PROFESSIONAL SUMMARY

Results-driven Healthcare Data Analyst with 4+ years of experience in analyzing large datasets, conducting risk adjustment and revenue cycle analyses, and developing actionable insights to reduce cost of care and improve clinical outcomes. Skilled in SQL, Tableau, Excel, and Snowflake with working knowledge of Python and R. Proven ability to manage complex projects, translate findings for executive audiences, and work cross-functionally in fast-paced environments.

WORK EXPERIENCE

Data Analyst - Revenue Cycle

July 2023 - March 2025

Wyckoff Heights Medical Center, Brooklyn, NY

- Developed clinical quality and financial dashboards using Excel and Tableau to support revenue cycle initiatives.
- Analyzed claims data to identify payment discrepancies, recovering over \$300K in revenue and minimizing financial risk.
- Designed denial reports using Tableau, assisting in process improvement strategies that reduced claim denial rates by 23%.
- Streamlined data analysis workflows, reducing recurring report generation time by 30% by creating efficient SQL queries.
- Partnered with vendors and clinical providers ensuring data accuracy and enhancing the quality of critical reports.
- Summarized findings into reports and presented to leadership teams.

Data Analyst - Risk Adjustment

Feb 2022 - May 2023

VillageMD, Remote

- Interpreted and analyzed data from multiple sources (EHR, claims, provider) using Snowflake SQL, identifying key trends for risk adjustment projects.
- Collaborated with stakeholders to refine business requirements, translating them into functional specifications for SQL reporting.
- Produced and maintained operational dashboards using Tableau to display KPIs, and clinical performance metrics enabling stakeholders to make data-driven decisions.
- Developed queries in Snowflake SQL identifying incremental HCC, resulting in an estimated \$800K in additional revenue.
- Conducted population health analysis to identify opportunities for improvement in HEDIS scores and HCC recapture.

Clinical Data Analyst Intern

July 2020 - Dec 2020

Jounce Therapeutics, Cambridge, MA

- Analyzed Phase 2 clinical trial data using R and developed visualizations that identified trends and patterns to assess patient outcomes and support clinical decision-making.
- Transformed clinical data into CDISC SDTM format for FDA submission, ensuring compliance with industry standards and regulatory requirements.
- Identified and corrected data discrepancies through quality assurance checks, reducing errors by 30% and supporting clinical data management.

Data Analyst

Sept 2018 - Aug 2019

Ashirwad, India

- Analyzed member and claims data from EMR to measure quality of care and evaluate patient outcomes using SQL.
- Identified trends and patterns in seasonal diseases, leading to prevention programs that decreased hospital admission by 10%.
- Acted as a liaison between technical and non-technical teams and employed workflows addressing patients' queries, growing patients' satisfaction metrics by 25%.
- Performed detailed daily, weekly, and monthly reconciliations of incoming data.

EDUCATION

Master of Science in Health Informatics

Dec 2021

Northeastern University, Boston, MA

Related Courses: Database Design and Management System, Visual Analytics, Project management, Biostatistics, American Healthcare System, Data Mining and Machine Learning, Patient Engagement and Analytics, Data management, Capstone

Bachelor of Pharmacy

May 2018

Gujarat Technological University, India

PROJECTS

Patient Readmission Prediction | Machine Learning | R

March 2025

- Developed R based predictive model to determine target variable addressing challenges related to null values, class imbalance, outliers by applying exploratory data analysis, K-nearest neighbors.
- Implemented feature engineering, data sampling on 15 attributes for Support Vector Machine, Random Forest algorithms, capturing patterns, correlations and non-linear relations.
- Assessed model with specificity, sensitivity, F1 score, attaining AUC-ROC score of 0.85, maintaining true and false predictions.

Customer Segmentation, CLV Prediction & Churn Rate Analysis | MySQL

Dec 2024

- Performed data cleaning and preprocessing on the H&M retail dataset, including handling missing values, filtering out canceled transactions, and removing invalid entries using SQL queries.
- Calculated Customer Lifetime Value (CLV) for individual customers using key metrics such as Average Order Value (AOV), Frequency, and Customer Lifespan to predict future revenue and prioritize retention efforts.
- Developed and implemented churn rate calculation and created actionable insights from churn and retention metrics.
- Simplified complex queries utilizing joins and subqueries for developing reports and performed query optimization.

TECHNICAL KNOWLEDGE

Technical Skills: Altera, Epic, SQL, R, SAS, Python, Snowflake SQL, MySQL, Microsoft SQL Server, GitHub, Tableau, STATA, Advanced Microsoft Excel (Vlookups, Pivot), Word, PowerPoint, Outlook, Access, JIRA, Allscripts, LeanSixSigma

Healthcare Standards: ICD-10, CPT, LOINC, HCC Scoring, SNOMED, HL-7, HEDIS, HIPAA, CDISC

Certifications : Tableau Data Analyst, SAS Base certification
