

PRIYANKA BINNE
Sr. Full Stack Java Developer
Dallas, Texas | +1 (940)-843-5280 | pbinne2102@gmail.com | [linkedin.com/in/priyankabinne](https://www.linkedin.com/in/priyankabinne)

EDUCATION:

Master of Science in Computer Science

University of North Texas, Denton, Texas

Aug 2023 - May 2025

Bachelor of Science

Jawaharlal Nehru Technological University, Hyderabad (JNTUH)

July 2016 – Sep 2020

PROFESSIONAL SUMMARY:

Results-driven Sr. Full Stack Java Developer with **6 years of experience** designing, developing, and optimizing **scalable backend systems, RESTful APIs, GraphQL APIs, and cloud-native microservices**. Proficient in **Java (8/11/17), Spring Boot, Hibernate, Thymeleaf, and JavaScript**, with strong expertise in **API development, database optimization** (PostgreSQL, MySQL, MongoDB), and **CI/CD pipelines**. Skilled in **Docker, Kubernetes, AWS (EKS, EC2, S3), GCP, and Terraform** for containerization and cloud deployments. Experienced in delivering high-impact solutions across **Healthcare, EdTech, and SaaS industries**, with hands-on expertise in **full stack development, CI/CD automation, and cloud platforms (AWS, GCP)**. Adept at working in **Agile teams**, leading **end-to-end projects**, and mentoring junior developers.

SKILLS:

- **Languages:** Java (8/11/17), C++, Python, SQL, JavaScript, Node.js
- **Frameworks:** Spring Boot, Spring MVC, Spring Cloud, Spring Security, Hibernate, JPA, gRPC
- **Frontend/UI:** Thymeleaf, HTML5, JavaScript (basic), Bootstrap, UI Design, Cookies Management
- **Microservices & APIs:** Microservices Architecture, RESTful APIs, GraphQL APIs, OpenAPI/Swagger
- **Messaging/Streaming:** Apache Kafka, RabbitMQ
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, NoSQL, Oracle
- **DevOps/Cloud:** Docker, Kubernetes, AWS (EKS, EC2, S3), GCP, Jenkins, GitHub Actions, ArgoCD, Terraform, CI/CD Pipelines
- **Tools:** Git, GitHub, Bitbucket, Jira, Confluence
- **Testing:** JUnit, Mockito, REST Assured, Postman, SonarQube, TestNG
- **Development Practices:** Agile, Scrum, Test-Driven Development (TDD), GitOps, Pair Programming
- **Other:** E-Commerce Integrations (Payment Gateways, Session Management), Logging/Monitoring Tools (Prometheus, Grafana, ELK Stack, Loki)

WORK EXPERIENCE:

Full Stack Java Developer (Contract)

Kanda Software | Remote, USA

Jun 2024 – May 2025

Cloud-Native Microservices | Backend APIs | Performance Optimization

- Built cloud-native **microservices** in **Java 17 (Spring Boot)** with frontend integration via **Thymeleaf** and REST APIs.
- Implemented **RBAC security** using **Spring Security and OAuth2** for secure user access management.
- Improved API performance by **40%** through **Redis caching** and JVM tuning (G1GC, thread pooling).
- Automated infrastructure provisioning and deployments on **AWS EKS** using **Terraform** and **GitHub Actions + ArgoCD**.
- Optimized **PostgreSQL** schemas and indexes (BRIN, partitioning) for analytics queries, improving performance by **60%**.
- Integrated full-stack observability using **Prometheus, Grafana, Loki** for proactive monitoring and faster MTTR.
- Conducted performance/load testing with **JMeter** (10K+ concurrent users) to ensure scalability.

