PROFILE

Dynamic and detail-oriented Java developer with four years of hands-on experience in designing, implementing, and testing object-oriented applications across client/server, web services, and distributed environments. Adept at working with Core Java, J2EE technologies, Spring Framework, Hibernate, and web services, with a strong foundation in database modeling and PL/SQL development. Proven ability to collaborate in Agile and waterfall methodologies while delivering efficient, scalable solutions.

WORK EXPERIENCE

2021 - PRESENT

Bank of America, Charlotte, NC

Assistant Vice President

Pricing Application Development:

- Designed and developed an end-to-end pricing engine to calculate interest rates based on business line, relationship tier, geography, and product selection.
- Implemented web services using SOAP/REST for seamless request processing by using different API calls to get details of the product.
- Ensured optimal interest rate allocation by prioritizing higher-tier customers for better basis points.
- Migrated Java application into Angular application for enhancing the functionality for the user and .
- Developed an automated system using Spring Batch framework to process monthly maintenance fees for customers based on user type and privilege .
- Enabled automatic deduction of fees at the end of each month, streamlining financial operations.
- Codes solutions and unit test to deliver a requirement/story per the defined acceptance criteria and compliance requirements
- Participated in Continuous Integration and Continuous Deployment (CI/CD) workflows using tools such as Jenkins/GitHub Actions/Bitbucket Pipelines.

System Integration Testing (SIT) Support:

- Analyzed and resolved SIT cycle issues to ensure smooth upstream and downstream data flow.
- Collaborated with cross-functional teams, including testing and development, to diagnose and resolve system obstacles.
- Contributes to existing test suites (integration, regression, performance), analyze test reports, identify any test issues/errors, and triage the underlying cause

EDUCATION

2020 - 2021

CONNECTICUT STATE UNIVERSITY

- Master of Computer and Technology
- GPA: 3.8 / 4

2011 - 2015

PUNJAB TECHNICAL UNIVERSITY

- Bachelor of Electronics and Communication Engineering
- GPA: 3.8 / 4.0

SKILLS

LANGUAGES

- Core Java
- SQL
- Java,
- Linux
- J2EE

JAVA TECHNOLOGIES

- Servlets
- Spring
- JSP
- Hibernate
- JDBC

WEB SERVERS

- Web Sphere
- JBoss
- Web Logic

VERSION CONTROL TOOLS

- GIT
- SVN
- Git Hub
- CVS

Performance Testing & Optimization:

- Designed SQL scripts and stored procedures to conduct performance testing for batch jobs before production release.
- Identified abnormalities and optimized execution time to prevent job delays.

UI & Application Security Enhancements:

- Implemented UI enhancements, including automated email alerts with critical report details.
- Strengthened application security by integrating logic to protect integrity and resolve vulnerabilities.

Release & Deployment Management:

- Assisted with deployment activities, ensuring seamless production releases.
- Provided on-call support to address issues arising during deployment.
- Participating in Sprint Planning, Daily Scrum Stand Up and Sprint Retrospective meetings.
- Using Agile management tool, to gather business requirements and assisted in development and testing
- Analyzing business requirements, developed design analysis documents and provided high-level engineering design for overall modules and projects.
- Worked with configuring build tool Maven for the development and deployment.
- Participates in estimating work necessary to realize a story/requirement through the delivery lifecycle

BUILD TOOLS

- ANT
- MAVEN

METHODOLOGIES

- Agile (Scrum)
- Waterfall

LOGGING TOOLS

- Log4j
- MS Office
- JUnit

DATABASES

- SQL
- MYSQL

WEB SERVICES

- REST
- SOAP
