EDUCATION

Indiana University, Bloomington — Master of Science in Data Science

August 2023 – May 2025

GPA: 3.70/4.00

MIT World Peace University, Pune — Bachelor of Engineering in Computer Science

July 2018 – May 2022

GPA: 9.31/10.00

EXPERIENCE

Indiana University Bloomington | Data Analyst

May 2024 - May 2025

- Supervised and evaluated data across all seven IU campuses, maintaining data integrity for institution-wide decisions.
- Collaborated with CRM platforms, such as Salesforce and JIRA, to monitor student engagement, process data requests, and work with cross-functional teams to enhance communication strategies.
- Created visual reports that summarized vital metrics, supporting decision-making for over 35 departments.
- Measured and analyzed performance indicators like open rates, conversion rates, and unsubscribe rates to refine marketing approaches, leading to a 5% increase in conversion rates.
- Managed the data lifecycle across 35+ departments, ensuring that the data remained reliable and accessible for strategic planning.

Indiana University Bloomington | NLP Data Engineer | Bloomington, Indiana

May 2024 – August 2024

- Extracted "Item 1a Risk Factors" from 10-K filings using the SEC EDGAR API, enabling deeper financial risk analysis.
- Engineered a Spark Session with PySpark for parallel text processing, reducing data processing time by 70% when handling large 10-K datasets.
- Developed a comprehensive preprocessing pipeline with SparkNLP and calculated uncertainty scores for financial documents using an unsupervised learning method, improving risk assessments over CFIUS reviews.

UST | Big Data & Cloud Associate Engineer | Pune, India

May 2022 – August 2023

- Designed and optimized data pipeline architecture in Azure, resulting in a 20% improvement in processing efficiency.
- Streamlined data ingestion workflows on Databricks using PySpark, managing complex data formats like JSON, ORC, and Parquet, which accelerated data pipeline execution.
- Collaborated with cross-functional teams to develop solutions for real-time data processing, implementing best practices for managing large-scale data workflows, and optimizing cloud infrastructure on Azure and Databricks.
- Implemented automated monitoring and alerting systems using Azure Monitor and Databricks to track pipeline performance and ensure data quality, proactively identifying issues and reducing downtime by 15%.

Techhut | Full Stack Intern | Pune, India

November 2021 – February 2022

- Enhanced the CryptFolio website's performance by refactoring 10 class-based components to functional ones, reducing page load times by 25%.
- Developed a real-time cryptocurrency data table using the MERN stack, integrating API calls to fetch current values.

TECHNICAL SKILLS & CERTIFICATIONS

Languages/Database: Python, Pyspark, SQL (PL/SQL, SparkSQL), MongoDB, Java

Cloud & Big Data: AWS, Azure, Hadoop, Databricks, Airflow

Libraries & Frameworks: Keras, Deep learning, TensorFlow

Software & Tools: SSIS, PowerBI, Salesforce, Tableau, Kaggle, Excel (Pivot Tables, VLOOKUP, Data Validation), Git

CRM & Project Management Tools: Salesforce, JIRA, Confluence

Certifications: DP-203 (Azure Data Engineer Associate), DP-900 (Azure Data Fundamentals), AZ-900 (Azure Fundamentals)

PROJECTS

Road Accident Analysis | PowerBI

- Developed a dynamic Road Accident Analysis dashboard in Power BI to identify critical accident patterns and contribute to a targeted 5% decrease in accident rates.
- Incorporated weather conditions and road surface information to explore accident frequency across different weather scenarios such as clear, rainy, snowy, and foggy conditions.
- Investigated accident trends by vehicle type, road type, lighting conditions, and urban/rural classifications, offering actionable insights for improving traffic policies and road safety initiatives.

NLP-Based Analysis of Public Comments on Export Regulations | NLP, Python

- Constructed a full NLP pipeline to analyze 232 public comments from Regulations.gov, performing sentiment analysis and entity classification using Hugging Face transformers and SerpAPI.
- Mapped commenter organizations to NAICS codes and classified them into sectors (Government, Private, Academia), identifying significant trends in regulatory feedback.
- Visualized sentiment distribution and authored an extensive report to present data-driven policy insights.
