EDUCATION

Bachelor of Computer Science

August 2021 - May 2025

Minor in *Video Game Studies* and *Comparative World Literature*

San Francisco State University | GPA: 3.89/4.00 (Dean's List, Summa Cum Laude)

San Francisco, CA

- **Relevant Coursework:** Software Engineering, Web Development, Intro to Database Systems, Operating Systems, Algorithm Analysis, Programming Paradigms and Languages, Embedded Linux Systems and Physical Computing

SKILLS & INTERESTS

- **Languages:** Java, Python, JavaScript, TypeScript, C, C++, C#, SQL, HTML, CSS, Ruby, Lua
- **Frameworks & Tools:** Express.js, Render, MySQL, PostgreSQL, Git, GitHub, Microsoft Azure DevOps
- **Concepts:** OOP, REST APIs, MVC, Agile Development, Full-Stack Architecture, Debugging, Secure Coding
- **Environments:** Linux, Ubuntu, Visual Studio, IntelliJ, VS Code
- **Soft Skills:** Cross-Functional Collaboration, Creative Problem-Solving, Adaptability, Conflict Navigation
- **Interests:** Video Games, Video Game Development, Dungeons and Dragons

PROJECTS

Capstone E-commerce Website (Swift Thrift) | [Writeup Link](#) | [Repo Link](#)

January 2025 – May 2025

San Francisco State University – *MySQL, Express.js, Alpine.js, HTTP, OVHCloud*

- Led backend development for a student-focused e-commerce site as part of a 5-person team.
- Designed and implemented the database schema, session handling, and image upload features.
- Applied input validation and secure session regeneration to improve user data protection.
- Integrated frontend/backend logic and enforced clean code standards.

Subscription-based Streaming Service Database | [Repo Link](#)

January 2025 – May 2025

San Francisco State University – *MySQL, Python*

- Built a fully functional subscription-based streaming service database from an ER diagram.
- Contributed to schema design, authored stored functions and scheduled events, and tested with sample data to ensure performance.

Semester Long Video Game Project (Petrichor) | [Showcase Link](#) | [Repo Link](#)

February 2024 – December 2024

Game Development Club at San Francisco State University – *Unreal Engine, C++*

- Managed a cross-functional team of 12, set development milestones, and assigned tasks based on individual strengths.
- Developed gameplay logic using C++ and applied design patterns (Singleton, Observer) for clean architecture.
- Presented the game at two showcases, explaining technical details and demonstrating gameplay.

Low Level File System Project | [Writeup Link](#) | [Repo Link](#)

November 2024 – December 2024

San Francisco State University – *Linux, C*

- Spearheaded the design and development of a simulated file system with a team of four.
- Built and implemented the File Allocation Table and Path Parsing features, laying the groundwork for key file operations.
- Stepped in to cover missing features and ensured the team delivered a functional system by the final milestone.

STUDENT LEADERSHIP

Game Development Club Treasurer | San Francisco State University

February 2025 – May 2025

- Managed budgets and financial planning for club events.
- Handled reimbursements and collaborated with officers to ensure smooth execution of club activities.
