

PROFESSIONAL SUMMARY:

- QA Analyst with 4+ years of experience in Manual and Automation Testing, covering all phases of the Software Testing Life Cycle (STLC) across Banking, Finance, Healthcare, and Telecom industries.
- Proficient in Agile (Scrum, Kanban), Waterfall, and Acceptance Test-Driven Development (ATDD) methodologies, ensuring high-quality software delivery.
- Extensive experience in Test Strategy, Test Planning, Test Case Design, and Automation Script Development using Selenium, Java, TestNG, JUnit, and Bash scripting.
- Hands-on expertise in Web Application Testing, including Functional, Regression, Integration, System, Performance, Stress, Smoke, and Sanity Testing.
- Strong background in Automation Frameworks, including Page Object Model (POM) and Keyword-Driven Testing, to optimize test execution and maintenance.
- Skilled in Defect Management using JIRA and HP ALM, with a keen eye for tracking, analyzing, and resolving issues in collaboration with developers and testing teams.
- Proficient in Database Testing, writing complex SQL queries to validate data integrity, consistency, and backend workflows.
- Expertise in Black Box Testing techniques, including Boundary Value Analysis, Equivalence Partitioning, and exploratory testing to identify critical defects early.
- Experienced in command-line tools for test automation, executing test scripts, managing test suites, and generating HTML reports for detailed test analysis.
- Highly adaptable, self-driven professional with excellent problem-solving skills, capable of managing multiple projects, coordinating with cross-functional teams, and delivering quality-driven results.

Technical Skills

Development methodology	Agile / Scrum, Waterfall, Kanban
Android Testing	CTS GTS STS CTSV VTS ,Smart TV
Test Management Tool	JIRA , HP ALM
Programming	Java 8, J2EE, JDBC, JSP, EJB, Shell Scripts, JavaScript, SQL ,Python,
Operating system	Windows, Unix, Linux
Web/Application Servers	Apache Tomcat 8
Automation Testing	Selenium IDE, Selenium Web Driver, Selenium RC, Junit, TestNG, Maven
Internet Technologies	HTML 5, JavaScript, XML 2.0, CSS 3, Bootstrap,
Framework Software	Spring 4.3, Hibernate 4.3, Spring Boot, Spring IOC, Spring MVC, Spring ORM
Relational Databases	MySQL 5.7, SQL Server
Version Management	GIT

PROFESSIONAL EXPERIENCE:

Tekrubix, Dallas

Sept 2023 to present

Quality Assurance Engineer

- Actively involved in all SDLC phases, including requirement analysis, design, triage, implementation, and testing, following the Agile Scrum methodology with 2-week sprints and 4-week release cycles.

- Participated in Sprint Planning, Daily Stand-ups, and Retrospectives, estimating testing efforts, discussing impediments, and identifying areas for improvement.
- Developed and executed comprehensive test cases based on user stories, acceptance criteria, functional, integration, and edge case scenarios to ensure complete coverage.
- Contributed to setting up an automation testing framework for Android-based mobile devices and executed test cases for the Honeywell mobile app across multiple Android versions.
- Performed both manual and automated testing, leveraging tools like Selenium, JUnit, and TestNG, ensuring functionality, usability, and regression stability.
- Utilized JIRA and HP ALM for defect tracking, providing detailed bug reports with steps to reproduce, expected vs. actual results, and screenshots for effective debugging.
- Conducted regression testing using automated test suites to ensure new changes did not impact existing functionality and maintained application stability.
- Collaborated closely with developers in bug triage meetings to prioritize and resolve defects, enhancing software quality and deployment efficiency.
- Maintained and updated test documentation, including test plans, test cases, reports, and Bash scripts, to ensure clarity and process adherence.
- Proactively shared best testing and triage practices with the team, fostering continuous improvement and a collaborative testing environment.

