Data Engineer

PROFESSIONAL SUMMARY:

- Results-driven Data Engineer with hands-on experience in designing, building, and optimizing scalable data pipelines, ETL workflows, and real-time streaming solutions.
- Proficient in SQL, Python, Pyspark, and Databricks, with proven expertise in managing and transforming large-scale datasets for advanced analytics and business intelligence.
- Skilled in leveraging cloud-based platforms, Delta Lake, and Apache Kafka to ensure data integrity, scalability, and performance.
- Adept at developing interactive dashboards and visualizations with Tableau to support data-driven decision-making.
- Strong background in implementing machine learning algorithms, including Decision Trees and Random Forests, to deliver predictive insights.
- Recognized for improving data processing efficiency, optimizing system performance, and driving measurable business outcomes.

TECHNICAL SKILLS:

- **Programming Languages:** Python, SQL, C, C++
- **Big Data Technologies:** Apache Spark, Pyspark, Apache Kafka
- **Cloud Platforms:** AWS (S3, Glue, EMR), Azure, Databricks, Delta Lake, Azure Synapse, ADLS Gen2, Snowflake
- **Databases & BI Tools:** PostgreSQL, SQL Server, MongoDB, Big Query, Tableau
- **ETL & DevOps:** Apache Airflow, CI/CD, Datapost, DevOps

Education:

- **Masters in Computer Science** | University of Texas at Arlington, TX
Jan 2023 – Dec 2024 | GPA: 3.75/4.00
- **Bachelor of Engineering in Computer Science** | Andhra University College of Engineering, India, Aug 2017 – May 2021 | GPA: 7.92/10.00

PROFESSIONAL EXPERIENCE:

Client: UT Arlington, TX

May 2023 – Dec 2024

Role: Data Engineer

Responsibilities:

- Designed and optimized scalable ETL pipelines using Python, SQL, and Apache Spark, improving data processing efficiency by 30% and significantly reducing overall processing time.
- Performed data cleaning, transformation, and validation to ensure accuracy, consistency, and reliability of datasets, enabling trustworthy insights for business decision-making.
- Developed interactive dashboards and visualizations in Tableau, providing actionable insights to stakeholders and fostering stronger data-driven decision-making across teams.
- Built a robust, event-driven ETL pipeline leveraging Kafka to capture and process real-time, high-velocity e-commerce event streams, enhancing system responsiveness.
- Automated schema validation, data cleansing, and enrichment workflows using Databricks and PySpark, reducing data transformation time by 40% and improving data quality.
- Implemented Databricks Delta Lake to manage and load transformed datasets in an optimized, governed, and scalable manner.
- Designed business intelligence dashboards to track event trends, revenue distribution, and location-based analytics, empowering key stakeholders with timely insights.
- Implemented Decision Tree and Random Forest classifiers from scratch in Python using entropy, information gain, bootstrapping, and ensemble techniques.

- Designed an optimized node-splitting algorithm with threshold selection, improving prediction accuracy and computational efficiency.
- Achieved 93% accuracy in two-class and three-class classification and 60% accuracy in six-class classification using custom Random Forest implementation.

Environment: Python, SQL, Apache Spark, Pyspark, Databricks, Delta Lake, Apache Kafka, Tableau, Machine Learning (Decision Trees, Random Forests, Ensemble Techniques), Data Cleaning & Transformation, Real-Time Data Processing, Data Validation & Enrichment, Data Visualization & BI Dashboards, Model Evaluation Metrics, Data Architecture Optimization

Client: OKTA, Hyderabad, Ind

Jan 2021 – Dec 2022

Role: Data Engineer

Responsibilities:

- Designed and deployed high-performance ETL pipelines, achieving 100% data accuracy during the migration from Salesforce NXT to Gainsight Cloud.
- Optimized SQL queries, reducing report generation time by 40% and significantly improving workflow efficiency.
- Developed and maintained Journey Orchestrators and data workflows, driving improved customer segmentation and engagement strategies.
- Leveraged Apache Spark and Databricks to process large-scale datasets, enhancing data processing efficiency by 35%.
- Honored as Employee of the Month (October 2021) for excellence in data pipeline optimization and cloud migration strategies.

Environment: Python, SQL, Apache Spark, Databricks, Gainsight NXT, Salesforce, ETL Pipelines, Data Migration, Workflow Optimization, Customer Segmentation, Data Orchestration, Data Processing Efficiency, Cloud Platforms
