

PRIYADARSHINI MADDELA

Data Analyst

Worcester, MA | (508) 410-6128 | priyadarshinimaddela28@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Analyst with 4+ years of experience delivering insights through SQL, R, Python, Tableau, Power BI, and cloud platforms (AWS, Azure, GCP). Skilled in ETL development, A/B testing, data cleaning, statistical analysis, and KPI reporting. Strong background in requirement gathering, data modeling, exploratory data analysis (EDA), and translating business needs into optimized dashboards and actionable recommendations in Agile settings.

TECHNICAL SKILLS

- **Programming & Data Analysis:** SQL, R, Python (NumPy, Pandas, Matplotlib), Data Wrangling, Data Cleaning & Transformation
- **Data Visualization Tools:** Tableau, Power BI (Data Modeling, DAX, Power Query), Looker Studio, QuickSight, Advanced Excel (Pivot Tables, LOOKUPS, Macros)
- **ETL & Cloud:** AWS (S3, Glue, Redshift, Athena), Azure (Data Factory, Data Lake, SQL Database, Purview), GCP (Big Query, Looker Studio), dbt, Apache Airflow, Snowflake
- **Analytics & Reporting:** A/B Testing, KPI Analysis, Root cause Analysis, Exploratory Data Analysis, Regression Analysis, Segmentation, Sentiment Analysis, forecasting, Churn Analysis, Ad-Hoc Reporting
- **Project Tools:** Git, Jira, Confluence, Agile-Scrum, Salesforce
- **Soft Skills:** Stakeholder Communication, Team Collaboration, Documentation, Leadership (Team oversight)

EXPERIENCE

Verizon Communications - USA

Data Analyst

| Mar 2025 - Present

- Developed interactive dashboards in QuickSight for real-time monitoring of network KPIs including SLA, jitter, and packet loss, enabling faster operational response across regions.
- Automated reporting workflows and ETL pipelines using AWS Glue and Redshift, reducing data latency from 6 hours to under 15 minutes.
- Analyzed over 500 GB/day of network telemetry using SQL and Python, identifying root causes of service disruptions and boosting user retention by 9.5% in major metro areas.
- Collaborated cross-functionally to streamline incident reporting and improve SLA adherence, contributing to an 18% increase in compliance.
- Supported audit readiness by generating IAM compliance reports using Lake Formation and Athena, reducing audit preparation time by 70%.
- Authored reusable documentation in Confluence and version-controlled scripts in Git, reducing onboarding time for new analysts by two weeks.

Infosys Limited (Client: Palo Alto Networks) - India

Systems Engineer

| Jun 2022 - Jul 2023

- Designed scalable PySpark and SQL pipelines within Azure Data Lake to process 25M+ firewall logs daily, enabling near real-time threat analytics.
- Developed interactive Power BI dashboards to monitor threat patterns and policy violations, reducing SOC response time by 30%.
- Consolidated multi-source Cortex logs via Azure Data Factory and REST APIs to standardize InfoSec reporting across six global regions.
- Applied automated data validation scripts and outlier detection models in Python to proactively identify data anomalies and improve reporting quality.
- Delivered region-specific KPI dashboards using T-SQL and DAX for security compliance tracking and governance improvements.
- Documented data lineage and catalog metadata using Microsoft Purview, aiding ISO 27001 certification efforts.

Teleperformance Global Services (Client: Google)

Team Lead - Data Analytics

| Mar 2021 - Jun 2022

- Led a 5-member analytics team to deliver campaign performance dashboards across Google Ads platforms, improving delivery timelines by 27% through Agile methodology.
- Built centralized KPI dashboards in Tableau and Looker to track ROAS, CTR, CPC, and customer conversion metrics; insights led to a 7% increase in marketing efficiency.
- Automated A/B test performance tracking in SQL and Python, reducing report generation time by 90%.
- Re-architected campaign taxonomy using dbt to standardize metrics across channels, cutting reconciliation errors.
- Delivered strategic performance insights into APAC marketing leadership, resulting in \$2.4M reallocation of digital spend.
- Mentored junior analysts in SQL have the best practices and automation techniques, improving QA throughput by 25%.

Teleperformance Global Services (Client: Google)

Analyst

| Jun 2019 - Mar 2021

- Developed SQL-based ETL processes to ingest 15M+ records/day into BigQuery from ad campaign datasets, improving data availability and reducing prep time by 40%.
- Created Tableau dashboards for real-time performance tracking (CTR, CPC, Quality Score), resulting in an 18% uplift in click-through rates.
- Designed automated A/B test analytics modules, accelerating marketing decision-making and boosting ROAS by 7%.
- Partnered with campaign managers to convert data insights into marketing strategies, increasing stakeholder satisfaction by 21%.
- Implemented robust QA procedures and anomaly detection logic that improved data reliability to 99.8% and eliminated billing errors.

EDUCATION

- **Clark University, Worcester - MA, USA**
Master of Science in Information Technology – 4GPA

May 2025

PROJECTS

- **Amtrack Performance Analysis - [Tableau](#)**
Led a Business Intelligence project for Amtrak using Tableau and SQL to analyze ridership, delays, and operational performance. Developed interactive dashboards and a star schema model to support real-time reporting. Delivered actionable insights for predictive maintenance and data-driven resource planning.
- **Customer Risk & Retention Analysis - [Power BI](#)**
Analyzed customer interactions to identify churn patterns and behavior segments. Created Power BI dashboards for retention trends that enabled targeted outreach and led to an improvement in user retention.
- **Video Game Sales & Market Trend Analysis - [Tableau](#)**
Designed interactive dashboards to visualize multi-platform sales trends. Applied RFM segmentation and seasonal time-series analysis to help stakeholders pinpoint high-growth product categories and improve inventory planning.
