EDUCATION

New Mexico State University, Las Cruces, NM

August 2020- December 2025

Bachelors in Information & Communication Technology, GPA 3.46

- Graduate minor in Computer Technology
- Graduate minor in Cybersecurity
- **Relevant Coursework:** Network security, Information Security, Windows Enterprise Admin, Computer Network I, Software Tech II, Linux, Digital Forensics, IP Protocols, Java, Python Programming, Computer Science, Database Design, Cyber Defense, Cryptography, Routing & Switching, Networking, Networking, IT support.

TECHNICAL SKILLS

- **Networking & Systems:** Windows Server 2022, TCP/IP, VLANs, Routing & Switching, Ethernet Cable Termination, Virtualization
- **Operating Systems:** Windows OS, Linux OS
- **Technical Tools:** Wireshark, Computer Diagnostics, Data Recovery
- **IT Support & Maintenance:** Helpdesk Operations, Hardware & Software Installations, System Maintenance, Technical Troubleshooting
- **Programming:** Python, Java
- **Professional Skills:** Customer Service, Teamwork, Active Listening, Problem Solving

Certifications

CompTIA Network+

EXPERIENCE

Local Tech, Las Cruces, NM

January 2023 -January 2024

Computer Technician Assistant

- Diagnosed and repaired desktops and laptops to restore functionality and improve performance.
- Upgraded hardware components, including RAM and SSDs on 30+ workstations to improve performance and reliability.
- Communicated with customers to assess technical needs and provide recommendations
- Installed and configured Windows OS, device drivers, and added antivirus tools on client machines, ensuring secure and fully functional systems.

Heaven Technology, Las Cruces, NM,

August 2021-March 2022

IT Assistant

- Provided technical support to non-technical users, explaining computer concepts in a way they could understand.
- Assisted with task tracking and maintained records of daily activities.
- Served as the first point of contact for clients, greeting visitors and helping them.

PROJECTS

- **Network Home lab Self-Built** - Designed and implemented a virtual home lab using Oracle VirtualBox with Windows Server 2022 and Linux VMs. Configured server roles such as Active Directory, DHCP, DNS, and IIS to simulate enterprise environments, while practicing network configuration with routers, switches, VLANs, and static routes. Troubleshot connectivity and hardware/software issues, tested security measures including firewalls, access controls, and vulnerability scanning, and assembled Ethernet cables (straight-through and crossover) to support lab operations.
-
