Professional Summary

Data-driven analyst with 4+ years of experience delivering actionable insights in public, corporate and non-profit environments. Holds a Master's in Data Science with expertise in Power BI, SQL, Python, and statistical modeling. Skilled in sourcing, cleaning and analyzing large datasets from RMS and CRM systems to improve compliance, enforcement, and operational efficiency. Proven track record in automating manual reporting processes, reducing effort by up to 90%, and building dashboards that directly inform leadership decision-making and resource deployment. Adept at collaborating across government teams, senior analysts, and law enforcement officers to improve data accessibility, accuracy, and impact.

Education

The University of Memphis

Masters in Data Science

Jan 2023 – Dec 2024

Memphis, TN

Motilal Nehru National Institute of Technology

Bachelors in Electronics and Communications

Aug 2015 – May 2019

UP, India

Experience

Department of Motor Vehicles

Jun 2025 – Present

Data Analyst

Richmond, VA

- Coordinated with supervisors and department points of contact to secure non-centralized datasets for analysis.
- Pre-processed and analyzed Caliber RMS, and other departments data to identify anomalies and predictive trends in enforcement operations.
- Automated recurring compliance reports in Power BI, reducing manual reporting time by 2 hours per day and increasing overall efficiency.
- Designed and deployed an Auto Theft Dashboard tracking stolen/recovered vehicles, including heat maps for targeted enforcement, reducing manual reporting effort by 90% while improving decision-making on resource deployment.
- Developed predictive models to identify high-priority areas for enforcement action, supporting smarter allocation of personnel and fleet resources.
- Collaborated with senior analysts, supervisors, and LE officers to interpret data, improve reporting accuracy, and enhance operational performance.
- Restructured the Fleet Management module in Caliber RMS, streamlining asset tracking and improving data reliability across enforcement units.
- Developed and implemented the Evidence Management module, defining system workflows, user responsibilities, and permissions for evidence custodians and officers, ensuring compliance and operational integrity.

Kena Solution

Oct 2024 – May 2025

Data Analyst at Asha's Refuge

Memphis, TN

- Led a data migration project, moving client and program data from unstructured Google Forms into Salesforce to establish a centralized, structured database.
- Engineered a comprehensive data pipeline, extracting and standardizing thousands of daily appointment records from five separate departmental Google Calendars. This project, which served legal, medical, translators, case workers and administrative teams, reduced manual data analysis by 3 hours per day.
- Designed and executed an efficient ETL process that ensured a seamless transition with zero operational downtime, significantly improving data reliability and accessibility for the organization.
- Developed automated reporting dashboards in Power BI and Salesforce, improving data retrieval efficiency by 60%.
- Conducted data validation and KPI analysis to identify key trends in operational hours and appointment volumes, providing the data necessary for strategic decision-making on resource allocation and program delivery.
- Contributed to a 15% increase in fundraising and secured continued sponsorship by presenting data-driven reports that demonstrated the effective use of funds and the organization's impact on refugee support.

Sparkynode Analytics

Aug 2019 – Nov 2022

Jr Data Analyst

Bangalore

- Conducted SQL-based data extraction and analysis, optimizing database queries for faster reporting.
- Designed interactive dashboards to present insights on sales trends, store performance, and customer segmentation.
- Devised data-driven strategies to optimize store operations, resulting in a 5% boost in overall sales efficiency.
- Automated recurring sales reports using advanced Excel functions (Pivot Tables, VLOOKUP, Power Query, and Macros), reducing manual effort by 30% and minimizing the risk of reporting errors.
- Collaborated with the marketing team to evaluate customer segmentation, driving a 7% increase in conversion rates for the footwear brand.

Projects

Analyzing Law Enforcement Traffic Stops in Tennessee. | *Python, Pandas, Seaborn, Google Colab* Nov 2023

- Performed comprehensive analysis of traffic stops on the Tennessee dataset which consists of 3.2 million data points accumulated over a decade from the Stanford University open policing project using Python.
- Conducted exploratory data analysis (EDA) to identify trends, patterns, and anomalies in demographic data, including age, gender, and race distributions.
- Developed comprehensive visualizations to highlight racial and gender disparities in stop outcomes and temporal patterns, to showcase the data accurately
- Created data visualizations (heatmaps, scatter plots, time series) to communicate disparities and hotspot regions to stakeholders.

IPL Player Performance Analysis & Clustering | *Python, Pandas, Scikit-Learn* Dec 2024

- Processed and cleaned 225,000+ IPL match records, applying feature engineering to extract key player statistics such as strike rate, average, and boundary frequency.
- Applied K-Means and DBSCAN clustering to categorize players into performance tiers, using Silhouette Score and Elbow Method to determine optimal cluster numbers.
- Built player ranking frameworks based on historical data trends to assist coaches and analysts in player evaluation.
- Created visual dashboards with performance clusters and key KPIs using Matplotlib and Seaborn, aiding in player scouting simulations.

Technical Skills

Languages: Python(Numpy, Pandas, Scikit-Learn), R, SQL

Data Visualization/Data Reporting Tools: Power BI, Seaborn, Matplotlib, Google Workspace, Excel, ArcGIS Pro, Salesforce

Database & CRM: Caliber RMS, OnBase, Salesforce, SQL Server, ETL Processes

Algorithms: Data/Text Mining, Machine Learning, Pattern Recognition, Regression(Linear, Logistic), Clustering, Classification, Statistical Modeling.

License and Certifications

- Google Data Analytics Professional Certificate
- Power BI Essential Training and DAX Modelling by LinkedIn
- Salesforce for Admins and Essential Salesforce training by LinkedIn
- ArcGIS Pro certifications from ESRI
