PROFESSIONAL SUMMARY

Seeking a full-time role within an organization where I can leverage my master's in computer science, coupled with seven years of experience in the Automotive Software Quality domain. I am eager to apply my knowledge of engineering management to foster mutual success and development while gaining further expertise and excellence from seasoned professionals in retail, merchandising, and eCommerce.

TECHNICAL & NON-TECHNICAL SKILLS

- PM tools - Microsoft Project, Jira, IBM DOORS, IBM Change, MKS
- PM techniques – WBS, SWAT, Critical path analysis, Gantt chart, MODA, communication plan, requirement matrix, time phase budget analysis, risk management, etc.
- Programming Languages – Python, JAVA, Database querying Language – SQL (intermediate), JavaScript Programming Tools - IntelliJ IDEA, Eclipse IDE, Anaconda - Jupiter Notebook, Google colab.
- Python Skills – NLTK, Scikit-learn, PyTorch, Pandas, NumPy, Matplotlib, TensorFlow.
- Data visualization and other tools - Excel, Power BI, Tableau, BigQuery
- Datasets – IMDB review, custom Covid-19 dataset, custom Nation's dataset, DAWN, fastMRI knee. Other – Agile and Docker container.
- Communication - English – Fluent, Hindi – Fluent, Marathi – Fluent, Japanese – Beginner

EDUCATION

- **Spring 2022 - Fall 2023 MS Computer Science** Dec 2023
University Of Arkansas, Fayetteville, USA, **GPA 3.9/4**
- **09- 2009 – 07-2013 Bachelor of Engineering Electronics**
KIT's College of Engineering - Shivaji University – Kolhapur, India. First class with distinction **65.5 %**

ACADEMIC PROJECTS

- **Project Management** – End-to-end development of the project - Backyard Renovation - using all PM tools and techniques)
- **Engineering Management** - EV Battery development - requirement management plan design
- **Machine Learning** – Positive or negative sentiment Analysis in IMDB movie review dataset by building ML models in Python.
- **Natural Language processing** – Chatbot design on Covid -19 question answering system using RASA-based framework.
- **Advanced Information Retrieval** – Cross-language IR using an LLM document translator for Hindi—English cross-IR.
- **Computer Vision** – On-road object detection in adverse weather conditions like snow, rain, fog, and sandstorms model YOLOv8.
- **Deep Learning** – Score-based generative models for accelerated MRI
- **Search Engine Website Designed** – <https://lil-find-engine-b796d4524a77.herokuapp.com/>

WORK HISTORY

1. **07-2024 – Current - SCM AI Intern Welspun USA**
Providing AI-based solutions to the Supply Chain team, like creating sales forecasting Models and designing AI chatbots.
2. **01-2023 – 12-2023 – Grading assistant**
Database Management Systems – University of Arkansas, Fayetteville.
3. **09-2019 - 04-2021 Senior Engineer - Technical Leader - Hella India Pvt. Ltd., Pune, Maharashtra**
Daimler: Star3 Gen1 Body control module Front (BCF)
Roles & Responsibilities - In the automotive realm, the Body Control Module (BCF) is a critical Electronic Control Unit (ECU) within vehicles, facilitating communication with other ECUs to regulate their functionalities. My role involves overseeing system testing for various ECU functions, including Seat Heating Ventilation, Interior and Exterior Lighting, and Diagnostic Testing while supporting team members. Additionally, I engaged with customers to address bugs, accommodate requirement changes, and deliver baseline reports. As part of my responsibilities, I conducted cross-functional meetings at the conclusion of each baseline and test cycle.
4. **10-2018 - 09-2019 Senior Engineer - Hinduja Tech Ltd., Pune, Maharashtra**
Client Location - Brose Pune - Geely NL3RB Power Operated Tailgate ECU
Roles & Responsibilities - POT ECU testing regulates and controls the tailgate's automatic opening and closing movement by driving spindle motors and latch. Testing with real loads. Communicating with customers to discuss issues and work packages.

5. **05-2014 – 10-2018 Junior Engineer - Senior Engineer - Behr-Hella Thermocontrol India Pvt. Ltd, Pune, Maharashtra**
Roles & Responsibilities -Testing of a climate control module panel and a black box. Review of requirements, writing and review of test specifications, and handling of inventory. Communicating with customers to discuss bugs and timelines.

PROJECTS

-
1. **Daimler BR213 & BR167 Blackbox** - dSPACE HIL testing with Python
 2. **Audi D5/C8 HMI Cap sensing panel** - Software Testing and overall project delivery **Freightliner DTNA 38N Panels** - UDS Diagnostic testing, CAN testing.
 3. **Porsche:** Panamera MSB Blackbox and panel - LIN 2.1 protocol testing **GWM Platform** - CAN 2.0, LIN2.0, UDS Testing
 4. **Geely NL3RB** - CAN 2.0, UDS Testing, Test Specifications writing.
 5. **TATA Vista FATC** - CAN 2.0, UDS Testing

CERTIFICATIONS

-
- 112-2023 University of Arkansas, Fayetteville's Certification in Engineering Management
 - Digital Product Management Specialization by University of Virginia
 - 11-2020 ISTQB Foundation Level Certification (Certification No. ITB-CTFL 00103639)
 - 01-2015 Japan Foundation's JLPT N5 (Certification No. N5A091182)

INTERNATIONAL EXPERIENCE

-
- Shanghai, China - November 2015 - 5 weeks for GWM platform project and colleague training
 - Lippstadt, Germany - June 2016 - 4 weeks for Advance HIL system training
 - Lippstadt, Germany - April 2017 - 2 weeks for Audi D5-C8 project and Audit

KEY STRENGTHS

-
- Proficient problem-solving abilities with a comprehensive approach.
 - Strong multitasking skills coupled with excellent time management.
 - Enthusiastic about continuous learning and adopting new tools, techniques, and skills.
 - Capable of excelling both independently and within collaborative team environments.
 - Skilled in effectively diagnosing and resolving complex issues.
 - Exceptional communication abilities for addressing customer concerns and resolving design issues promptly.

LEADERSHIP

-
- In a leadership capacity, I developed a cost-effective prototype design to test the HMI panel's inclination sensor for Audi D5/C8 projects. Faced with the absence of suitable testing infrastructure within the company, I established a dedicated setup, addressing a critical need and marking a significant milestone for the organization.
 - In another leadership role, I identified a proficiency gap in the ISO 14229 protocol within an ongoing project at Hindujatech Pvt Ltd. Recognizing the potential risk to the project's viability, I assumed the lead in implementing a comprehensive training program. Over the course of one week, I personally trained the entire software design and development department, comprising approximately 25 individuals, ensuring they were equipped with the requisite expertise to navigate the project's requirements effectively.
