

Certifications:

- SAS Certified Base Programmer for SAS 9
 - SAS Certified Advanced Programmer for SAS 9
-

Skills:

- Clinical trials Phase I - IV
 - CRF annotation, Specification creation, CDISC (SDTM, ADaM), TLF, FDA/EMA regulatory standards
 - Validation Programming, Pinnacle 21 Report, SAS macros , SAS Arrays, Proc SQL, Proc Reports
 - Define.xml, SDRG, ADRG, CRT Package
 - End to end Oncology exposure: SDTM (TU, TR, RS), ADaM (ADTU, ADTR, ADRS, ADTTE), TLF (PFS, BOR, KM Plot, Waterfall Plot, Forest Plot)
 - ISS/ISE
-

Work Experience:

Statistical Programmer II | Syneos Health

July 2022 to July 2023

- Developed and validated complex ADaM datasets for individual studies and integrated summaries (ISS/ISE), ensuring consistency across studies and compliance with CDISC standards for variable derivation and metadata documentation.
- Designed and generated oncology-specific SDTM, ADaM datasets and TLFs, including endpoints like ORR, BOR, OS, and PFS, incorporating RECIST criteria and addressing complex trial challenges such as censoring, stratification, and tumor evaluation logic.
- Developed dataset compatible with NONMEM to support pharmacokinetic (PK) modeling and analysis.
- Produced and validated TLFs using PROC REPORT for both individual trials and integrated submissions, collaborating with biostatisticians and cross-functional teams to ensure accuracy, regulatory readiness, and alignment with analysis objectives.

Programmer | LabCorp Drug Development

July 2021 to July 2022

- Performed CRF annotations and developed SDTM and ADaM specifications in accordance with SDTM IG, ADaM IG, and CDISC Controlled Terminology.
- Designed and validated SDTM, ADaM, and TLF domains using parallel programming. Generated Pinnacle 21 reports to ensure CDISC compliance for SDTM and ADaM.
- Created and customized SAS macros for automation and efficiency, including debugging and optimization; contributed to the generation of define.xml, SDRG, ADRG files for regulatory submissions.

Programmer | IQVIA RDS

Dec 2018 to July 2021

- Proficient in the drug development process spanning Phase I to Phase IV clinical trials.
 - Experienced in managing data transfer, conducting edit checks, and handling imports for vendor data.
 - Skilled in utilizing SAS/BASE, SAS/PROCEDURES, SAS/ODS, SAS/MACROS, and SQL.
 - Experienced in SDTM, Base SAS, and Advanced SAS tools, with a focus on program development and validation.
 - Utilized various SAS procedures, including PROC FREQ, PROC MEANS, PROC TRANSPOSE, PROC LIFETEST, PROC PHREG, PROC TEMPLATE, PROC SGRENDER, and PROC REPORT, to generate Tables, Listings, and Figures (TLFs).
-

Education:

- **Master of Science in Mathematics** | Pune University, India **June 2016 to June 2018**
- **Bachelor of Science in Mathematics** | Pune University, India **June 2013 to June 2016**
