

PRITHVI RAJ

+1 (510)-377-0768 — mv.prithvi@gmail.com — [Portfolio](#) — [in/prithvirey](#)

EDUCATION

University of California Santa Cruz

Master of Science in Human Computer Interaction (HCI)

Santa Clara, CA

Sep 2024 – Dec 2025

PES University

Bachelor of Technology in Computer Science Engineering

Bangalore, IN

Aug 2018 – May 2022

EXPERIENCE

Acceldata

Product Management Intern

Campbell, CA

Aug 2025 – Present

- Informed product innovation by synthesizing market analysis of 15+ competitors and 600+ user reviews with internal goals to create a unified, data-driven foundation.
- Defined 3 pivotal product opportunities from this HCI research, realigning the engineering backlog & shaping ADOC's roadmap.

Nvidia

Product Management Capstone

Santa Clara, CA

Apr 2025 – Present

- Spearheaded product definition for a novel enterprise AI assistant by conducting qualitative studies with 9 cross-functional stakeholders; synthesized 150+ data points to reframe the core user problem from 'information overload' to a 'quest for mental clarity', projecting a 40% reduction in cognitive task-switching.
- Authored a forward-looking product vision and a CHI-format research paper to establish a new paradigm for human-agent collaboration, defining 5 core design principles for a proactive, context-aware AI teammate.
- Drove technical requirements for a complex AI system, specifying a Model Context Protocol (MCP) data pipeline and a 'Unified Attention Layer' UI, and defined KPIs focused on improving decision confidence for Nvidia leaders.

Software AG

Software Engineer II, R&D

Bangalore, IN

Sep 2021 – May 2024

- Architected and delivered an enterprise AI chatbot using GPT-4 and an internal knowledge graph, serving 10,000+ employees and slashing average query resolution time by 50%.
- Orchestrated a full website redesign, implementing a new UX/UI that boosted user engagement by 70% and cut the bounce rate by 30% through optimized site navigation and information architecture.
- Engineered custom CI/CD pipelines that automated workflows, achieving an 80% operational efficiency gain while significantly cutting infrastructure costs and manual overhead.
- Earned recognition as *TechInterrupt Winner* (2022, 2023) and *Knockout Hackathon Winner* (2023), winning 4 company-wide innovation awards across consecutive quarters Q3 2023, Q1 2023, Q4 2022, Q3 2022 for driving innovation and going above & beyond, including a presentation at the BSPIN conference on applied AI product development.
- Partnered with the global presales team to enhance Cumulocity IoT dashboards, delivering a 30% performance boost in loading times and graph usability for key enterprise clients.
- Promoted from Intern to Software Engineer II in under one year after securing a PPO; played a key role in the webmethods.io R&D division prior to its strategic acquisition by IBM.

Nextleap

Associate Product Manager Fellowship

Bangalore, IN

Jun 2021 – Aug 2021

- Selected as a top-performing fellow in a competitive cohort of 100+, evaluated by product leaders from top tech companies for exceptional product sense and execution.
- Led user research to diagnose the 'paradox of choice' in food ordering; designed a streamlined UX/UI with novel features projected to lift key conversion metrics and enhance user decision-making speed.

Parentlane

Associate Product Management Intern

Bangalore, IN

May 2020 – Dec 2020

- Launched an online doctor consultation platform for expectant mothers during the pandemic, successfully scaling the product to over 1,000 daily consultations by driving key usability and video feature enhancements.
- Developed and deployed RESTful APIs using Flask and BERT models to power a health query NLP service; improved result accuracy by engineering custom data preprocessing and cleanup pipelines.

SKILLS & ADDITIONAL EXPERIENCES

Languages

Python, JavaScript, TypeScript, Java, Dart, C, PHP, LaTeX

Frameworks/Tech

React, React Native, Expo, Next.js, Node.js, Django, LLMs, v0, Claude, Langchain, MCP, AWS, Firebase

Product & Design

UX Research, Product Strategy, Agile, Design Thinking, PRD, Data Analysis, Usability Testing

Tools

Figma, make, Jira, Git, VS Code, Postman, Dovetail, SQL, Numpy, Tailwind CSS, Framer

Root: A Cultural Connection Platform for Diaspora Communities

Santa Clara, CA

HCI Researcher, Academic Project

Fall 2024

- Led mixed-methods research (survey, ethnography, lit review) revealing cultural belonging as a key need, shaping product direction.
- Synthesized user pain points into design principles and feature specs, informing a location-based discovery map.

Community Service: Volunteered with Adithya Yegan Trust to provide essential support to underprivileged communities during the Covid-19 pandemic (Dec 2020).

Competitions: Finalist in INGENIUS ACM Hackathon (Sep 2019) and KALPANA IEEE Hackathon (Oct 2018).

Open Source: Contributed to open-source projects during Digital Ocean's Hacktoberfest (2019).
