- Engineered a steganography tool using the **LSB algorithm in Python** to securely embed sensitive data within images, achieving **100% imperceptibility** in 50+ test images while preserving image fidelity.
- Enhanced data confidentiality for sectors like **healthcare, finance, and legal**, demonstrating a **70% reduction in detectable data leakage** under simulated attack scenarios.

LEADERSHIP

- **Lowe's**: Led a team of 5 in code reviews, bug fixes, and mentoring new engineers for smooth integration.
