

PRIYANKA VANGA

DATA ANALYST

Location: AL | Phone: 7373366220 | Email: priyankavanga2@gmail.com | [Linkedin](#)

PROFESSIONAL SUMMARY

- Experienced **Data Analyst** with around **5 years** of expertise in analyzing and interpreting complex datasets to drive data- driven business decisions.
- Proficient in **Python, R, and SQL**, using libraries such as **NumPy, Pandas, Matplotlib, SciPy, ggplot2**, and **dplyr** for deep analysis, wrangling, and visual storytelling.
- Skilled in **Tableau, Power BI, Excel**, and **Google Analytics** for building clear, actionable dashboards; experienced with **MySQL, PostgreSQL, and SQL Server** to ensure data integrity and accessibility.
- Hands-on experience with AWS and Azure, developing scalable data pipelines and models; knowledgeable in **A/B testing, data mining, and Agile/Waterfall SDLC** practices to deliver high-impact insights efficiently.

TECHNICAL SKILLS

Languages	: Python, SQL, R
Data Visualization	: Tableau, Power BI, MS Excel (VLOOKUPS, Pivot tables, Macros, VBA)
Big Data/Database	: MySQL, MongoDB, PostgreSQL, AWS Redshift, Oracle, SQL Server, SSIS, SSAS, ETL
Cloud Technologies	: AWS (S3, EC2, Redshift, Lambda, IAM, Glue), Google Cloud Platform (BigQuery, Dataflow), Azure Data Lake
Other Tools	: Data Warehousing, Data Governance, Data Modeling, Predictive Analytics, Data Mining, Automation Scripts
Version Control	: Git, GitHub, SVN, Bitbucket
Platform/Library	: NumPy, Pandas, NLTK, Matplotlib, Scikit-learn, SciPy, Seaborn, Plotly
Methodologies	: SDLC, Agile, Waterfall, Scrum, Jira
Operating Systems	: Linux, Windows, Mac

PROFESSIONAL EXPERIENCE

Sr. Data Analyst

JPMorgan Chase & Co, AL

May 2025 – Current

- Built enterprise-scale data pipelines with **AWS Glue, Lambda**, and **S3** to process 5M+ financial transactions daily, reducing reconciliation report latency by 30 minutes; migrated legacy reports to Redshift and MongoDB, streamlining performance tracking and eliminating manual Excel workflows.
- Developed **Tableau** dashboards to monitor fraud, churn, and account metrics across 10+ products; used **Python (Pandas, NumPy)** and **SQL** for data transformation, enhancing credit risk model accuracy; applied NLP (**NLTK, TextBlob**) to customer feedback for product insights.
- Designed and maintained data pipelines in **Snowflake** and **Oracle**, ensuring seamless **ETL** processes and high-quality data integration for business reporting.
- Implemented anomaly detection models with **Scikit-learn** and Seaborn to flag fraud cases; collaborated with **AML**, compliance, and credit teams via **Jira** in **Agile** sprints; documented **data models** and **governance** in Confluence to support audit readiness and onboard 4 analysts.

Data Analyst

McAfee, AL

Feb 2025 – Apr 2025

- Automated security log ingestion using **AWS Lambda, Glue**, and **Redshift**, reducing manual triage by 12 hours/week; optimized **Redshift/PostgreSQL** queries and built Power BI dashboards for global threat KPIs.
- Analyzed 3M+ endpoint logs with Python (Pandas, NumPy, and Seaborn) to identify 6 threat vectors; applied **Scikit-learn** for intrusion forecasting and used **NLP (NLTK, TextBlob)** to classify phishing alerts.
- Led cross-team sessions via Jira to improve anomaly detection in 4 tools; documented workflows in **Git/Confluence** to streamline onboarding and ensure audit traceability.

Business Data Analyst

McKesson, AL

Aug 2024 – Feb 2025

- Analyzed complex datasets with **SQL** to extract critical business insights, facilitating cross-departmental, data-driven decision-making and supporting strategic initiatives.
- Developed interactive Tableau dashboards for **KPI** visualization, enhancing operational visibility and providing real-time insights for senior stakeholders.
- Implemented data warehousing solutions on **AWS Redshift** and **Google BigQuery**, optimizing data storage, retrieval, and accessibility to support robust analytical workflows.
- Conducted predictive analytics using **Python** and **R**, helping business units anticipate market trends and make informed strategic adjustments.
- Built and maintained **ETL pipelines using SSIS and Talend**, ensuring consistent data flow, integration, and accuracy across multiple systems.
- Streamlined **data validation** and quality assurance through Python automation, improving data accuracy, reducing manual error-checking, and enhancing workflow efficiency.

