SUMMARY

Software Engineer with 3+ years of experience in Java, Python, and JavaScript, skilled in building scalable web solutions, RESTful APIs, and microservices. Proficient in Spring Boot, AWS, and database management, with a focus on system optimization and delivering high-quality, business-driven solutions.

EXPERIENCE

PNC

Feb 24 - Current

Software Engineer

- Engineered and deployed 5+ RESTful microservices using Spring Boot and Docker, reducing API response latency by 20% and enhancing data exchange efficiency for financial transaction processing.
- Enhanced online banking UI responsiveness by developing Angular/JavaScript components, increasing user satisfaction by 10%.
- Implemented AWS Lambda functions and S3 storage solutions, achieving a 30% reduction in server maintenance overhead and scaling cloud infrastructure to support 200,000+ daily financial document uploads/downloads.
- Collaborated in Agile Scrum teams, delivering 95% of sprint commitments and contributing to a consistent bi-weekly release cycle for banking software updates.
- Refactored legacy Java Hibernate code, increasing application stability for core banking systems by 25% and reducing critical production bugs by 18%.

Neon IT Systems

Feb 2020 – Jul 2022

Software Engineer

- Designed and deployed high-throughput Spring Boot microservices, handling 100,000+ transactions per minute and reducing data processing latency by 40%.
- Developed end-to-end React.js web applications, improving user engagement by 25% and streamlining complex financial data visualization.
- Optimized PostgreSQL and MongoDB databases, reducing query execution times by 30% and enhancing low-latency performance for critical financial reporting.
- Automated data extraction and cleaning workflows using Python, saving 200+ hours per month in manual data processing and reducing data errors by 15%.
- Implemented Spring Data Framework (JDBC/ORM) for robust transaction processing, ensuring 100% data integrity and reducing data inconsistency issues by 22%.
- Integrated AWS (EC2, S3) for scalable data storage and processing, reducing infrastructure costs by 18% and improving system reliability.
- Improved front-end application speed by 28% through robust TypeScript module development.
- Designed and implemented CI/CD pipelines using Jenkins and Docker, automating software builds, tests, and deployments, reducing release cycles by 50% and improving deployment frequency.

TECHNICAL SKILLS

- Programming Languages:** Java, C, C++, Python, SQL
- Web Technologies:** HTML, CSS, JavaScript, TypeScript, React.JS, Node.JS, Angular, GraphQL, Redux, jQuery, RESTful APIs, Go
- Java/J2EE Technologies:** Servlets, JSP, JDBC, Struts2, Tailwind
- Spring Frameworks:** Spring Boot, Spring MVC, Spring Batch, Spring Data JPA, Spring Cloud, Spring Security, Hibernate
- Messaging Services:** Apache Kafka
- Databases:** Oracle, MySQL, PostgreSQL, SQL Server, MongoDB, Redis
- Devops:** Docker, Kubernetes, Jenkins, Github Actions, GitLab
- Cloud Providers:** AWS (EC2, EMR, EKS, S3, ELK Stack, Lambda, CloudWatch, DynamoDB), Azure, GCP
- Web Servers:** WebSphere, WebLogic, Apache Tomcat
- IDE(s) & Build Tools:** Eclipse, Spring Tool Suite (STS), Visual Studio Code, IntelliJ, Maven, Gradle
- Testing Tools:** Junit, Jest, Jasmine, Mockito, Selenium, Cucumber,
- Version Controls & Others:** Git, GitHub, Bitbucket, Jira, Figma, Bootstrap, Postman
- Operating System:** MacOS, Windows, Linux, Unix

EDUCATION

New Jersey Institute of Technology, New Jersey

May 2024

Master of Science in Computer Science

BNM Institute of Technology, India

July 2022

Bachelor of Engineering in Computer Science

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Developer - Associate
- Academic Excellence Award and Scholarship - Was honoured with academic excellence award and scholarship in 1st and 2nd semesters during Bachelor of Engineering in computer science.
