San Jose, CA | +1 (669) 240-9091 | priyanka.pandit@aogjob.com | [LinkedIn](#)

SUMMARY

- Data-driven Product and Business Intelligence Analyst with 4+ years of experience in delivering actionable insights, predictive modeling, and performance optimization across diverse industries including real estate tech, manufacturing, and SaaS.
- Proven track record of aligning data strategies with business goals to drive growth, improve operational efficiency, and support strategic decision-making.
- Skilled in developing machine learning models, automating data pipelines, and creating interactive dashboards to enhance visibility and engagement among stakeholders.
- Adept in tools such as Python, SQL, Tableau, Power BI, and Streamlit, with experience in A/B testing, KPI framework development, and real-time analytics. Brings a collaborative, cross-functional approach to solving complex business challenges and maximizing product value through data.

EDUCATION

Master of Science in Business Analytics The University of Texas, Dallas	May – 2024 TX, USA
Bachelor in Computer Science Visvesvaraya Technological University	September – 2020 Karnataka, India

PROFESSIONAL EXPERIENCE

Data Analyst Pippin Title Inc., New York, USA • Developed machine learning models to classify title search services, reducing quote generation time and improving operational efficiency by 40%. • Designed predictive pricing models incorporating customer behavior and market trends to enhance pricing accuracy and profitability. • Integrated external data through web scraping to enrich model inputs, improving prediction quality and supporting real-time insights. • Applied regression techniques and feature engineering using Scikit-Learn and XGBoost to optimize pricing estimates across property and search types. • Streamlined the quote process by automating data pipelines, enabling real-time pricing predictions and improving team productivity. • Optimized user engagement by building internal dashboards and advanced tracking in Streamlit and Excel, resulting in increased tool adoption and stakeholder visibility. • Developed and aligned KPI frameworks with business objectives, improving visibility into model accuracy, turnaround times, and performance metrics.	October 2024 – Present
Data Analyst Asahi Kasei Plastics North America, Inc., Fowlerville, MI • Strategized and executed sprint cycles, achieving 100% completion rates while reducing launch timelines. Designed and implemented comprehensive data validation strategies for software and BI applications using SQL, ensuring data accuracy, consistency, and integrity. • Executed continuous monitoring of ETL processes, employing SQL, Python, and JIRA to track and resolve issues. Delivered data-driven insights and business solutions through advanced analytics and executive presentations. • Developed and refined clustering models and predictive algorithms to optimize resource allocation. • Created interactive dashboards visualizing stewardship patterns, offering actionable insights for improved decision-making.	June 2023 – October 2023
Data Analyst Wavelabs Technologies, Hyderabad, India • Led stakeholder meetings with product, marketing, and business teams to gather requirements, present data insights, and ensure alignment with business goals, driving data-driven decision-making. • Developed and presented A/B test results using Tableau, offering insights into audience segmentation, traffic patterns, and product feature success, enabling informed decisions on product improvements. • Designed and maintained key business metric dashboards in Tableau, providing real-time updates on KPIs like conversion rates and user engagement for product and marketing teams. • Conducted ad-hoc data analysis with SQL and Python to answer stakeholder queries, providing timely insights on product performance and customer metrics. • Automated reporting workflows to enhance the speed and accuracy of data delivery, reducing manual effort and improving key performance tracking for stakeholders. • Collaborated with senior management to provide forecasts and performance analysis reports, guiding long-term product strategy and supporting strategic planning through clear, data-driven recommendations.	August 2021 – June 2022
Data Analyst (Product) Interact Infotech, Bangalore, India • Facilitated cross-functional stakeholder meetings, collaborating with product managers, business leads, and marketing teams to define data analysis requirements and align with business objectives, ensuring clear communication and delivery of insights. • Created and maintained interactive dashboards using Tableau and Power BI, allowing stakeholders to visualize key business metrics such as product adoption, conversion rates, and customer satisfaction, driving data-informed decisions. • Presented complex data insights to executive leadership, translating analytics into actionable recommendations that shaped product development strategies and optimized the user experience. • Collaborated with stakeholders to define success metrics for product launches and implemented real-time reporting solutions using SQL and Google BigQuery, offering immediate visibility into KPI performance. • Delivered periodic performance reports to C-level stakeholders, covering financial metrics, user engagement trends, and product growth, helping prioritize key areas for business development. • Automated routine reporting workflows with Google BigQuery and SQL, reducing turnaround time for data insights and improving access to up-to-date performance metrics for stakeholders.	May 2020 – August 2021

SKILLS & OTHER

Methodologies:	Software Development Life Cycle (SDLC), Agile/ Scrum, Waterfall, Kanban.
Documentations:	FRD, BRD, SRS, Test Plan, User Guide, User stories, Use Cases.
Project Management Tools:	MS Office Suite (MS Project, MS Excel, MS SharePoint, MS Power Point, MS Visio), JIRA, Confluence.
Analysis Skills:	Data Analysis, A/B Testing, Hypothesis Testing, Cost/Benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis.
Languages:	SQL, Python, SAS, R, SCALA.
BI & Data Management Tools:	MSSQL Server, MySQL, Tableau, Microsoft Power BI, Snowflake, SSRS.
Other Tools:	Tableau, Power BI, Advanced Excel, Microsoft PowerPoint, Jira, CRM, Slack, Anaplan, Alteryx, Google analytics, Adobe analytics
Cloud:	Docker, AWS (Redshift, Athena, Glue, PageMaker, S3), Azure (Databricks), GCP
Soft Skills:	Sprint planning, Stakeholder management, Project management, Conflict resolution, Time management, Leadership, Problem-solving, Negotiation, Decision-Making, Documentation, Presentation, Verbal communication.

CERTIFICATIONS

- Anaplan level 1 Model Building
- Anaplan Level 2 Model Building
- IBM Data Science Certificate
- Meta Marketing Analytics Google Analytics Individual Qualification
- IBM Generative AI: Prompt Engineering
