EXPERIENCE SUMMARY

Full-Stack Software Developer with 3+ years of experience designing and building scalable, cloud-native apps. Proficient in JavaScript, Python, Java, React and AWS. Passionate about backend system design, automation and end to end development.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, Java
- **Frameworks:** Node.js, ExpressJS, React, NestJS, NextJS, Django, FastAPI, Spring Framework, Bootstrap, TailwindCSS
- **Cloud & Devops Tools:** Docker, Kubernetes, Nginx, AWS Stack, Git
- **Other Technologies:** Junit, Jest, Postman, Jenkins, Bitbucket, Jira, HTML, CSS, SCSS, Mockito, Mocha, Chai
- **Databases:** MongoDB, MySQL, PostgreSQL, Redis, DynamoDB

PROFESSIONAL EXPERIENCE

San Jose State University - San Jose, CA

FullStack Web Developer

May 2023 – Present

- Built ops tool in React and Node.js enabling admin teams to run batch operations autonomously, cutting manual workflows and update cycles by 35%.
- Automated data integrity checks using AWS Lambda and cron jobs, proactively flagging missing student records and saving 10-12 hours/week of manual review.
- Migrated student dashboard modules to scalable microservices using Dockerized Express.js backends, improving maintainability and deploy times by 40%.
- Developed dynamic usage analytics for admin portal, helping stakeholders monitor activity and optimize resource allocation.
- Refactored backend APIs to decouple authentication and access control via Okta SSO, streamlining access for 30K+ users and boosting login success rates by 20%.

ProkoTech - Rolling Hills Estates, CA

Software Engineer Intern

Jun 2022 – Aug 2022

- Refactored Django backend for parking analytics tool by optimizing DB queries and response handling, reducing API latency by 30% and delivered real-time parking data ingestion from 200+ sensors through REST APIs.
- Engineered notification system with AWS SQS/SNS, ensuring 99.99% delivery of 1K+ alerts/day.
- Integrated Prometheus monitoring into the analytics pipeline, cutting downtime by 15% through metrics-driven insights.
- Orchestrated end-to-end system workflows with AWS tools like S3, API Gateway, SNS, and CloudWatch, enhancing scalability and improving failure recovery times through automated alarms and monitoring.

Exxat - Vadodara, India

Software Engineer

Jun 2019 – Jul 2021

- Developed multiple features for OT/PT university portals, streamlining workflows for health science departments over 50 institutions.
- Built a React-based drag-and-drop course scheduler with calendar view, cutting admin scheduling time by 40%.
- Created Spring REST and SOAP APIs for EHR integrations, enhancing data sync reliability.
- Optimized large file transfers in curriculum module by implementing gRPC streaming, reducing download latency by 60%.
- Implemented end-to-end CI/CD pipeline using Docker, Kubernetes, and Github Actions, automating testing and deployment, resulting in 30% faster production releases and 99.99% system reliability.
- Streamlined end-to-end testing by building JMeter, Selenium, and Jest frameworks, reducing testing time by 60%.

PROJECTS

FlickTime [Link](#) (ReactJS, FastAPI, Python, PostMan, TMDB, MovieLens, Nginx, Docker, Railway)

- Developed movie recommendation web app with hybrid filtering model achieving 92% accuracy on 26K TMDB and MovieLens dataset and responsive React frontend, serving 300+ users monthly.
- Built robust FastAPI-Firebase backend integrated and deployed on Railway using Nginx for optimizing server load.

Smart Photo Gallery Application (TypeScript, NodeJS, NextJS MongoDB, OpenCV, Fisherface)

- Developed a face recognition and classification system that reduced search time by 40% while maintaining quality
- Boosted image classification accuracy by 20% by integrating Fisherface algorithm and MongoDB
- Developed 4 key image processing functionalities: text-to-image, image-to-cartoon, background removal, image blur.

EDUCATION

SAN JOSE STATE UNIVERSITY - San Jose, CA

Master's of Science in Computer Engineering

Aug 2021-May 2023

(Distributed Systems, Systems Engineering, Enterprise Software Design, Machine Learning, Deep Learning)

GUJARAT TECHNOLOGICAL UNIVERSITY - Ahmedabad, India

Bachelor's of Engineering in Information Technology

Jul 2015 - Aug 2019

(Object Oriented Programming, Web Technologies, Computer Networking, Computer Architecture)
