PROFESSIONAL SUMMARY

Results-driven Data Analyst with 4+ years of experience in transforming complex datasets into actionable insights using Power BI, Tableau, SQL, and Python. Proven expertise in data visualization, business intelligence, and data integration, with a strong focus on delivering dynamic reports and dashboards for strategic decision-making and data-driven insights. Microsoft Power BI Data Analyst Professional and Tableau Certified Data Analyst, demonstrating expertise in advanced analytics, DAX expressions, and dashboard optimization. Expertise in Power BI, Tableau, SQL, and Python, with a strong focus on data modeling, ETL processes, and interactive dashboards for actionable insights. Strong understanding of embedding, chunking, and AI-driven content generation to streamline data processing and analytics workflows. Leveraged AI-powered Copilot tools to enhance data analysis, automate reporting processes, and improve decision-making efficiency. Experienced in Agile/Scrum methodologies, Jira, and DevOps tools, ensuring efficient project management and collaboration. Passionate about utilizing AI and automation tools to transform data analytics and business intelligence landscapes.

TECHNICAL SKILLS

- **Data Visualization & Reporting:** Power BI, Tableau, QlikView, Crystal Reports, SSRS.
- **Data Modeling & Tools:** Dimensional Modeling, Star Schema, SQL Database Modeler, T-SQL, PL/SQL, ServiceNow, Teradata, Snowflake, Alteryx, Palantir Foundry, Power Query, DBeaver.
- **Database Systems:** MySQL, PostgreSQL, Oracle, SQL Server, MS Access.
- **Programming Languages:** SQL, Python, DAX.
- **Cloud & DevOps:** Azure, AWS, Git, JIRA, DevOps tools.
- **Office Applications:** MS Excel (Power Query, VLOOKUP, Pivot Tables, Macros), MS PowerPoint, Visio, Outlook.
- **AI & GenAI:** ChatGPT, Copilot, Embeddings, Chunking, AI-Driven Data Analysis.
- **Operating Systems:** Linux, UNIX, Windows.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Microsoft Power BI Data Analyst Professional Certification
- Tableau Certified Data Analyst
- Power BI & SQL Bootcamps (Udemy)
- Advanced Generative AI for Data Analytics (Udemy)
- AI-powered data analysis & automation (LinkedIn Learning)

EDUCATION

Bachelor of Computer Application.
Makhanlal Chaturvedi University, Jun 2012.
BHOPAL, INDIA.

PROFESSIONAL EXPERIENCE:

Data Analyst / Power BI

Dallas, TX

AT&T/ Jul 2023 to Current

- Responsible for analyzing data in response to new business requests, performing maintenance and changes on interfaces, and identifying and resolving data discrepancies across multiple business applications in at&t
- Developed interactive Power BI dashboards using DAX, Power Query, and AI-driven insights for real-time decision-making
- Conducted data profiling, validation, and transformation for AT&T's enterprise data warehouse, ensuring data integrity across multiple business applications
- Managed data integration from ABS Data Warehouse, including Account Financial Revenue (AFR) and Universal Biller Customer Profile (CADM), ensuring accurate billing and sales assignments
- Collaborated with cross-functional teams to define data requirements, create data flow diagrams, and optimize data models for corporate applications
- Utilized AI-driven insights in Power BI to streamline report creation, enhancing visualization techniques and improving user comprehension
- Utilized SQL (PostgreSQL, Teradata) for querying large datasets and creating complex joints, optimizing data retrieval processes
- Designed data flow diagrams, process models, and entity-relationship models for efficient data structuring and reporting
- Applied Copilot's AI capabilities to automate data cleaning, transformation, and preparation tasks, reducing manual effort and enhancing accuracy
- Extracts and analyzes data from specific applications, systems and/or databases to create reports and provide recommendations based on the analysis of the data.

Data Analyst / Tableau /Power BI

Plano, TX

PepsiCo/ Oct 2021 to Jun 2023

- Designed and deployed /Power BI/Tableau dashboards with advanced visualizations (heatmaps, scatter plots, geographic maps) to provide actionable insights for supply chain optimization
- Integrated Tableau with SQL databases, optimizing ETL processes for faster data processing and dashboard performance
- Automated data workflows using Jupyter Notebooks and integrated them

with Tableau for seamless data analysis and reporting

- Performed data profiling, cleaning, and statistical modeling on large datasets to identify trends and anomalies
- Published reports and dashboards using Tableau/Power BI, ensuring enterprise-wide accessibility and collaboration
- Collaborated with cross-functional teams to centralize and standardize enterprise data for use by business stakeholders and data scientists.

Data Analyst

Atlanta, GA

AT&T/ Jan 2020 to Sep 2021

- Designed data validation workflows using SQL, Power BI, and Python, ensuring data quality and consistency
- Created interactive dashboards with Tableau and Power BI, providing key insights into business trends and operational efficiencies
- Developed ETL pipelines for data extraction, transformation, and loading into BI platforms, improving data accessibility
- Implemented AI-powered automation for data profiling, cleansing, and reconciliation, reducing manual effort and errors
- Supported the development of BI dashboards to track key metrics and experiments, providing actionable recommendations
- Monitored and refined data platforms to improve accuracy and performance over time.
