Rochester, NY | (585) 317-5305 | priyaagopalshankar@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

ROCHESTER INSTITUTE OF TECHNOLOGY

Masters in Computer Science (Specialization in Data Science)

Aug 2023 – May 2026

GPA: 3.69/4.0

VISVESVARAYA TECHNOLOGICAL UNIVERSITY

Bachelors of Computer Science and Engineering

Aug 2016 – Aug 2020

GPA: 3.36/4.0

EXPERIENCE

RIT – Institutional Research, Data & Analytics

Rochester, NY

Data Analyst Co-op

May 2025 – Dec 2025

- Engineered and delivered 10+ enterprise Power BI dashboards covering 5K+ courses, 19K+ students, modernizing reporting on persistence, graduation, enrollment, accreditation, and surveys while powering data-driven decisions by deans, finance, and senior leadership.
- Designed and implemented 50+ KPIs and complex DAX measures to support multi-year trend, cohort, and demographic analyses, enabling descriptive and predictive analytics, reducing manual validation by 30%, and ensuring consistency with institutional benchmarks.
- Transformed large institutional datasets (>100K rows) using SQL, DAX, and advanced data modeling into actionable insights, significantly improving accuracy of student success and equity metrics for institutional research, compliance, and BI reporting, while accelerating analytics through optimized ETL pipelines, integrated data warehouses, and scalable cloud platforms supporting predictive analytics.
- Streamlined reporting workflows by automating recurring reports, strengthening data quality controls, and implementing validation checks with SQL, Power Query, and stored procedures, reducing manual effort, ensuring scalability, and aligning with data governance frameworks.
- Built accreditation, benchmarking, and survey dashboards (AACSB, US News, NSSE) that enabled RIT to compare performance among peer institutions and uncovered significant 10–15% engagement and equity disparities in key dimensions of student experience.

Infosys Limited

Bengaluru, India

Senior Systems Engineer

Jan 2021 – July 2023

- Designed and delivered automated, insight-driven solutions for Sysco Foods using Blue Prism and Python across six large-scale projects, reducing manual workloads by 99% and engineering scalable SQL Server–Amazon S3 pipelines to support enterprise data intelligence.
- Developed and productionized data extraction workflows with OCR tools (Tesseract, Decipher, Abbyy), Pandas, and regex to transform unstructured business documents into structured datasets for real-time insights, text mining, normalization, and machine learning integration.
- Performed data wrangling and exploratory analysis on bot logs and operational metrics; built interactive Power BI dashboards to track KPIs, detect failures, and optimize scheduling, reporting, forecasting, and resource planning, boosting efficiency and resource utilization by 85%.
- Led the lifecycle of automation deployments (requirements, design, testing, rollout, hypercare) and partnered with cross-functional teams to align initiatives with business goals, applying statistical methods (trend detection, anomaly analysis, root cause modeling) for insights.
- Spearheaded innovation via reusable automation frameworks and mentoring, accelerating delivery and strengthening team capability.

Vtricks Technologies

Bengaluru, India

Data Science Intern

July 2019 - Aug 2019

- Analyzed learner engagement on a Data Science course platform and developed churn prediction models (logistic regression, decision trees), uncovering early dropout indicators and enabling targeted interventions that improved completion by 15% and retention by 25%.

PROJECTS

YouTube Comment Sentiment Analysis using NLP and Machine Learning

- Processed ~100K YouTube comments with NLP (Pandas, spaCy, TF-IDF, custom stopwords), applied VADER sentiment scoring, and trained a logistic regression model achieving 88% accuracy and 0.88 F1-score to uncover sentiment trends and refine engagement strategies.

Revised Stopwords for Sentiment Analysis

- Developed revised-stopwords, a Python package published on [PyPI](#) that improves sentiment classification by preserving key sentiment words typically removed by NLTK, and showcased its impact in a [Medium blog](#) with demonstrated gains in VADER sentiment scoring.

Real Estate Rentals Analysis

- Designed and built an end-to-end real estate analytics project by scraping 10K+ Redfin listings and integrating Zillow ZHVI/ZORI and crime data, leveraging PostgreSQL and Power BI to reveal market trends, rental yields, and high-opportunity investment areas.

SKILLS

- Programming & Scripting:** Python, Java, R, Flask, HTML5, CSS
- Databases & Cloud:** SQL Server, PostgreSQL, MySQL, MongoDB, Amazon S3, Google BigQuery
- Analytics & Visualization:** Power BI, Tableau, Pandas, NumPy, DAX
- Machine Learning & Automation:** scikit-learn, TensorFlow, Keras, spaCy, NLTK, VADER, Blue Prism, UiPath, Jenkins

CERTIFICATIONS & ACHIEVEMENTS

- Business Value Driver Award (2022) & Operational Ingenuity Award (2023) – Recognized by Blue Prism Customer Excellence Awards for contributions to RPA business value & operational innovation.
- Google Data Analytics Professional Certificate – Proficient in SQL, data cleaning, visualization & R programming.
- Blue Prism Developer Certification (AD01) – Certified by Pearson VUE for expertise in intelligent automation and process design.
