EDUCATION

Arizona State University

Masters of Science in Information Technology

Tempe, AZ

Aug 2022 - May 2024

University of Mumbai

Bachelors of Engineering in Information Technology

Mumbai, India

Aug 2016 - Oct 2020

TECHNICAL SKILLS

Data Analysis & Visualization: Python (Pandas, NumPy, Sci-Kit Learn, Matplotlib, Seaborn), SQL, Tableau, Power BI, Excel

Databases & Warehousing: MySQL, PostgreSQL, MS SQL Server, Couchbase, Data Modeling, Stored Procedures

Cloud & Big Data: AWS (EC2, S3, RDS), Apache Spark, Jupyter Notebook

Programming Languages: SQL, Python, Java, JavaScript, HTML5, CSS3

Technologies: Git, NoSQL, Visual Studio, AGILE, Deep learning, JIRA, Salesforce, SharePoint, MS Office Suite

EXPERIENCE

Data Analyst

Juniper Networks

Jul 2024 – Present

United States

- Automated data extraction and processing using Python, reducing data preparation time by 50% across marketing and sales teams.
- Developed and deployed 15+ interactive Tableau dashboards that consolidated KPIs, improving stakeholder decision making speed by 40%.
- Conducted user behavior analysis through A/B testing, which led to a 15% increase in customer engagement rates.
- Maintained clean, validated datasets by applying rigorous data quality checks, achieving less than 0.5% error rates in production.

Data Analyst

TRIGENT Software

Nov 2020 – Jul 2022

India

- Engineered cloud-native data workflows on AWS to manage over 50TB of structured/unstructured data with 99.9% availability.
- Created Spark-based automation scripts that improved ETL job performance by 40%, supporting data ingestion across multiple domains.
- Designed data warehouse models to store and analyze user metrics, reducing report generation time by 30%.
- Led requirement gathering sessions with business units, translating analytics needs into 10+ BI solutions using Tableau and Power BI.
- Standardized internal documentation using Git and Jupyter, enhancing code reusability and cross-team collaboration.

PROJECTS

Sentiment Analysis on Real-Time Twitter Data, NLP Course, ASU

[View on Github](#)

Sep-Nov 2022

- Built an **LSTM model** to analyze tweet sentiment using real-time data via **Tweepy API**; achieving **80% accuracy**.
- Preprocessed data using **Natural Language Toolkit(NLTK)** and visualized classification outcomes with **Seaborn**.

Volkswagen Sales Analytics Dashboard, DV Course, ASU

[View on Github](#)

Sep-Nov 2023

- Led a team of 3 in developing **4 interactive Tableau dashboards** to track eCommerce KPIs, featuring dynamic filters and trend forecasting.
- Pre-processed datasets using **Pandas** and integrated **advanced calculated fields** for executive insights.

CERTIFICATIONS

- Salesforce Certified Administrator** — Issued May 2021
- IBM Machine Learning Essentials** — Issued Jul 2018