Environment: Linux, Agile, HP ALM, JIRA, CTS, GTS, STS, VTS, CTSV, CTS-ON-GSI, CTS-INSTANT, Selenium, Java, TestNG, JUnit, SQL, Bash Scripting, Web & Mobile Automation, API Testing, Defect Management, and Regression Testing on Android devices and Smart TVs.

SkillPark PVT Limited, Hyderabad
Quality Assurance Analyst

Aug 2020 to Aug 2022

- Actively participated in requirements gathering, analysis, design, development, and testing of applications using the SAFE Agile (SCRUM) methodology in a Test-Driven Development (TDD) approach.
- Ensured seamless triage functionality across multiple Android OS versions for Smart TV Set-Top Boxes, validating compatibility with various TV models for consistent performance.
- Conducted UI/UX testing to ensure intuitive navigation, responsive UI elements, and smooth user experience across different screen sizes and resolutions.
- Tested and validated interactive features such as Google Casting, Screen Mirroring, and Voice Remote Control, ensuring proper integration and functionality.
- Verified Bluetooth connectivity for peripherals and accessories, along with third-party app compatibility from the Google Play Store on the Smart TV platform.
- Performed integration testing with Google services like Chrome, YouTube, and Google Play Movies, ensuring seamless operation within the TV ecosystem.
- Conducted performance testing, evaluating navigation responsiveness, resource utilization, and optimizing system performance for enhanced efficiency.
- Automated regression test suites to streamline testing efforts, ensuring stability after updates, while executing unit and end-to-end tests using JUnit.
- Tracked and troubleshooted defects using JIRA and HP ALM, collaborated with engineers to drive QA efforts, and developed test scripts to enhance testing accuracy.

- Maintained comprehensive test documentation, including test plans, test cases, execution reports, and detailed quality metrics, providing insights into testing progress and product stability.

Environment: Agile (SAFE Scrum), Linux, HP ALM, JIRA, CTS, CTSV, CTS-ON-GSI, CTS-INSTANT, GTS, STS, VTS, Selenium, Java, TestNG, JUnit, Bash Scripting, SQL, Web & Mobile Automation, API Testing, Regression Testing, Performance Testing, UI/UX Testing, and Integration Testing.

CodeFever Technologies, Hyderabad

Aug 2019 to July 2020

Software Engineer

- Gathered and analyzed business and functional requirements, translating them into User Requirement Specifications (URS) and Functional Requirement Specifications (FRS) for seamless development.
- Designed, developed, and maintained robust automated test scripts using Selenium WebDriver and Java, ensuring comprehensive test coverage for critical functionalities.
- Built and configured test automation frameworks like TestNG and JUnit, implementing reusable, efficient scripts to validate both positive and negative test scenarios.
- Executed automated test suites to perform functional, regression, and integration testing, ensuring software stability across multiple environments.
- Identified, documented, and tracked software defects using JIRA, working closely with developers to troubleshoot, analyze root causes, and verify defect resolutions.
- Actively participated in Agile ceremonies such as Sprint Planning, Daily Stand-ups, and Retrospectives, aligning testing efforts with development goals.
- Configured and managed test environments, ensuring infrastructure stability, seamless software dependencies, and smooth automated test execution.
- Continuously optimized automation scripts and testing processes, integrating best practices and emerging QA methodologies to enhance test efficiency and reliability.
- Stayed up to date with industry trends, new automation tools, and advanced testing strategies, contributing to process improvements and test automation innovation.
- Highly detail-oriented, analytical, and organized, with strong problem-solving skills and effective communication, ensuring high-quality software delivery.

Environment: Selenium WebDriver, Java, TestNG, JUnit, Agile, Linux, HP ALM, JIRA, SQL, Bash Scripting, Web & Mobile Automation, API Testing, Functional Testing, Regression Testing, Integration Testing, Test Automation Frameworks, Defect Tracking, and Test Environment Management.

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems

New York, NY

Master of Science, Computer Science | CGPA: 3.9

MLR Institute of Technology

Hyderabad, India

Bachelor of Technology, Information Technology
