

Priyal Shah

Data Analyst

Charlotte, NC | +1 (336) 521-6549 | priyalshah1101@gmail.com | www.linkedin.com/in/priyal-shah11/ | [GitHub](#) | [Portfolio](#)

SUMMARY

Data Analyst with 3+ years of experience engineering data-driven solutions through advanced statistical programming and machine learning. Expertise lies in developing production-ready Python code (Pandas, Scikit-learn) for building predictive models and crafting complex data pipelines on cloud platforms like AWS. Passionate about deploying end-to-end analytical workflows that move beyond descriptive reporting to provide prescriptive insights and automate critical business functions.

SKILLS

Programming Language: SQL (CTEs, Window Functions, Query Optimization), Python, R, Bash, SAS, DAX
Packages & Libraries: Pandas, NumPy, Scikit-learn, Statsmodels, Matplotlib, Plotly, SciPy, SQLAlchemy
Business Intelligence & Visualization: Tableau, Power BI, Looker, Qlik Sense, Dashboard Design, Data Storytelling, Executive Reporting
Cloud & Data Platforms: AWS (Redshift, S3, Athena, Glue), Google Cloud Platform, Azure (Synapse, Data Factory), Snowflake, Databricks
Big Data & ETL Tools: Apache Spark, Hadoop, Hive, Kafka, Airflow, dbt, Informatica, Talend, Stitch
Statistics & Machine Learning: A/B Testing, Hypothesis Testing, Regression Analysis, Predictive Modeling, Time Series Forecasting, Clustering, NLP, Experimental Design
Data Management & Governance: Data Modeling, Data Warehousing, Data Quality, Data Governance, Data Lineage, Master Data Management
Collaboration & Productivity Tools: Git, GitHub, Jira, Confluence, Slack, Microsoft 365 Suite, Advanced Excel
Business & Professional Skills: Critical Thinking, Root Cause Analysis, Quantitative & Diagnostic Analytics, Data Storytelling, Technical Presentations, Stakeholder Management, Cross-Functional Collaboration, Agile, Scrum, Project Lifecycle Management, Requirements Gathering, Business Acumen

EXPERIENCE

Data Analyst, Berkshire Hathaway | USA **Dec 2024 – Present**

- Designed predictive models in Python (Scikit-learn, Statsmodels) for quarterly claim forecasting, improving financial accuracy and reducing cost estimation variance by 12% across business lines.
- Built dynamic Tableau dashboards integrating Redshift, S3, and Athena data, enabling executives to track KPIs and drill into real-time operational performance across regional divisions.
- Partnered with actuarial and underwriting teams to develop regression-based pricing models, directly influencing product strategy and improving profit margins by 8%.
- Deployed automated ETL pipelines using AWS Glue, Redshift, and Python scripts to consolidate multi-source datasets, improving refresh frequency from daily to hourly and cutting manual processing by 40%.
- Automated data validation and reconciliation processes with SQL and dbt, improving reporting reliability and ensuring 100% data consistency across multiple data marts.
- Conducted A/B tests evaluating policy impacts on customer churn, uncovering a 9% retention uplift in specific customer cohorts and validated insights that informed leadership's retention and renewal strategy.
- Mentored 6 junior analysts to standardize SQL modeling and query optimization practices, resulting in a 25% improvement in project delivery speed and documentation consistency across Agile sprints.

Operations Analyst, Hexaware Technologies | India **Sep 2021 – Jun 2023**

- Designed, optimized, and automated SQL-based operational reporting systems for global clients, achieving a 50% reduction in query execution time and improving stakeholder access to near real-time data.
- Developed interactive Power BI dashboards to monitor SLA adherence, team productivity, and error rates, enabling proactive management interventions that improved compliance scores by 20%.
- Utilized Python (Pandas, NumPy) to conduct root cause analysis on production bottlenecks, uncovering inefficiencies that increased overall workflow throughput by 18%.
- Created end-to-end ETL workflows using Informatica and Airflow for multi-source data integration, improving data accuracy and audit traceability across financial and operations data sets.
- Designed Excel VBA macros and SQL automations to streamline monthly performance reports, reducing manual effort by 80 hours.
- Documented 20+ data flows, mappings, and dependencies for migration initiatives, reducing post-deployment support tickets by 35% and ensuring smooth handover across distributed support teams.

SQL Developer, Cybage Software | India **Jan 2021 – Aug 2021**

- Developed complex stored procedures, triggers, and functions in SQL Server to support large-scale transactional and analytical systems for multiple enterprise clients.
- Implemented indexing, partitioning, and normalization strategies to enhance query performance and optimize database resource utilization, cutting response times by 60%.
- Built parameterized SSRS and Power BI reports for finance and logistics departments, enabling automated KPI delivery and version-controlled reporting pipelines.
- Performed data profiling and cleansing using T-SQL and Python scripts, ensuring accuracy and consistency across staging, warehouse, and reporting environments.
- Partnered with business analysts to design transformation logic across staging and warehouse layers, reducing transformation runtime errors by 22% across production environments.
- Supported 15+ database release cycles leveraging Git and Jenkins CI/CD automation, ensuring consistent schema deployments and reducing release rollback by 40% through improved version tracking.
- Conducted performance benchmarking across 12 production databases, documenting optimization outcomes that reduced query response times by 18% and established standardized tuning protocols.

EDUCAITON

Master of Science in Information Technology **Aug 2023 – May 2025**
University of North Carolina | Charlotte, Charlotte, NC, USA

Bachelor of Technology in Information Technology **Jul 2019 – Jun 2023**
Sardar Vallabhbhai Patel Institute of technology | Vasad, Gujarat, India

CERTIFICATION

Cisco Certified- Data Analytics Essentials
Introduction to Generative AI
Microsoft Certified: Data Analysis and Visualization with Power BI