- Collaborated with cross-functional teams to align data reporting with organizational goals, leading to increased efficiency and project success across various business units.

Data Analyst - Center for Disability Notetaker
Auburn University Montgomery, AL

Jun 2023- May 2024

- Supported students in Cloud Computing and Big Data Analysis by managing **AWS, Azure-based** course projects and documenting technical concepts; facilitated practical learning in **HTML5, CSS3, AngularJS, MySQL, and MongoDB** through structured notes and experiments.
- Applied Python (**NumPy, Pandas**) and R (**ggplot2, dplyr**) for data analysis, wrangling, and visualization; built Power BI and Excel dashboards with advanced charting to present actionable insights; managed **PostgreSQL** databases with a focus on security and performance.
- Developed data pipelines using Azure Databricks and Data Lake Storage; **executed A/B testing** and data mining for strategic insights; participated in **Agile/Scrum** workflows to align deliverables with stakeholder goals.

Data Analyst
KPMG, India

Mar 2020 – Jul 2022

- Led development of **data-driven CRM** and **sales performance solutions** using **Power BI** and **SQL**, delivering actionable insights into **customer behavior** and **market trends** that informed business strategy.
- Enhanced **SQL query efficiency** in **PostgreSQL** and **AWS Redshift** for high-frequency reporting, enabling faster **data retrieval** and supporting real-time decision-making across departments.
- Built **data models** and created **automated reporting workflows** in **Azure Data Lake** and **Azure Databricks**, reducing manual reporting time and ensuring accuracy and consistency in data delivery.
- Leveraged **data mining techniques** to identify patterns in customer behavior, supporting targeted **marketing strategies** and increasing campaign precision through customer segmentation insights.
- Collaborated with cross-functional teams to establish **data governance policies** and **compliance standards**, enhancing **data security** and minimizing risk across systems.
- Utilized **Azure Data Lake** and **Databricks** for **scalable data storage** and integration, streamlining data workflows and ensuring compatibility with **business intelligence** tools.
- Analyzed complex datasets using **Python (Pandas, NumPy)** to interpret sales trends and customer behavior, supporting **sales** and **marketing** decision-making with accurate, data-backed insights.
- Developed interactive **Power BI dashboards** to present **KPIs** and sales metrics to stakeholders, optimizing visibility into performance trends and improving data accessibility across teams.

Data Analyst Intern
Cipla, India

Sep 2019 – Feb 2020

- Assisted in designing data models and **Tableau dashboards** to track pharmaceutical product performance and inventory levels.
- Conducted **data analysis** on production data to provide insights for **inventory optimization** and process improvement.
- Implemented **ETL pipelines** using Python, ensuring timely data availability for analysis and reporting needs.
- Formulated **SQL queries** for data retrieval and reporting, supporting the production and supply chain teams.
- Improved data accuracy by implementing **data cleansing** techniques, reducing reporting errors and enhancing decision-making.
- Coordinated with team members to ensure seamless data flow and integration across systems, supporting consistent data quality.
- Pioneered interactive **Tableau reports** to visualize KPIs and track production metrics, contributing to data-driven decisions in inventory management.

PROJECTS

- Predictive Analysis of Heart Attack Risks Using Data Mining Methods | RapidMiner, Jupyter Notebook, Python**

 - Leveraged a predictive heart attack model using machine learning and data analytics tools like RapidMiner.
 - Analyzed and preprocessed healthcare data to optimize model accuracy for early intervention and personalized healthcare.
- Website development**

 - Designed and developed a responsive website, *Vampires and Werewolves*, using **HTML5, CSS, JavaScript, and PHP**, providing in-depth content on vampire and werewolf lore.
 - Created interactive elements, including buttons, external links, embedded videos, and a navigation menu, enhancing user engagement and accessibility.
 - Directed Python-based analysis to evaluate service providers’ trustworthiness, leveraging data for informed online network recommendations.

EDUCATION

Master of Science in Computer Science Auburn University at Montgomery	Aug 2022– May 2024 Montgomery, Alabama
Bachelor of Technology in Computer Science St. Mary’s Group of Institutions	Jul 2017 – Jun 2021 Hyderabad, India

CERTIFICATIONS

- Certified in Python
