EDUCATION

Northeastern University, Boston, MA

Master of Science in Computer Science

Sep 2023 - May 2025

Atharva College of Engineering, Mumbai, India

Bachelors of Engineering in Information technology

Aug 2019 - May 2022

TECHNICAL SKILLS

Programming Languages:	Python, Java, JavaScript, TypeScript, C++, Go, C#
Web Technologies:	React, Angular, Node.js, Express.js, HTML5, CSS3, Bootstrap, Ruby on Rails
APIs & Services:	REST APIs, GraphQL, JSON, Spring Boot
Databases & Storage:	PostgreSQL, MongoDB, MySQL, Redis, SQL Server
Cloud & DevOps:	AWS, Docker, Kubernetes, Jenkins, Git, CI/CD Pipelines, GCP
AI/ML:	Pandas, NumPy, TensorFlow, Apache Kafka, Elasticsearch

EXPERIENCE

Merkle inc. - Software Engineer

Apr 2022 - Aug 2023

- Designed and deployed four independent, scalable microservices using Java and Spring, each handling over 1,000 requests per second, ensuring high availability and optimal performance for critical business functions
- Engineered and optimized **RESTful APIs**, improving response time by **40%** using **Redis caching and query optimization**
- Established CI/CD workflows using Git and GitHub, Jenkins ensured seamless deployment, testing and version control which reduced manual intervention by 60% and shortened release cycles.
- Collaborated with cross-functional teams to integrate 5 third-party APIs, reducing manual data processing by 30% and improving workflow efficiency
- Constructed a **real-time analytics dashboard** with **React.js, D3.js, and PostgreSQL**, increasing system efficiency by **25%**
- Participated in all stages of the SDLC, improved system scalability, reduced deployment time, enhanced security and performance

Merkle inc. - Summer Software Intern

May 2021 - Aug 2021

- Created 2 responsive web applications using React, Angular, and Node.js, achieving 95% cross-browser compatibility and mobile responsiveness.
- Delivered features in 2-week sprints using Agile methodology, maintaining 95% on-time completion rate
- Conducted 150+ code reviews resulting in 30% improvement in code quality metrics and 25% reduction in production bugs
- Integrated RESTful APIs with cloud services, supporting architecture that scaled to handle 3x traffic increase

The Sparks Foundation - Python developer Intern

June 2020 - Aug 2020

- Developed a **supervised ML model** using **Python, Pandas, and Scikit-learn** processing **50,000+ data points**
- Achieved **91.57% accuracy** through data preprocessing and statistical optimization, conducted **data analysis and visualization** using **Matplotlib and Seaborn**

ACADEMIC PROJECTS

VisaMate- AI Agent

- Built a RAG assistant using OpenAI GPT-4 and Hugging Face to generate context-aware, source-grounded visa guidance with 85% accuracy across 100+ test queries
- Formulated a scalable pipeline for **text extraction, chunking, and embedding generation**, with vector storage in **Pinecone**
- Executed LLM-based response generation with real-time context injection and source attribution, achieving 3-5 second responses
- Improved **system reliability** with **fallback handling** and enhanced **explainability** for better **user trust**

Voice4Rights - Full-Stack Web Application, Northeastern University

- Constructed web platform using Node.js, Express, React, and Angular achieving 95% mobile responsiveness score
- Launched cloud-based microservices architecture with AWS Lambda and API Gateway, achieving 99.9% availability
- Designed RESTful APIs for real-time data exchange and integrated **Stripe payment** gateway
- Optimized **MongoDB queries through indexing**, reducing data retrieval time from **2 seconds to 500ms**
- Leveraged Google BigQuery for advanced analytics and data processing

Revisis, Atharva College of Engineering

- Worked in a team of three and successfully implemented a project that performs sentiment analysis using **Natural Language Processing (NLP)** techniques to evaluate sentiment in news headlines by Thomson Reuters
- Achieved 85% sentiment classification accuracy using Java, CoreNLP Library, HTML, CSS, SQL, and Bootstrap to create comprehensive analysis system

CERTIFICATIONS

- AWS Fundamentals (Specialization- 4 courses) • Amazon Web Services(Coursera)
- Python for Everybody (Specialization- 5 courses) • University of Michigan (Coursera)