Tech Stack: Java 17, Spring Boot, Thymeleaf, PostgreSQL, Redis, Docker, Kubernetes, AWS EKS, GitHub Actions, ArgoCD, Prometheus, Grafana, JMeter, Terraform

Paninian Pvt Ltd, India

Sep 2020 – Jul 2023

Sr. Software Engineer (Full Stack & Backend Development)

- Developed **end-to-end web applications** for **medical imaging systems** using **Java (Spring Boot, Hibernate)** for backend and **Thymeleaf, HTML5, and JavaScript** for frontend templates.
- Designed and implemented **scalable microservices** to process **high-volume DICOM medical imaging workflows**, integrated with **Orthanc PACS** via **RESTful APIs**.
- Engineered **dynamic UI components** for **patient data management** and **diagnostic image access**, improving clinical workflows and operational efficiency.
- Optimized **PostgreSQL schemas** and tuned complex queries, reducing backend query latency by **40%**.
- Conducted in-depth **backend performance tuning** with **Spring Actuator** and **JProfiler**, decreasing API response times by **40%**.
- Ensured **HIPAA** and **GDPR compliance** by applying **AES-256 encryption, TLS 1.3**, and audit logging across backend and frontend layers.
- Containerized full stack applications using **Docker**, orchestrated on **Kubernetes**, and deployed on **AWS/GCP** environments with monitoring via **Prometheus** and **Grafana**.
- Built automated **CI/CD pipelines (Jenkins, GitHub Actions, Terraform)** to streamline testing, integration, and deployments, reducing release cycles by **40%**.
- Created a **C++-based desktop imaging tool (ITK/VTK with Qt)** for advanced **medical image segmentation**, integrated with backend APIs for reporting automation.
- Led **cross-functional collaboration** between **backend, frontend, QA, and DevOps teams** to deliver integrated features in **Agile sprints**.
- Designed and optimized backend APIs with complex **data structures** and **algorithms** to improve performance.
- Collaborated with QA teams to implement automated testing using **Selenium** and integrated tests into **CI/CD pipelines**.
- Enhanced e-commerce backend features, including payment **gateway integrations** and **cookie/session management** for user personalization.
- Mentored junior developers on **Java backend, frontend integration, CI/CD best practices**, and **DICOM/HL7 healthcare standards**.

Tech Stack: Java 8/11/17, Spring Boot, Hibernate, Thymeleaf, HTML5, JavaScript, PostgreSQL, Docker, Kubernetes, AWS/GCP, Jenkins, GitHub Actions, Terraform, C++, ITK/VTK, Qt

Software Developer (Full Stack & Backend)

Unacademy | Hyderabad, India

Aug 2018 – Aug 2020

EdTech Platform | Backend APIs | Live Class Solutions | Full Stack Development

- Developed backend services using **Java (Spring Boot)** and **Node.js**, supporting **500K+ users**.
- Built frontend components using **Thymeleaf, HTML5, and JavaScript** for web dashboards and admin portals.
- Designed **RESTful APIs** and **GraphQL APIs** for mobile and web clients, improving payload efficiency by **30%**.
- Engineered **WebRTC-based signaling backend** for live classes, reducing connection time to under **200ms**.
- Optimized **MongoDB** and **MySQL** queries, reducing API latency by **60%**.
- Automated deployments using **Jenkins, Docker**, reducing release time from **2 hours to 20 minutes**.
- Integrated payment gateways (**Razorpay, PayPal**) via webhooks, reducing transaction failures by **22%**.
- Set up logging/monitoring tools (**ELK Stack, Prometheus**) to improve system observability.
- Collaborated in **Agile** sprints with product managers, UI/UX designers, and QA engineers for end-to-end delivery.

Tech Stack: Java 8/11, Spring Boot, Node.js, Thymeleaf, HTML5, JavaScript, MySQL, MongoDB, Redis, WebRTC, Docker, Jenkins, GitHub, ELK Stack, GraphQL

CERTIFICATIONS & COURSES

- Docker Certified Associate – **Simplilearn**
- AWS Technical Essentials – **Simplilearn**
- CI/CD Pipeline with Jenkins – **Simplilearn**
- Oracle Cloud Infrastructure (OCI) Developer Professional 2025
- Microservices Architecture: The Complete Guide – **Udemy**
- Software Architecture & Design of Modern Large-Scale Systems – **Udemy**
