

Priyanka J

priyankajagarapu999@gmail.com | +1 (315)-244-4601 | Potsdam, NY, USA | [LinkedIn](#) | [Paper Publications](#)

SKILLS

- **Technologies:** React, Node.js, Express.js, Spring Boot, Django, JSON, Servlets, Linux, Network protocols
- **Programming:** Python, SQL, Java Script, HTML, CSS, R
- **Databases:** MySQL server, Oracle, MongoDB, Snowflake, Teradata
- **Business Intelligence Tools:** Tableau, Power BI, Excel
- **Cloud:** Microsoft Dynamic 365, AX2009, AWS (EC2, S3, Lambda)

EDUCATION

MS in Computer Science

[Clarkson University, Potsdam, NY](#) | 3.26/4 CGPA

Aug 2023– May 2025 | New York, USA

Bachelor's in Computer Science Engineering

[Lendi Institute of Engineering Technology](#) | 8.4/10 CGPA

Aug 2017 – May 2021 | Andhra, India

WORK EXPERIENCE

Clarkson University | Potsdam, New York

Aug 2023 – May 2025

Roles: Graduate Assistant –Data Warehousing| New York

- **Project: DV-Hop Localization with Critical Conditions in NS3**

Technologies: NS3, Linux, Network Protocols

Implemented the **DV-Hop localization protocol** in NS3, simulating node localization in wireless sensor networks with dynamic environmental hazards. Added features to model critical conditions, such as varying ranges of environmental hazards, affecting node performance and network reliability. Analyzed simulation results to evaluate localization error, packet loss, and node status under both normal and critical conditions.

- **Projects: Weather API**

Technologies: React.js, JavaScript, Python, MySQL

Developed a Weather API with a responsive frontend using React.js and JavaScript, and a backend powered by Python and MySQL to fetch and store real-time weather data. Integrated API endpoints to deliver accurate weather information based on user inputs.

- **Project: Efficient Analysis of Driver's Drowsiness Using ML & Iot**

Technologies: OpenCV, Dlib | Published Paper

Developed a **drowsiness detection system** using a **night vision camera** and **KNN algorithm** to monitor driver alertness in real-time. The system detects signs of drowsiness by tracking eye movements and alerts the driver, accordingly, enhancing road safety. Implemented for use in **ride-hailing services** (e.g., OLA, UBER) and **heavy vehicle transportation**. Focused on providing an efficient, low-cost solution to prevent accidents caused by drowsy driving.

Accenture Solutions | Hyderabad | India

Sept 2021 – Aug 2023

Roles: Application Development Analyst (Supply chain Management | Technical Developer)

Project: IT Transformation App Management

Client: MM (Mayr-Melnhof Karton)

- I am an experienced Dynamics 365 Finance & Operations (F&O) professional with a strong background in customizing and integrating Dynamics AX2009 and Dynamics 365 to meet business needs. I've worked on improving supply chain processes, ensuring smooth system upgrades and migrations, and providing technical support and training. I've also created detailed reports using Power BI to help leadership make better decisions.
- Additionally, I've resolved high-priority issues quickly and efficiently, preventing disruptions in operations. I'm skilled in troubleshooting complex problems, creating solution documentation, and training new team members, all while improving workflow efficiency and client satisfaction.

CERTIFICATIONS

- AWS Certified Developer - Associate
- Microsoft Certifications, SC900, AZ900
- NPTEL COURSE in R programming, Certification with 83%
- NPTEL COURSE in DBMS (data base management system), Certification with 81%
- Salesforce Admin Super Badges like Security Specialist, Lightning Experience Reports and Dashboards Specialist, Business Administration Specialist
