

Priyanshu Rastogi

Software Engineer [Python] | (347) 509-5795 | priyanshunyc25@gmail.com | Jersey City, NJ | [LinkedIn](#)

Summary

Software Engineer with over **5 years** of experience in developing scalable applications using **Python and JavaScript**. Proficient in **AWS and SQL**, with a proven track record of leading cross-functional teams to deliver high-quality software solutions. Notable achievements include architecting **RESTful APIs** that enhanced system efficiency by **25%** and optimizing **database queries** to reduce data retrieval times by **30%**. Seeking to leverage technical expertise and leadership skills in a dynamic tech environment.

Skills

- **Programming Languages:** Python, JavaScript, C#.
- **Web Technologies:** HTML5, CSS3, Django, Flask, React.js, Node.js.
- **Databases:** MySQL, PostgreSQL, MongoDB, SQLite.
- **Cloud Platforms:** Amazon Web Services (AWS), GCP, Azure.
- **DevOps Tools:** Git, Docker, Kubernetes, Jenkins, Terraform.
- **Testing Frameworks:** JUnit, PyTest, Selenium.
- **Operating Systems:** Linux, Windows, macOS.
- **Version Control Systems:** Git, Subversion (SVN).
- **Containerization and Orchestration:** Docker, Kubernetes.
- **Continuous Integration/Continuous Deployment (CI/CD):** Jenkins, Travis CI.
- **IDEs and Text Editors:** Visual Studio Code, PyCharm, IntelliJ IDEA, Sublime Text.
- **Networking Protocols:** HTTP/HTTPS, TCP/IP, RESTful APIs.
- **Security Practices:** Encryption, Cryptography, SSL/TLS.
- **Agile Methodologies:** Scrum, Kanban.

Education:

- Masters Degree, Pace University, NEW YORK
- AWS Certified Developer – Associate

Professional Experience

Software Engineer | Elevance Health – USA | Jul 2024 – Current

Description: At Elevance Health, I am responsible for developing and maintaining high-performance healthcare applications aimed at improving patient data management and streamlining insurance processes.

Responsibility:

- Designed and implemented **RESTful APIs** using **Python and Django**, enhancing data accessibility for **React.js frontend applications**, leading to a **25%** increase in system efficiency.
- Optimized **PostgreSQL** database queries, reducing data retrieval times by **30%**, significantly improving overall application performance.
- Deployed applications using **Docker and Kubernetes**, collaborating with **DevOps** teams to ensure scalable and reliable services across multiple environments.
- Integrated **AWS services** such as **S3 and Lambda**, improving application functionality, scalability, and performance.
- Automated **CI/CD pipelines** using **Jenkins and Terraform**, reducing release times by **40%** and ensuring smooth deployment cycles.
- Developed **React.js** frontend components to create dynamic and responsive user interfaces, enhancing the overall user experience.
- Implemented **SSL/TLS** protocols and performed regular security assessments, strengthening application security and compliance.
- Developed and executed **unit and integration tests** using **Selenium and PyTest**, ensuring high software quality and reducing production defects.
- Worked in a **Linux**-based development environment using **Git and Visual Studio Code**, streamlining workflows and improving collaboration.

Software Engineer | Infosys – IND | Aug 2018 – Dec 2022

Description: Contributed to various client projects, developing custom software solutions across finance and retail sectors.

Responsibility:

- Developed and deployed scalable backend services using **Python, Flask, and AWS**, integrating **RESTful APIs** to enhance system interoperability and data processing.
- Designed and optimized **MySQL** database **schemas and queries**, leveraging **SQL**, improving data retrieval performance by **20%**.
- Automated **CI/CD pipelines** with **Jenkins, Docker, and AWS, Cloud Build**, reducing deployment time by **50%** and ensuring smooth production rollouts.
- Implemented secure **authentication and authorization** using **JWT, Flask Security, and AWS IAM**, ensuring robust access control and compliance with security best practices.
- Conducted unit testing with **JUnit**, managed **version control with Git**, and integrated **AWS services** like **S3 and EC2** to enhance application reliability and performance.
